RICHARDSON, 1962 Heidegger: through phenomenology to thought, pref William J. Richardson, **On the Way to Heidegger's Contributions to Philosophy** Parvis Emad, 2007-06-25 One of the most significant philosophical works of the twentieth century *Contributions to Philosophy* is also one of the most difficult. Parvis Emad in this collection of interpretive and critical essays unravels and clarifies this challenging work with a rare depth and originality. In addition to grappling with other commentaries on Heidegger, he highlights Heidegger's being historical thinking as thinking that sheds new light on theological, technological, and scientific interpretations of reality. At the crux of Emad's interpretation is his elucidation of the issue of the turning in Heidegger's thought and his enactment of Heidegger's thinking. He finds that only when Heidegger's work is enacted is his thinking truly revealed. **Heidegger's Ontology of Events** Bahoh James Bahoh, 2019-11-01 James Bahoh proposes a new methodology for explaining Heidegger's philosophy: diagenic analysis. This approach solves a set of interpretive problems that have stymied previous approaches to his difficult later work and led to substantial inconsistencies in the available scholarship. Using it, Bahoh reconstructs Heidegger's concept of event in relation to his theories of history, truth, difference, ground, and time/space. In these contexts, Bahoh argues that Heidegger's logic of events entails a logic of difference that is prior to and constitutive for the logic of identity essential to traditional metaphysics. The logic of events explains the generation of ontological structures grounding individuated finite domains; that is, it explains the generation of the logic of worlds of beings.
