Bowker Company. Department of Bibliography, 1978-11 **Culturematic** Grant David McCracken, 2012 Welcome to Culturematic. How Reality TV, John Cheever, a Pie Lab, Julia Child, Fantasy Football, Burning Man, the Ford Fiesta Movement, Rube Goldberg, NFL Films, Wordle, Two and a Half Men, a 10,000 Year Symphony, and ROFLCom Memes will help you create and execute breakthrough ideas. A Culturematic is a little machine for making culture. It's an ingenuity engine. Once wound up and released, the Culturematic acts as a probe into the often alien world of contemporary culture to test the atmosphere to see what life it can sustain, to see who responds, and how. Culturemetics start small but can scale up ferociously, bootstrapping themselves as they go. Because they are so inexpensive, we can afford to fire off a multitude of Culturemetics simultaneously. This is evolutionary strategy: iterative innovation and rapid prototyping, all at once. Culturemetics are fast, cheap, and out of control. Perhaps as important as they fail early and often, they are the perfect antidote to a world where we cannot guess what's coming next. In *Culturematic*, anthropologist Grant McCracken describes these little machines and helps the reader master them. Examples are drawn from NFL Films, Twitter, the Apple Genius Bar, Starbucks, Ford, SNL, Digital Shorts, Restoration Hardware, UNICEF, J Crew, Pie Lab, USA Network, and the GEICO gecko. For the traditional producers of culture—the creators of movies, design, advertising, publishing, magazines, newspapers, and corporate R & D—this book will inspire new innovation and creativity. For the emerging producers of culture—the digital players—this book will serve as a practical handbook. Culturematic: our app for creating the world anew. Rail Mergers and Formation of the Burlington Northern Holding Company United States. Congress. Senate. Committee on the Judiciary, 1982 *Free Imagination* Peter Ulric Tse, 2024-08-07 Free Imagination argues that the brain's capacity to imagine is the fundamental basis of human free will. Laws of physics need not apply in our internal simulations, so virtually

anything is possible there And since some of our actions can follow from that which we imagine especially from processes of deliberation that involve imagining possible scenarios and outcomes our actions inherit the freedom of our imaginings The creative power of the human imagination may have evolved as a consequence of the demodularization of neural circuitry associated with volitional attentional operations over operands downloadable into a mental workspace where virtually anything could be combined with anything else This new cognitive architecture gave rise to the danger of psychosis Our schizotypal form of imagination arising from the promiscuous generative and iterative combination of disencapsulated operators and operands in a mental workspace may have evolved only in humans by exapting from existing motoric and other operations involved in volitional hand dexterity to a domain of premotoric simulation What we imagine into existence can be used for good or evil Imagination is therefore our greatest tool and weapon When applied to ourselves it allows us the possibility of reimagining and then transforming ourselves in light of second order desires This gives us the ability to choose to become a new kind of chooser in the future Other animals lack this second order Free Will although they can do otherwise they cannot want to become otherwise than they are making them amoral This book explores the idea that because humans in contrast have second order Free Will they can be moral or immoral Founding Flies Mike Valla,2013-08 43 American fly tying masters including Mary Orvis Marbury Thaddeus Norris and Theodore Gordon
