Heidegger And Leibniz Reason And The Path:

Heidegger and Leibniz R. Heidegger and Leibniz R. Cristin, 1998-07-31 Cristin philosophy U of Trieste begins by analyzing the concept of foundation reason as a different option made by the two German philosophers He characterizes Heidegger's critique as a reflection on the meaning and essence of reason and the foundation representing a considerable displacement of them such that infallible theoretical mechanisms and indubitable phenomenal substrata no longer exist He then discusses what the two think about thinking and suggests that they may come close to agreeing on what Heidegger calls meditating Finally he ponders the hypothesis that Heidegger's thinking on Being contains an original mingling of rational and meditating thought that echoes inchoate concepts in Leibniz No subject index Annotation copyrighted by Book News Inc Portland OR *Leibniz and Hermeneutics* Miguel Escribano Cabeza, José M. Gómez Delgado, Juan Antonio Nicolás, 2016-02-08 In recent centuries in the history of philosophy Leibniz's thought has been considered from a wide range of perspectives as a decisive influence on modernity's genesis or as Kant's predecessor as key to contemporary logic's development and even in parallel to Nietzsche's metaphysics of individuality However the high potential of Leibniz's thought has been most strongly understood by contemporary hermeneutics and its authors including Heidegger for whom Leibniz represents the greatest exponent of Modernity This book explores the philosophical connection of the hermeneutical approach with Leibniz's thought Comprised of twelve chapters in addition to a detailed bibliography of the appearances of Leibniz in Heidegger's Gesamtausgabe and secondary literature it explores such subjects as the distinction amongst phases in Heidegger's reception of Leibniz works dedicated to concepts of time substance representation personal identity reality and force Furthermore this book also

provides the perspectives of a number of authors in relation to Leibniz such as Ortega y Gasset, Apel, Deleuze and Husserl.

Heidegger and Leibniz Renato Cristin, 1998 Heidegger holds that our age is dominated by the ambition of reason to possess the world. And he sees in Leibniz the man who formulated the theorem of our modern age: nothing happens without a reason. He calls this attitude calculating thought and opposes to it a kind of thought aimed at preserving the essence of things which he calls meditating thought. Cristin's book ascribes great importance to this polarity of thinking for the future of contemporary philosophy and thus compares the basic ideas of the two thinkers. Leibniz announces the conquest of reason; Heidegger denounces the dangers of reason. Their diversity becomes manifest in the difference between the idea of reason and the image of the path. But is Leibniz's thought really only calculating? And do we not perhaps also encounter the traces of reason along Heidegger's path? With these questions in mind, we may begin to redefine the relation between the two thinkers and between two different conceptions of reason and philosophy. The hypothesis is advanced that Heidegger's harsh judgment of Leibniz may be mitigated, but it also becomes clear that Heidegger's rewriting of the code of reason is an integral part of our age in which many signs point to new loci of rationality. With his original interpretation aware of the risks he is taking, Renato Cristin offers a new guide to the understanding of reason: he shows forth Leibniz as one who defends the thought of being in the unity of monadology and Heidegger as a thinker who preserves the sign of reason in his meditating thought.

Paths in Heidegger's Later Thought Günter Figal, Diego D'Angelo, Tobias Keiling, Guang Yang, 2020-03-10 If one takes Heidegger at his word, then his philosophy is about pursuing different paths of thought rather than defining a single set of truths. This volume gathers the work of an international group of scholars to present a range of ways in which Heidegger can be read and a diversity of styles in which his thought can be continued. Despite their many approaches to Heidegger, their hermeneutic orientation brings these scholars together. The essays span themes from the ontic to the ontological, from the specific to the speculative. While the volume does not aim to present a comprehensive interpretation of Heidegger's later thought, it covers much of the terrain of his later thinking and presents new directions for how Heidegger should and should not be read today. Scholars of Heidegger's later thought will find rich and original readings that expand considerations of Heidegger's entire oeuvre.

