Writing the Goodlife Priscilla Solis Ybarra, 2016-05-12 Winner of the Western Literature Association's 2017 Thomas J Lyon Book Award in Western American Literary and Cultural Studies Mexican American literature brings a much needed approach to the increasingly urgent challenges of climate change and environmental injustice Although current environmental studies work to develop new concepts Writing the Goodlife looks to long established traditions of thought that have existed in Mexican American literary history for the past century and a half During that time period Mexican American writing consistently shifts the focus from the environmentally destructive settler values of individualism domination and excess toward the more beneficial refrains of community non possessiveness and humility The decolonial approaches found in these writings provide rich examples of mutually respectful relations between humans and nature an approach that Priscilla Solis Ybarra calls goodlife writing Goodlife writing has existed for at least the past century Ybarra contends but Chicana o literary history's emphasis on justice and civil rights eclipsed this tradition and hidden it from the general public's view Likewise in ecocriticism the voices of people of color most often appear in deliberations about environmental justice The quiet power of goodlife writing certainly challenges injustice to be sure but it also brings to light the decolonial environmentalism heretofore obscured in both Chicana o literary history and environmental literary studies Ybarra's book takes on two of today's most discussed topics the worsening environmental crisis and the rising Latino population in the United States and puts them in literary historical context from the U S Mexico War up to today's controversial policies regarding climate change immigration and ethnic studies This book uncovers 150 years worth of Mexican American and Chicana o knowledge and practices that inspire hope in the face of some of today's biggest challenges

Eating History Andrew F. Smith, 2009-09-18 Food expert and celebrated food historian Andrew F Smith recounts in delicious detail the creation of contemporary American cuisine The diet of the modern American wasn't always as corporate conglomerated and corn rich as it is today and the style of American cooking along with the ingredients that compose it has

never been fixed With a cast of characters including bold inventors savvy restaurateurs ruthless advertisers mad scientists adventurous entrepreneurs celebrity chefs and relentless health nuts Smith pins down the truly crackerjack history behind the way America eats Smith's story opens with early America an agriculturally independent nation where most citizens grew and consumed their own food Over the next two hundred years however Americans would cultivate an entirely different approach to crops and consumption Advances in food processing transportation regulation nutrition and science introduced highly complex and mechanized methods of production The proliferation of cookbooks cooking shows and professionally designed kitchens made meals more commercially politically and culturally potent To better understand these trends Smith delves deeply and humorously into their creation Ultimately he shows how by revisiting this history we can reclaim the independent locally sustainable roots of American food

Rebels Without a Cause? Gerd Hurm, Ann Marie Fallon, 2007 The figure of the rebel of the 1950s shaped the imagination of the American post war generation Yet the notoriety of the rebel resides uneasily beside that of the conformist ironically one of the other central figures of the decade This collection of essays which originated at an international conference in Trier Germany in 2005 sets out to explain the multiple representations of rebellion and affirmation in 1950s American culture It explores the ways in which rebellion was contained and also disruptive during this pivotal decade of American ascendance on the global scene In a series of essays written by prominent American Studies scholars in the United States and Germany the collection explores the meaning of rebellion in the 1950s and its role in shaping theological literary and cultural discourses

Fictions of Western American Domesticity Amanda J. Zink, 2018-06 This work provides a compelling explanation of something that has bedeviled a number of feminist scholars Why did popular authors like Edna Ferber continue to write conventional fiction while living lives that were far from conventional Amanda J Zink argues that white writers like Ferber and Willa Cather avoided the subject of their own domestic labor by writing about the performance of domestic labor by others showing that American print culture both in novels and through advertisements moved away from portraying women as angels in the house and instead sought to persuade other women to be angels in their houses Zink further explores lesser known works such as Mexican American cookbooks and essays in Indian boarding school magazines to show how women writers dialoging domesticity exemplify the cross cultural encounters between colonial domesticity and sovereign domesticity By situating these interpretations of literature within their historical contexts Zink shows how these writers championed and challenged the ideology of domesticity

Take My Word Anne E. Goldman, 2023-09-01 In an innovative critique of traditional approaches to autobiography Anne E Goldman convincingly demonstrates that ethnic women can and do speak for themselves even in the most unlikely contexts Citing a wide variety of nontraditional texts including the cookbooks of Nuevo Mexicanas African American memoirs of midwifery and healing and Jewish women s histories of the garment industry Goldman illustrates how American women have asserted their ethnic identities and made their voices heard over and sometimes against the interests of publishers editors and readers While the dominant culture has interpreted works of ethnic literature as representative of a
