Avolio, 2011-09-01 This book focuses on capturing one of the most important elements in successful leadership giving followers a voice and motivating them to use that voice to help the leader be successful The book is based on taking real stories of effective versus ineffective leaders from around the world and sharing the lessons learned that facilitate or detract from followers helping leaders to be at their very best Every leader comes to a cliff so the author asks the fundamental question which ones have followers that grab them to pull them back from the abyss and which ones have followers that give them a nudge towards the abyss This book threads many of the core concepts associated with the science and practice of leadership such as authenticity ownership and innovation into the stories that help explain how leaders can create the conditions for followers to take ownership in ways that facilitate effective innovation and performance The stories were purposely chosen for inclusion that would be the ones that readers would most likely identify with and apply to their own development Moreover the stories are framed by concepts and constructs in the field of leadership that have been well studied This is the type of book that one would expect managers to buy 20 copies for all of their followers to read and then perhaps discuss why the leader wants more No People in his or her unit The book was written to be highly accessible to a very wide range of audiences from teachers to trainers to top management teams Ideally keeping the length short easy to read and reasonably priced for high volume sales will offer this book its best chance of success in the global market The Rise of the Female Executive Peninah Thomson, Tom Lloyd, Clare Laurent, 2015-10-12 Provides a timely review of gender equality in the boardroom and through interviews with mentors and mentees it illustrates how mentoring can play a part in helping women stay engaged in their career This book includes international comparisons and an examination of the UK and EU political environments The Business of People Iain Fraser, Madeleine Taylor, 2019-07-25 The Business of People is purposefully focused on people The book will assist you to develop and support

More Than a Motorcycle Rich Teerlink, Lee Ozley, 2000-09-18 In the late 1980s Harley Davidson beat back an assault by Japanese competitors and engineered a remarkable financial turnaround But it subsequently faced an even more formidable challenge maintaining and improving on its success in the absence of an external crisis To answer this challenge then CEO Rich Teerlink partnering with organizational consultant Lee Ozley threw out the top down strategies that had just saved the company and began building a different Harley one that would be driven not by top management but by employees at every level What happened next is the stuff of turnaround legend More Than a Motorcycle is the story behind the story of the purposeful transformation of an American icon as told by the two individuals most deeply involved in that decade long process The book chronicles the victories and setbacks along Harley's difficult journey from a traditional command and control culture to an open participative learning environment Teerlink and Ozley deliver three fundamental messages people are a company's only sustainable competitive advantage there is no quick fix to effect lasting beneficial organizational change and leadership is not a person but a process to which everyone must contribute They provide practical reality tested

between 2005 and 2017 These speeches delivered at the Seizing Success and Inspiring Leadership conferences form the structure around which Steve's story and insights are wrapped Steve's account covers some fundamental shifts in the English education system over this 12 year period and describes how school leaders altered their leadership as this context changed Furthermore it delves into how his own leadership developed as his personal context changed and explores how the notion that a leader needs to be good at all aspects of leadership is not only unrealistic but is also bad for the mental and physical health of leaders and will do nothing to attract new people into leadership positions Ultimately Steve hopes that as you read this book you will see the value of imperfect leadership and of the positive impact it can make For those reading it who have yet to step up into leadership his sincere wish is that it will encourage and empower aspirational leaders rather than discourage them Suitable for all those in or aspiring to leadership positions in education *Jet*, 2004-09-13 The weekly source of African American political and entertainment news