The Nature of Reality and the Reality of Nature Jürgen Lawrenz,2009-12-14 This new comprehensive study of Leibniz s system of thought reveals a philosopher equally intrigued by the complexity of physical reality and the fascinations of his metaphysical laboratory Many of his most important but never previously published papers are evaluated in this book Too often put down as an arch metaphysician Leibniz is seen in these pages as a venturer of breathtaking boldness his ambition being nothing less than to actually solve the enigma of existence Accordingly his system embraced science equally with metaphysics they complement and pollinate each other The outcome is a view of his system as a double ontology Reality is the domain of the actual metaphysics the laboratory of the possible Metaphysics springs to life with his scintillating detective work on force motion time space limits infinity folds fractals and many other issues that are hot again today while in all these a direct line is kept open to their impact on physical existents and our understanding of reality This book is equally suited to expert Leibnizians as to students of Early Modern philosophy and it may be read with profit by anyone interested in this thinker whom Bertrand Russell called

one of the supreme intellects of all time *Daoist Phenomenology* Jay Goulding, 2025-05-01 Jay Goulding's *Daoist Phenomenology* represents a lifelong project of interpolating the works of Martin Heidegger with the interweavings of Daoism and Zen. Illustrating styles of reading complex texts from Europe and East Asia, Goulding moves away from horizontal reading of simple comparisons on a single plain to vertical reading as a deep dive of ideas into ancient worlds. Vertical Reading is a hermeneutic strategy that captures the depth of connection between phenomenology and Daoism, especially Heidegger and classical Daoists Laozi and Zhuangzi. His method reveals Daoist implications of Dogen's Zen and draws on writing and ideas from popular culture including Jules Verne, H. P. Lovecraft, Philip K. Dick, George Lucas, Star Wars universe, and martial artist Bruce Lee. Original and wide-ranging, Goulding's interconnected approach to phenomenology and Daoism enhances and promotes further intercultural dialogues between two great traditions in world philosophies.

Being Played: Gadamer and Philosophy's Hidden Dynamic Jeremy Sampson, 2019-09-02 Are we being played? Is our understanding of the traditionally fixed and static concepts of philosophy based on an oversimplification? This book explores some of the theories of the self since Descartes together with the rationalism and the empiricism that sustain these ideas and draws some startling conclusions using Gadamer's philosophical study of play as its starting point. Gadamer's ludic theory, Sampson argues, reveals a dynamic of play that exists at the deepest level of philosophy. It is this dynamic that could provide a solution in relation to the Gadamer-Habermas hermeneutics debate and the Gadamer-Derrida relativism debate together with a theory of totality. Sampson shows how ludic theory can be a game changer in understanding the relationship between philosophy and literature, exploring the dynamic between the fictive and non-fictive worlds. These worlds are characterized simultaneously by sameness, univocity of Being, and difference, equivocity of Being. The book questions Heidegger's idea that the univocity of Being is universal, instead maintaining that the relationship between the univocity of Being and equivocity of Being is real and that ontological mediation is required to present them as a unified whole. Using the works of Shakespeare, Beckett, and Wilde, Sampson contends that such a mediation, termed the ludicity of Being, takes place between literature and its audience. This literary example has profound implications not only for literature and its attendant theories but also for philosophy in particular, ontology, and hermeneutics.

Hermeneutics. Method and Methodology Thomas M. Seebohm, 2007-11-06 The goal of the investigation is a phenomenological theory of the methods and later the methodology of the human sciences, first of all the philological interpretation of texts. The first part is a critical reflection on the historical development of hermeneutics as method of interpreting texts and the tradition, including the first steps toward the emergence of scientific, methodological hermeneutics. Such reflections show that the development of hermeneutics is onesidedly founded in the development of hermeneutical consciousness, i.e., the changing attitudes in the application and rejection of cultural traditions. All methods and finally methodologies are onesidedly founded in the activities of the lifeworld. The second part is a first attempt to develop an outline of a general phenomenological theory of pre-methodical and methodical understanding in the

lifeworld The third part offers a critical phenomenologically guided analysis of methodological hermeneutics

