Engines Of European Integration Delegation Agency And Agency Setting In The Eu:

The Engines of European Integration Mark A. Pollack, 2003 This study of delegation and agency in the European Union examines the role of supranational actors like the Commission the Court of Justice and the European Parliament in the process of European integration and in contemporary EU governance

EU Trade Agreements and European Integration Markus Gastinger, 2023-11-23 EU Trade Agreements and European Integration studies 50 bilateral trade agreements negotiated by the European Commission from 1970 2008 and how they shaped European integration The book argues that the Commission used these trade agreements signed primarily with countries in Asia and Latin America to advance European integration by ensuring that they became wider in scope and institutionally deeper by establishing joint bodies even in the face of resistance from member states in the Council of the European Union Drawing upon principal agent theory to explain Commission autonomy and Council control as well as extensive archival material and other sources across six in depth case studies it shows that the Commission primarily relied on asymmetric information to shape trade agreements in earlier negotiations In later negotiations the Commission harnessed its agenda-setting power to submit agreements that the Council could only accept or reject Overall the book argues that these 50 trade agreements significantly impacted European integration by increasing the Commission's external action capability transforming it into a truly global political actor one trade agreement at a time This book will be of interest to scholars and students of European Union Studies and EU policy making practitioners involved in trade and external relations and engaged citizens in Europe and abroad particularly in India which is prominently featured in the book Introduction Chapter of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Oxford Handbook of the European Union Erik Jones, Anand Menon, 2012-08-30 This is an authoritative one volume and independent treatment of the history functioning and nature of the European integration Written by a selection of leading scholars It covers the major institutions policies and events in the history of integration whilst also providing a guide to the major theoretical approaches that have been used to study it over time By bringing together such a distinguished cast covering such a wide array of themes the Handbook is intended as a one stop shop for all those interested in the European Union and its predecessors Written in an accessible style the volume is intended to shape the discipline of EU studies and to establish itself as the essential point of reference for all those interested in European integration both in universities and more broadly It represents a timely guide to an institution that is much discussed but often only imperfectly understood

The Disparity of European Integration Borzel Tanja, 2013-10-31 This new study revisits the work of the late Ernst Haas assessing his relevance for contemporary European integration and its disparities With his seminal book *The Uniting of Europe* Haas laid the foundations for one of the most prominent paradigms of European integration neofunctionalism He engaged in inductive reasoning to theorize the dynamics of the European integration process that led

from the Treaty of Paris in 1951 to the Treaty of Rome in 1957 The Treaty of Rome set the constitutional framework for a Common Market Today a second Treaty of Rome may lay the foundation for a European Constitution that embeds the Common Market in a European polity Unfortunately Haas will not be able to witness this path breaking step in the development of a European political community which he so aptly theorized almost five decades ago This is all the more regrettable since students of European integration are more than ever challenged to tackle a major empirical puzzle After 50 years of European integration the member states managed to adopt a single currency and to develop common policies and institutions on justice and home affairs The integration of foreign policy and defence by contrast is still lagging behind This text delivers sharp insights into these issues This book previously published as a special issue of the Journal of European Public Policy will be of great interest to all students and scholars of international relations the European Union European politics and Public Policy

Towards A New Executive Order In Europe? Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of West European Politics

The Principal Agent Model and the European Union Tom Delreux, Johan Adriaensen, 2017-10-16 This book assesses the use and limitations of the principal agent model in a context of increasingly complex political systems such as the European Union Whilst a number of conceptual theoretical and methodological challenges need to be addressed the authors show that the principal agent model can still provide deeper insights into a wide range of political phenomena Through an empirical analysis of multiple principal agent relations in the EU covering a variety of policy fields and political actors the volume refines our theoretical understanding of the politics of delegation and discretion in the EU It will appeal to scholars interested in EU politics and policy public administration and governance and international organisations The chapter Multiple principals preferences different types of oversight mechanisms and agent's discretion in trade negotiations is published open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com)

Subsidiarity and Economic Reform in Europe George Gelauff, Isabel Grilo, Arjan Lejour, 2008-04-03 Subsidiarity in the European Union as the guiding principle of decision making close to the people is often motivated and discussed from a predominantly political perspective In this book experts draw the demarcation between

