Stephen Sennott, 2004 A balance of sophistication and clarity in the writing, authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms and professional issues, buildings, styles and sites, the architecture of cities and countries, critics and historians, construction materials and planning topics, schools, movements and stylistic and theoretical terms. **Sacred Buildings** Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality *Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl* Avery Library, 1991 **Contemporary Architecture in Germany 1970-1996** Gerd Bruyn de, 1997-06

In recent years the importance of architecture in Germany has surged There is hardly any other country in the world where internationally acclaimed architects including Tadao Ando Richard Meier James Stirling and Norman Foster to name a few have erected so many major structures And in turn the buildings by German architects e g Gottfried Bohm Thomas Herzog Josef Paul Kleihues and Oswald Mathias Ungers are meriting increasing international attention With its selection of 50 buildings this handsome volume documents the development and diversity of contemporary architecture in Germany since 1970 It deliberately assumes the character of an introduction and therefore is aimed not only at a specialized readership but

also and above all at culturally interested readers at home and abroad Gerd de Bruyn opens the work with a sketch of German architectural history since 1945 and Gerd Zimmermann presents the special position of architecture in the former GDR The entries in the main section of this reference work are ordered alphabetically by architect and feature 50 specially chosen buildings each on a double page with photographs ground plans and a project description      **Encyclopedia of 20th Century Architecture** R.
