Carl,2020-02-27 September 4 476 A D marked the end of the Western Roman Empire After several centuries of prosperity Europe sank into chaos With Charlemagne a new dynamic begins that of a civilising reconstruction The Romanesque period is part of the rediscovery of this Roman Empire lost in memories but living on in the architectural testimonies of the cities and the countryside In art history Romanesque art refers to the period between the beginning of the 11th and the end of the 12th century This era was characterised by a great diversity of regional schools each practising their own unique style In architecture as well as in sculpture Romanesque art is marked by raw forms Through its rich iconography and captivating text this work endeavours to restore the importance of this art which is often overshadowed by the later Gothic style Gothic art is defined by the powerful architecture of the cathedrals of northern France It is a medieval art movement that evolved throughout Europe over 200 years Abandoning curved Roman forms the architects started using flying buttresses and pointed arches to open cathedrals to daylight A period of great economic and social change the Gothic era incorporated new iconography celebrating the Holy Mary a drastic contrast to the dismal themes of Roman times Full of rich changes in all of the various art forms architecture sculpture painting etc Gothic art paved the way for the Italian Renaissance and the International Gothic movement **Gothic Art** Michael Camille,1996 When we look at the soaring

spaces of Chartres cathedral or the shimmering pages of a gilded and painted manuscript we are witnesses to a new kind of vision In this radical reappraisal of Gothic art in Europe the word Gothic describes not only an art style but a changing concept of space time and society a new kind of perception both visual and spiritual in which light is of central importance Camille shows us how the art of the thirteenth and fourteenth centuries was seen in its own time and explores the way vision itself was understood In this age of glorious painting magnificent intricate architecture and sculpture and jewellike manuscript illumination art was an expression of religious passion and earthly power of public and private wealth of science and learning The new vision led to an explosion of brilliant images but had its grim side rarely noticed by art history the distorted representation of others like Jews heretics and lepers a new vision not only of the marvelous but also of the grotesque
