Handbook of the Logic of Argument and Inference R.H. Johnson, H.J. Ohlbach, Dov M. Gabbay, John Woods, 2002-09-11 The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume designed for the attention of senior undergraduates graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference After an introductory chapter the role of standard logics is surveyed in two chapters These chapters can serve as a mini course for interested readers in deductive and inductive logic or as a refresher Then follow two chapters of criticism one the internal critique and the other the empirical critique The first deals with objections to standard logics as theories of argument and inference arising from the research programme in philosophical logic The second canvasses criticisms arising from work in cognitive and

experimental psychology The next five chapters deal with developments in dialogue logic interrogative logic informal logic probability logic and artificial intelligence The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments Taken as a whole the Handbook is a single volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best Future editions will periodically incorporate significant new developments

Defending Qualitative Research Mario Cardano,2020-02-20 Focussing on the phases of qualitative research which precede and follow fieldwork design analysis and textualization this book offers new theoretical tools to tackle one of the most common criticisms advanced against qualitative research its presumed lack of rigour Rejecting the notion of rigour as formulated in quantitative research and based on the theory of probability it proposes a theoretical frame that allows combining the goals of rigour and that of creativity through the reference to theory of argumentation As such it will appeal to scholars and students across the social sciences with interests in qualitative research methods

Network Theory with Genre Studies Race revolution and Daoism come up along the way and the empirical recalcitrance of the moon This collection serves as a textbook for graduate and advanced undergraduate courses in science studies and is an invaluable resource for researchers concerned with science not as a special autonomous sacrosanct enterprise but as a set of value saturated profoundly influential rhetorical practices

17N's Philosophy of Terror Ioanne K. Lekea,2014-02-10 This book uses a cross disciplinary approach to examine the creation development ideology and practice of the Marxist terrorist group 17N Were the members of 17N individuals with high moral principles as they claimed who did their best to protect the civilians who happened to be within their field of operations Or were they simply violent guerillas who prioritized successful assassinations of their targets at any cost The textual analysis of this book addresses these questions and studies 17N from inception to the time when its members were arrested providing a uniquely thorough examination of the organization manifestos and its correlation to the group s ideology and actual practices 17N s Philosophy of Terror An Analysis of the 17 November Revolutionary Organization first outlines the political and ideological framework of 17 and then describes their terrorist strategy and tactics The authors consider these operations in the context of the manifestos that followed the terrorist acts and conclude the work by addressing the events following the apprehension of 17N members the trial the verdicts the appeal trial and the conclusion of appeal trial

Rhetorical Argumentation Christopher W. Tindale,2004-05-27 The study of argumentation has primarily focused on logical and dialectical approaches with minimal attention given to the rhetorical facets of argument *Rhetorical Argumentation Principles of Theory and Practice* approaches argumentation from a rhetorical point of view and demonstrates how logical and dialectical considerations depend on the rhetorical features of the argumentative situation Throughout this text author Christopher W Tindale identifies how argumentation as a communicative practice can best be understood by its rhetorical features

Certainty-uncertainty - and the Attitudinal Space in Between Sibilla Cantarini,Werner Abraham,Elisabeth Leiss,2014-11-15 The selected papers of this volume cover five main topics namely Certainty The conceptual differential Un Certainty as attitudinality Dialogical exchange and speech acts Onomasiology and Applications in exegesis and religious discourse By examining the general theme of the communication of certainty and uncertainty from different scientific fields theoretical approaches and perspectives this compendium of state of the art research papers provides both an interdisciplinary comparison of the latest investigations methods and findings and new advances and theoretical insights with a common focus on human communication

The Ethics of Argumentation Katharina Stevens,2025-08-22 This book offers a new approach to the theory of argumentation that conceptualizes argumentation as a fundamentally ethical activity whose norms are grounded in and must be selected according to moral reasons Current normative approaches to argumentation do not treat ethics as an integral part of argumentation theory This is at least in part due to a methodological commitment not to address internal states of the arguers such as intentions and beliefs which makes moral theorizing about argumentation difficult This book presents three arguments for why ethics ought

to be a central element in normative theorizing about argumentation Through these arguments it shows first that ethics is needed for providing normative argumentation theory with its foundation and for offering arguers reliable guidance for decision making both about which norms ought to govern their arguing and how they should shape each argument they make Second it addresses some of the most persistent problems faced by currently dominant normative approaches to argumentation most notably that they are only reliable under the assumption that unrealistic background conditions are fulfilled Finally it provides the groundwork for a systematic ethics of argumentation It does so by showing how a function of argumentation can be justified via moral reasons and by providing the outlines for both an applied ethics of meta level normative argument design and an applied role ethics of object level arguing The Ethics of Argumentation is essential reading for researchers and graduate students in a wide range of disciplines including philosophy communication studies linguistics and rhetoric who are interested in communication deliberation argumentation critical thinking and social epistemology

Rhetorical Style Jeanne Fahnestock, 2011-10-12 A comprehensive guide to the language of argument Rhetorical Style offers a renewed appreciation of the persuasive power of the English language Drawing on key texts from the rhetorical tradition as well as on newer approaches from linguistics and literary stylistics Fahnestock demonstrates how word choice sentence form and passage construction can combine to create effective spoken and written arguments With examples from political speeches non fiction works and newspaper reports Rhetorical Style surveys the arguer's options at the word sentence interactive and passage levels and illustrates the enduring usefulness of rhetorical stylistics in analyzing and constructing arguments

Topical Themes in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2012-05-05 Topical Themes in Argumentation Theory brings together twenty exploratory studies on important subjects of research in contemporary argumentation theory The essays are based on papers that were presented at the 7th Conference of the International Society for the Study of Argumentation ISSA in Amsterdam in June 2010 They give an impression of the nature and the variety of the kind of research that has recently been carried out in the study of argumentation The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative

discourse The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse Argumentation Machines C. Reed,T.J. Norman,2013-03-09 In the late 1990s AI witnessed an increasing use of the term argumentation within its bounds in natural language processing in user interface design in logic programming and nonmonotonic reasoning in AI's interface with the legal community and in the newly emerging field of multi agent systems It seemed to me that many of these uses of argumentation were inspired by of ten inspired guesswork and that a great majority of the AI community were unaware that there was a maturing rich field of research in Argumentation Theory and Critical Thinking and Informal Logic that had been steadily re building a scholarly approach to the area over the previous twenty years or so Argumentation Theory on its side was developing theories and approaches that many in the field felt could have a role more widely in research and society but were for the most part unaware that AI was one of the best candidates for such application Integrating the Human Sciences Rick Szostak,2022-11-15 What if we recognized that the human sciences collectively investigate a few dozen key phenomena that interact with each other Can we imagine a human science that would seek to stitch its understandings of this system of phenomena into a coherent whole If so what would that look like This book argues that we are unlikely to develop one unified theory of everything Our collective understanding must then be a map of the myriad relationships within this large but finite and manageable system coupled with detailed understandings of each causal link and of important subsystems The book outlines such a map and shows that the pursuit of coherence and a more successful human science enterprise requires integration recognizing the strengths and weaknesses of different methods and theory types and the pursuit of terminological and presentational clarity It explores how these inter connected goals can be achieved in research teaching library classification public policy and university administration These suggestions are congruent with and yet enhance other projects for reform of the human sciences This volume is aimed at any scholar or student who seeks to comprehend how what they study fits within a broader understanding