Phenomenology on Kant, German Idealism, Hermeneutics and Logic O.K. Wiegand, Robert J. Dostal, Lester Embree, J.J. Kockelmans, J.N. Mohanty, 2013-06-29 Joseph 1 Kockelmans Pennsylvania State University In July of 1999 Prof Dr Thomas M Seeböhm turned 65 years old and thus entered mandatory retirement His friends colleagues and former students thought that it would be fitting to celebrate the event of his retirement with a volume of essays in his honor in order to render homage to a great human being an outstanding and dedicated teacher a highly regarded philosopher and scholar but above all a dear friend and colleague When the editors thought about a unifying theme for the anthology they finally settled on the research interests of Professor Seeböhm in their view the vast domain of his competence and interests would leave all participants the freedom to select a topic of their own choice that would nonetheless lie within this large realm as well as within the area of their own research interests Professor Seeböhm's research interests encompass work in Phenomenology Hermeneutics German Idealism Kant in particular History of Philosophy Philosophy of the formal sciences of Logic in particular Philosophy of History Methodology and Philosophy of the Human Sciences including Psychology and Sociology History of 19th Century British Empiricism Mill American Pragmatism Analytic Philosophy Philosophy of Law and Practical Philosophy the development of the history of philosophy in Eastern Europe especially in the Middle Ages but also in the nineteenth century

Ideas for a Hermeneutic Phenomenology of the Natural Sciences J.J. Kockelmans, 1993 Ideas for Hermeneutic Phenomenology of Natural Sciences published in 1993 as volume 15 of this series comprised mainly ontological reflections on the natural sciences That book explained why the natural sciences must be considered inherently interpretive in character and clarified the conditions under which scientific interpretations are legitimate and may be called true This companion volume focuses on methodological issues Its first part elucidates the methodical hermeneutics developed in the 19th century by Boeckh Birt Dilthey and others Its second part through the use of concrete examples drawn from modern physics as it unfolded from Copernicus to Maxwell clarifies and proves the main points of the ontologico hermeneutical conception of the sciences elaborated in the earlier volume It thereby both illuminates the most important problems confronting an ontologico phenomenological approach to the natural sciences and offers an alternative to Kuhn's conception of the historical development of the natural sciences

Milton and Gender Catherine Gimelli Martin, 2005-01-06 Milton's contempt for women has been accepted since Samuel Johnson's famous Life of the poet Subsequent critics have long debated whether Milton's writings were anti or pro feminine a problem further complicated by his advocacy of divorce on demand for men Milton and Gender re-evaluates these claims of Milton as anti feminist pointing out that he was not seen that way by contemporaries but espoused startlingly fresh ideas of marriage and the relations between the sexes The first two sections of specially commissioned essays in this volume investigate the representations of gender and sexuality in Milton's prose and verse In the final section the responses of female readers ranging from George Eliot and Virginia Woolf to lesser known

artists and revolutionaries are brought to bear on Milton's afterlife and reputation Together these essays provide a critical perspective on the contested issues of femininity and masculinity marriage and divorce in Milton's work

Zahavi, Sara Heinämaa, Hans Ruin, 2012-12-06 The past decade has witnessed a notable turn in philosophical orientation in the Nordic countries For the first time the North has a generation of philosophers who are oriented to phenomenology This means a vital rediscovery of the phenomenological tradition as a partly hidden conceptual and methodological resource for taking on contemporary philosophical problems The essays collected in the present volume introduce the reader to the phenomenological work done in the Nordic countries today The material is organized under three general headings metaphysics facticity and interpretation The first part Metaphysics asks if phenomenology is or could be taken as a metaphysical inquiry It studies this possibility in a systematic as well as in a historical perspective The second part Facticity focuses on the double character of the philosophizing subject on the one hand as a worldly being bound by a cultural and historical situation and on the other hand as the one who thinks this condition and gives it an interpretation It studies four aspects of facticity in particular language dwelling alterity and generation The third part Interpretation clarifies the different notions of interpretation central to phenomenology understood as hermeneutics **Husserl's Logical Investigations in the New Century: Western and Chinese Perspectives** Kwok-Ying Lau, John J. Faith, Hope, and Love in the Kingdom of God Robert Hernan Cubillos, 2017-04-27 We live in a world full of challenges The three graces can almost be seen as motors for Christian life in today s world but the words faith hope and love have so many everyday uses that their technical theological meanings are for many difficult to appreciate Modern life also leaves many yearning for authenticity and meaning Many religions have answered that need by calling to mind the image of a path Always profound progressions religious paths tend to be motivated either by practices the act of walking the path or focal points Christianity has a focal point an object and it sees the three graces as distinctively content filled The heart of this book is about helping people find the Christian path and their intellectual emotional and spiritual balance an equilibrium that is sustained by a strong personal faith an enduring hope for the future and genuine love that will withstand the worst of times It contributes to the category of Christian literature that provides a pattern for Christian living without surrendering the intellect to the more popular side of this genre
