Hellenistic Statues of Aphrodite Dericksen Morgan Brinkerhoff,1978 **Hellenistic Statues of Aphrodite** Dericksen M. Brinkerhoff,1958 **The Aphrodite of Knidos and Her Successors** Christine Mitchell Havelock,2007 A revealing survey of Aphrodite **Personal Styles in Greek Sculpture** Όλγα Παλαγιά,J. J. Pollitt,Department of Classics, Yale University Staff,1998 The aim of this 1996 book is to identify and evaluate the distinctive styles of five important ancient Greek sculptors whose work is discussed by ancient writers Its underlying assumption is that the history of Greek sculpture was not simply governed by impersonal evolutionary forces but that like the sculpture of later periods it was shaped by the intuitions predilections and innovations of particular individuals The international group of authors whose essays appear here recognize that the problematical and fragmentary nature of the surviving evidence makes their task a difficult one Nevertheless by drawing upon the evidence of recent archaeological finds and by re evaluating both the ancient literary sources and earlier scholarly literature they expand our understanding of the role of personal styles in ancient Greek art

Greek Art and Aesthetics in the Fourth Century B.C. William A. P. Childs, 2018-04-10 Greek Art and Aesthetics in the Fourth Century B C analyzes the broad character of art produced during this period providing in depth analysis of and commentary on many of its most notable examples of sculpture and painting Taking into consideration developments in style and subject matter and elucidating political religious and intellectual context William A P Childs argues that Greek art in this era was a natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century As Childs shows in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion Delving into formal and iconographic developments in sculpture and painting Childs examines how the sensitive expressive quality of these works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition Another overarching theme concerns the nature of style as a concept of expression an issue that becomes more important given the increasingly multiple styles and functions of fourth century Greek art Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world

not just life in a small Roman town but also its embellishment mainly from the late Republic and through the early Empire to the time of Hadrian While public statuary is not well preserved stone and marble material from the private sphere are well represented domestic sculpture and furniture from the third century BCE to the first CE form by far the largest category of objects The presence of these materials in both public and private spheres sheds light on the wealth of the town and individual families The comparative briefness of Cosa's life means that this material is more easily comprehensible as a whole for the entire town as excavated compared for instance to the much larger cities of Pompeii and Herculaneum

Aphrodite's Tortoise Lloyd Llewellyn-Jones, 2003-12-31 Greek women routinely wore the veil That is the unexpected finding of this meticulous study one with interesting implications for the origins of Western civilisation The Greeks popularly and rightly credited with the invention of civic openness are revealed as also part of a more Eastern tradition of seclusion Llewellyn Jones work proceeds from literary and notably from iconographic evidence In sculpture and vase painting it demonstrates the presence of the veil often covering the head but also more unobtrusively folded back onto the shoulders This discreet fashion not only gave a privileged view of the face to the ancient art consumer but also incidentally allowed the veil to escape the notice of traditional modern scholarship From Greek literary sources the author shows that full veiling of the head and face was commonplace He analyses the elaborate Greek vocabulary for veiling and explores what the veil meant to achieve He shows that the veil was a conscious extension of the house and was often referred to as tegidion literally a little roof Veiling was thus an ingenious compromise it allowed women to circulate in public while maintaining the ideal of a house bound existence Alert to the different types of veil used the author uses Greek and more modern evidence mostly from the Arab world to show how women could exploit and subvert the veil as a means of eloquent sometimes emotional communication First published in 2003 and reissued as a paperback in 2010 Llewellyn Jones book has established itself as a central and inspiring text for the study of ancient women
