Food and the Novel in Nineteenth-Century America Mark McWilliams, 2012-06-16 Food and the Novel in Nineteenth Century America revolves around the 1840 presidential election when according to campaign slogans candidates were what they ate Skillfully deploying the rhetoric of republican simplicity the belief that plain dress food and manners were signs of virtue in the young republic William Henry Harrison defeated Martin Van Buren by aligning the incumbent with the European luxuries of *p t de foie gras* and *soupe la reine* while maintaining that he survived on raw beef without salt The effectiveness of such claims reflected not only the continuing appeal of the frontier and the relatively primitive nature of American cooking but also a rhetorical struggle to define how eating habits and culinary practices fit into ideas of the American character From this crucial mid century debate the book s argument reaches back to examine the formation of the myth of republican simplicity in revolutionary America and forward to the popularization of cosmopolitan sophistication during the Gilded Age Drawing heavily on cookbooks domestic manuals travel writing and the popular press this historical framework structures a discussion of ways novelists use food to locate characters within their fictional worlds evoking or contesting deeply held social beliefs about gender class and race In addition to mid century novelists like Hawthorne Melville Stowe and Warner the book examines popular and canonical novels by writers as diverse as Lydia Maria Child James Fenimore Cooper Susanna Rowson Catharine Sedgwick Mark Twain Edith Wharton and Harriet Wilson Some of these authors also wrote domestic manuals and cookbooks In addition McWilliams draws on a wide range of such work by William Alcott Catharine Beecher Eliza Leslie Fannie Merrit Farmer Maria Parloa and others

Changing the Food Game Lucas Simons,2017-09-08

By 2050 the world s population is estimated to grow to 10 billion To feed everyone we will have to double our food production to produce more food in the next 40 years than in the whole of the last 6 000 Changing the Food Game shows how our unsustainable food production system cannot support this growth In this prescient book Lucas Simons argues that the biggest challenge for our generation can only be solved by effective market transformation to achieve sustainable agriculture and food production Lucas Simons explains clearly how we have created a production and trading system that is inherently unsustainable But he also demonstrates that we have reason to be hopeful from a sustainability race in the cocoa industry to examples of market transformation taking place in palm oil timber and sugarcane production He also poses the question where next Provocative and eye opening Changing the Food Game uncovers the real story of how our food makes it on to our plates and presents a game changing solution to revolutionize the industry
