Heidegger and the Measure of Truth Denis McManus, 2012-11-29 Denis McManus presents a novel account of Martin Heidegger's early vision of our subjectivity and the world we inhabit He explores key elements of Heidegger's philosophy and argues that Heidegger's central claims identify genuine demands that must be met if we are to achieve the feat of thinking determinate thoughts about the world around us

Normativity and Phenomenology in Husserl and Heidegger Steven Crowell, 2013-04-25 Steven Crowell has been for many years a leading voice in debates on twentieth century European philosophy This volume presents thirteen recent essays that together provide a systematic account of the relation between meaningful experience intentionality and responsiveness to norms They argue for a new understanding of the philosophical importance of phenomenology taking the work of Husserl and Heidegger as exemplary and introducing a conception of phenomenology broad enough to encompass the practices of both philosophers Crowell discusses Husserl's analyses of first person authority the semantics of conscious experience the structure of perceptual content and the embodied subject and shows how Heidegger's interpretation of the self addresses problems in Husserl's approach to the normative structure of meaning His volume will be valuable for upper level students and scholars interested in phenomenological approaches to philosophical questions in both the European and the analytic

Heidegger's Being and Time Richard Polt, 2005-09-15 Heidegger's Being and Time Critical Essays provides a variety of recent studies of Heidegger's most important work. Twelve prominent scholars representing diverse nationalities, generations, and interpretive approaches deal with general methodological and ontological questions, particular issues in Heidegger's text, and the relation between Being and Time and Heidegger's later thought. All of the essays presented in this volume were never before available in an English language anthology. Two of the essays have never before been published in any language. Dreyfus and Guignon: three of the essays have never been published in English before. Grondin, Kisiel, and Thom: and two of the essays provide previews of works in progress by major scholars. Dreyfus and Kisiel.

Pragmatism and the European Traditions Maria Baghramian, Sarin Marchetti, 2017-12-06 The turn of the twentieth century witnessed the birth of two distinct philosophical schools in Europe: analytic philosophy and phenomenology. The history of 20th century philosophy is often written as an account of the development of one or both of these schools, as well as their overt or covert mutual hostility. What is often left out of this history, however, is the relationship between the two European schools and a third significant philosophical event: the birth and development of pragmatism, the indigenous philosophical movement of the United States. Through a careful analysis of seminal figures and central texts, this book explores the mutual intellectual influences, convergences, and differences between these three revolutionary philosophical traditions. The essays in this volume aim to show the central role that pragmatism played in the development of philosophical thought at the turn of the twentieth century, widen our understanding of a seminal point in the history of philosophy, and shed light on the ways in which these three schools of thought continue to shape the theoretical agenda of contemporary philosophy.

Face to Face with Practice Steven Segal, Claire Jankelson, 2016-07-01 Coming Face to Face with your own practice is an emerging approach to management and professional research that has a significant impact on management practice. It closes the gap between theory and practice. An existential form of research means that the researcher carefully attends to their experience of researching and managing. This book demonstrates that by bringing an existential sensibility to research, unexpected possibilities for research and for professionalism are revealed. Each chapter shows authors grappling with the constraints of a system, navigating issues of humanness, questioning themselves, unfolding their understanding of appropriate ethics, and finally elucidating a depth of response that in itself reveals a way forward. In Face to Face with Practice, authors demonstrate how they drew on moments of estrangement from their practices. They found that when such moments are respected and carefully examined, a kind of clarification and at the same time often deep disillusionment with the taken-for-granted conventions of their practice emerge.

