Martin-Vide,Victor Mitrana,2004-11-23 The conventional wisdom was that biology influenced mathematics and computer science But a new approach has taken hold that of transferring methods and tools from computer science to biology The reverse trend is evident in Grammars and Automata for String Processing From Mathematics and Computer Science to Biology and Back The contributors address the structural syntactical view of the domain Mathematical linguistics and computer science can offer various tools for modeling complex macromolecules and for analyzing and simulating biological issues This collection is valuable for students and researchers in biology computer science and applied mathematics *The Shadow Boxer* Steven Heighton,2010-10-29 Steven Heighton is already recognized as one of the best writers to come to the fore in the nineties a winner of numerous literary awards whose work is widely translated In *The Shadow Boxer* he delivers a

stunning portrait of the artist in the tradition of such great tales as Jude the Obscure, Candide and even Don Quixote and gives literary life to the Northern Ontario landscape of the Soo and the demanding muscular life of Lake Superior where giant ore barges make their way over the grave of The Edmund Fitzgerald. Intricately patterned and multi layered this is the story of Seigne Torrins poet and boxer who sets off into the world to make it and whose romantic and professional misadventures take him as far as Egypt before he finds his way back to the Great Lakes. But the classic writerly dream that Seigne pursues turns out in practice to have a different and darker reality than any he had foreseen. A passionate love story a gripping narrative. The Shadow Boxer is also about the power of dreams and regret. It heralds a major new Canadian novelist and a master storyteller.