national and European policies from an economic viewpoint Insights from economic theory and empirical research are used both to analyse the assignment of policies between the EU and its member states and to identify appropriate levels of decision making *Regulation Through Agencies in the EU* Damien Geradin, University, The Netherlands, Rodolphe Muñoz, Nicolas Petit, 2005-01-01 The past decade has witnessed a proliferation of regulatory agencies at both the national and the EU level This coherent and clearly structured book is the first of its kind to analyse in equal measure and interdependently both national regulatory authorities and European agencies It brings together a select group of highly esteemed contributors authorities in their fields to provide a systematic and over arching view of regulation in the EU Unlike many of the previous attempts to shed light on this increasingly opaque and complex co existence of regulatory systems this book takes a genuinely multi disciplinary approach with integrated perspectives from law politics and economics **New Approaches to EU Foreign Policy** Maciej Wilga, Ireneusz Pawel Karolewski, 2014-06-05 EU foreign policy once existed in the form of the European Political Cooperation with only a limited political leverage and symbolic institutional underpinnings In recent years rapid changes have occurred including an expanding institutional apparatus increased responsibility and growing demand for action This book examines new approaches to the EU s foreign policy that address its rapidly changing character presenting the newest theoretical perspectives and dealing with novel empirical developments Rather than simply considering structural variations and changes in the agency of the EU it explores the new complexity in EU foreign policy The authors offer new theoretical perspectives and new empirical studies dealing among others with issues such as Power delegation to the Commission EU diplomacy Parliamentarisation and constitutionalisation Committees involvement in foreign policy process This book will be of interest to students and scholars of European politics European foreign policy and European integration Trading Voices Sophie Meunier, 2021-01-12 The European Union the world s foremost trader is not an easy bargainer to deal with Its twenty five member states have relinquished most of their sovereignty in trade to the supranational level and in international commercial negotiations such as those conducted under the World Trade Organization the EU speaks with a single voice This single voice has enabled the Brussels based institution to impact the distributional outcomes of international trade negotiations and shape the global political economy Trading Voices is the most comprehensive book about the politics of trade policy in the EU and the role of the EU as a central actor in international commercial negotiations Sophie Meunier explores how this pooling of trade policy making and external representation affects the EU s bargaining power in international trade talks Using institutionalist analysis she argues that its complex institutional procedures and multiple masters have more than once forced its trade partners to give in to an EU speaking with a single voice Through analysis of four transatlantic commercial negotiations over agriculture public procurement and civil aviation Trading Voices explores the politics of international trade bargaining It also addresses the salient political question of whether efficiency at negotiating comes at the expense of democratic legitimacy Finally this book looks at how

the EU with its recent enlargement and proposed constitution might become an even more formidable rival to the United States in shaping globalization *The Member States of the European Union* Simon Bulmer, Christian Lequesne, 2013 This is a comprehensive and rounded thematic study of the EU member states The text provides detailed coverage of the principal member states and comparative studies of the smaller states as well as discussing the issue of enlargement and covering empirical themes

The European Commission's Toleration of Noncompliance with EU Law Yaning Zhang, 2025-02-11 EU law is widely recognized as the backbone of European integration As the Guardian of the Treaties the European Commission is expected to enforce EU law relentlessly and meticulously Noncompliance by Member States however is not always prosecuted by the supranational guardian instead supranational enforcement by the Commission is known to be selective and strategic In this book Yaning Zhang argues that such forbearance is driven by divergent enforcement rationales He assumes that the Commission when enforcing EU law is a hybrid institution of a political agent and a judicial trustee The enforcement incentives of the Commission are to advance its legislative and political agenda and to safeguard the stability of the EU legal order respectively When these two incentives interact it leads to four ideal types of toleration of noncompliance with EU Law by the Commission Guided by the proposed typology the book traces four cases of enforcement leniency concerning restrictive measures against pharmaceutical parallel trade opaque defence procurement degrading practices towards irregular migrants and discriminatory regulation over car tolls These cases demonstrate that the Commission's strategic enforcement is not driven by a singular or merely egocentric logic but by different configurations of divergent enforcement incentives Naturally the normative quality of individual types of forbearance is also rather diverse With its novel typology and in depth empirical evidence *The European Commission's Toleration of Noncompliance with EU Law* offers a new way of understanding the complex interplay between law and politics in the EU **The EU in**

Catherine Gegout, 2010-05-08 The European Union's EU Common Foreign and Security Policy CFSP stipulates that all member states must unanimously ratify policy proposals through their representatives on the EU Council Intergovernmentalism or the need for equal agreement from all member nations is used by many political scientists and policy analysts to study how the EU achieves its CFSP However in *European Foreign and Security Policy* Catherine Gegout modifies this theory arguing instead for analyses based on what she terms constrained intergovernmentalism Gegout's theory of constrained intergovernmentalism allows for member states in particular France Germany and the United Kingdom to bargain with one another and to make rational decisions but also takes into account the constraints imposed by the United

States the European Commission and the precedents set by past decisions Three in depth case studies of CFSP decision making support her argument as she examines the EU position on China s human rights record EU sanctions against Serbia and EU relations with NATO *Routledge Handbook of European Politics* José Magone,2014-12-17 Since the Treaty of the European Union was ratified in 1993 the European Union has become an important factor in an ever increasing number of regimes of pooled sovereignty This Handbook seeks to present a valuable guide to this new and unique system in the twenty first century allowing readers to obtain a better understanding of the emerging multilevel European governance system that links national polities to Europe and the global community Adopting a pan European approach this Handbook brings together the work of leading international academics to cover a wide range of topics such as the historical and theoretical background the political systems and institutions of both the EU and its individual member nations political parties and party systems political elites civil society and social movements in European politics the political economy of Europe public administration and policy making external policies of the EU This is an invaluable and comprehensive resource for students scholars researchers and practitioners of the European Union European politics and comparative politics Conditional Leadership Jennifer R. Making the EMU James D. Savage, 2004-12-09 The Maastricht Treaty and the Stability Growth Pact demand that EU member states comply with their famous deficit and debt requirements of three and sixty per cent of GDP Yet how can the EU's leaders be certain that these targets are met Is a three per cent deficit in Belgium equivalent to one in Italy or France Making the EMU explores how the Treaty's budgetary surveillance procedure monitors member state budgetary policies harmonizes their budgetary data and effectively determines which member states qualified for member status and are subject to the Pact's sanctions This book provides the first examination of how the EU entrusted the credibility of these critical budgetary figures to a relatively minor European Commission agency and what effect the surveillance procedure has on the making of the EMU and the enforcement of Maastricht