Through exploring these conventional ways of operating authors develop new and original accounts of what it means to manage better in their particular field of practice Such an approach is called hermeneutic existential phenomenology affectionately known as HEP Face to Face is about making a difference a difference to the ways that management is practiced a difference to the experience of the manager and actually a difference towards a more humane and thoughtful approach to managing our society today

Quantum Closures and Disclosures Gordon G. Globus, 2003-04-28 Quantum Closures and Disclosures thinks together two seemingly irreconcilable discourses An application of quantum field theory to brain functioning called quantum brain dynamics and the continental postphenomenological tradition especially the work of Martin Heidegger and Jacques Derrida Underlying both developments is a new ontology of nonCartesian dual modes whose rich provenance is their between World is disclosed in the lumen naturale of dual modes belonging together in their between all presencing is a function of a conjugate form of match in the between This surprising rapprochement between a powerful tradition within continental philosophy and the 20th century quantum revolution in science is fruitfully applied to crucial issues in philosophy brain science mathematics and psychiatry Related Titles Quantum Brain Dynamics and Consciousness An introduction edited by Mari Jibu and Kunio Yasue 1995 and My Double Unveiled The dissipative quantum model of the brain by Giuseppe Vitiello 2001

Practice and the Human Sciences Donald E. Polkinghorne, 2012-02-01 Teachers nurses psychotherapists and other practitioners of care are under pressure to substitute specific prescribed techniques in place of using their own judgment Donald E Polkinghorne assembles the case for the return to judgment based practice for the professions that engage in direct person to person interaction with those they serve Set in the larger context of the technification of society Polkinghorne draws from Weber Heidegger Ihde Bourdieu de Certeau and other philosophers to trace the advancing power of the technological worldview in Western culture and uses Aristotle Dewey and Gadamer to help make his case that we should be doing things very differently

Human Enactment Of Intelligent Technologies: Towards Metis And Mindfulness W David Holford, 2021-08-05 This book demystifies what artificial intelligence is examines its strength and limitations in comparison to what humans are capable of and investigates the nature of human adaptive expertise across the concept of metis It also examines a particular family of mindsets that we as humans have adopted over the ages namely epistemologies of representational knowledge These representational perspectives have followed us into numerous fields including how we perceive and comprehend human cognition leading to with a hammer everything looks like a nail syndrome As such this book presents the alternative phenomenological viewpoint of embodied direct reality within the cognitive sciences in the form of radical embodied cognition and more importantly how it allows us to better highlight and comprehend human metis and its adaptive expertise We then examine why we collectively continue to enact and perpetuate predominant mindsets of representations across the phenomena of mindlessness To counter this we re visit the practice of individual and collective mindfulness providing a potential beachhead in our re appropriation of technology artificial intelligence towards

achieving the best of both worlds that is allowing human creativity and ingenuity to be expressed with artificial intelligence as a tool to help us do just that across meaningful human control Finally we conclude by examining current top of the horizon activities and debates regarding quantum physics in relation to the human mind and artificial intelligence and how once again representational mindsets need not be the only tool in town

The Roots of Hermeneutics in Kant's Reflective-Teleological Judgment Horst Ruthrof, 2022-11-28 This book challenges the standard view that modern hermeneutics begins with Friedrich Ast and Friedrich Schleiermacher arguing instead that it is the dialectic of reflective and teleological reason in Kant's Critique of Judgment that provides the actual proto hermeneutic foundation It is revolutionary in doing so by replacing interpretive truth claims by the more appropriate claim of rendering opaque contexts intelligible Taking Gadamer's comprehensive analysis of hermeneutics in Truth and Method 1960 as its point of departure the book turns to Kant's Critiques reviewing his major concepts as a coherent system in relation to his sensus communis At the heart of the book is the interaction between reflective bottom up search and teleological top down interpretative projection as provided in Part II of the third Critique This text contends that Kant's broad definition of nature invites the liberation of the reflective teleological judgment from its biological exemplifications and so permits us to establish its generalised status as a path breaking methodological tool Kant's dialectic of reflective search and meaning bestowing stipulated teleology is asserted to anticipate a series of motifs commonly associated with hermeneutics Figures covered include Dilthey Husserl Ingarden Heidegger Gadamer Apel Habermas Ricoeur Derrida Foucault Lyotard Deleuze Vattimo Nancy and Caputo Their collective contributions to interpretation allow for a review of the evolution of hermeneutics from the perspective of the Kantian critique of the limitations of human cognition The book is written for the informed general reader but will likewise appeal to advanced undergraduate and graduate students as well as researchers in the humanities and social sciences
