From Red Tape to Results National Performance Review (U.S.), Albert Gore, Al Gore, 1993 From Red Tape to Results National Performance Review (U.S.), 1993 **The Gore Report on Reinventing Government** Al Gore, National Performance Review (U.S.), 1993 Dilemmas of Scale in America's Federal Democracy Martha Derthick, 1999-06-13 Nationalist and local traditions vie within the American federal system and the American experiment with self government Bringing together contributions from history political science and sociology this book focuses primarily on the local seeking to recapture its origins explain its current impact and assess its worth **Downsizing the Federal Government** Vernon D Jones, 2016-07-01 The main focus of downsizing has shifted from the private to the public sector The cutbacks began in the Department of Defense Now the goal is a federal civilian workforce reduction of 12 percent by the year 2000 This pioneering study looks at the management of workforce reductions in the public sector both in theory and in practice Three case studies of the Defense Logistics Agency the Bureau of Reclamation and the Food and Drug Administration illustrate the organizational managerial and human dimensions of attempting to improve performance with reduced resources The author draws on extensive interviews with senior executives and middle managers in the three agencies at the General Accounting Office the Office of Personnel Management and the National Performance Review the Senior Executives Association and the Federal Managers Association and scholars and researchers In a larger sense this work pushes the boundaries of knowledge concerning organizational change and makes a significant contribution to organization theory It offers important new insights not only for public sector managers but for organization theorists and management specialists whose work on downsizing has been presumed but not shown to be applicable to the public sector **Federal Quality News** , 1993

Police Psychology Into the 21st Century Martin I. Kurke, Ellen M. Scrivner, 2013-04-15 As we approach the 21st century there is a discernable shift in policing from an incident driven perspective to a proactive problem solving stance often described as community policing In this volume a panel of 21 psychologists examine the changing directions in policing and how such changes impact on psychological service delivery and operational support to law enforcement agencies The book describes existing and emerging means of providing psychological support to the law enforcement community in response to police needs to accommodate new technology community oriented problem solving technology crime prevention and sensitivity to community social changes Senior psychologists who are sworn officers federal agents and civilian employees of federal state and local law enforcement agencies comprise the team of chapter authors Their perspectives encompass their collective experience in the trenches and in law enforcement management and administrative support roles They discuss traditional applications of psychology to police selection training and promotion processes and in trauma stress management and evaluation of fitness for duty Concerns related to police diversity and police family issues are also addressed as are unique aspects of police stress management Additional chapters are dedicated to establishing psychological service functions

that currently are less familiar to police agencies than they are to other government and private sector service recipients. These chapters are devoted to police psychologists as human resource professionals as human factors experts in accommodating to new technology and to new legal requirements as organizational behavioral experts and as strategic planners. This text is recommended reading for two groups: police and public safety administrators whose work takes them or should take them into contact with police psychologists practicing and would be police psychologists concerned with the emerging trends in the application of psychology to police and other public safety programs.

The Keys to Power Shirley Anne Warshaw, 2015-09-25. An accessible and comprehensive main text for courses on the presidency, this text argues that to be a successful presidential leader one must effectively manage the enormous institutional and personal resources or the keys to power. Using the keys to power theme, Warshaw argues that the presidency is far more powerful today than in past generations. The book offers the most coverage in the market on the structures that provide the president with such power. As a result, there are discrete chapters dedicated to the vice president, the president's cabinet, the White House staff, and the executive office of the President. Standard topics such as the president and the economy are still covered but are integrated throughout the chapters.

Degrees of Freedom Keith G. Banting, George Hoberg, Richard Simeon, 1997. The book's primary aim is to determine whether Canada and the United States have become more similar as their economies have become more integrated and their societies more diverse. The authors conclude that although powerful economic and social pressures clearly constrain national governments and lead to convergence in some areas, distinctive cultural and political processes preserve room for distinctive national responses to important problems of the late twentieth century. Authors include Keith Banting (University of Alberta), Marsha Chandler (University of Toronto), George Hoberg (University of Toronto), Christopher Manfredi (McGill University), George Perlin (Queen's University), Douglas Purvis (Queen's University), Richard Simeon, and Elaine Willis (consultant, Toronto).

The Ground Truth John Farmer, 2009-09-08. From the senior counsel to the 9/11 Commission, a mesmerizing real-time portrayal of that day, why we weren't told the truth, and why our nation is still at risk. As one of the primary authors of the 9/11 Commission Report, John Farmer is proud of his and his colleagues' work. Yet he came away from the experience convinced that there was a further story to be told, one he was uniquely qualified to write. Now that story can be told. Tape recordings, transcripts, and contemporaneous records that had been classified have since been declassified, and the inspector general's investigations of government conduct have been completed. Drawing on his knowledge of those sources as well as his years as an attorney in public and private practice, Farmer reconstructs the truth of what happened on that fateful day and the disastrous circumstances that allowed it: the institutionalized disconnect between what those on the ground knew and what those in power did. He details terrifyingly and illuminatingly the key moments in the years, months, weeks, and days that preceded the attacks, then descends almost in real time through the attacks themselves, portraying them as they have never before been seen. Ultimately, Farmer builds the

inescapably convincing case that the official version not only is almost entirely untrue but serves to create a false impression of order and security The ground truth that Farmer captures suggests a very different scenario one that is doomed to be repeated unless the systemic failures he reveals are confronted and remedied [FCC Record](#) United States. Congress,1994 [China, the West and the Myth of New Public Management](#) Paolo Urio,2012-07-26 In the West innovations in new public management NPM have been regarded as part of the neoliberal project whilst in China these reforms have emerged from a very different economic and social landscape Despite these differences however similar measures to those introduced in the West have been adopted by the Chinese state which has largely abandoned the planned economy and adopted market mechanisms in the pursuit of improved economic efficiency and growth Evaluating the results of these reforms in both China and the West between 1978 and 2011 this book shows that despite substantial improvements in economic efficiency in both cases under consideration there have been considerable negative impacts on the distribution of wealth access to public services levels of poverty public health and the incidence of crime Further this book explores the different results of NPM in China and the

West and the conclusions Paolo Urrio draws have timely significance as he suggests that China has been able to change its policies more rapidly and thus more effectively respond to the challenges posed by the current economic crisis Drawing on both Western and Chinese sources this innovative book compares the consequences of their public management reforms taking into account the impact on both the economy and society As such this book will be of great interest to students and scholars working in the fields of Chinese studies Asian studies business economics strategic public management and comparative studies in capitalism and socialism

The Obama Political Appointee Primer Lewis D. Eigen, 2008 The Obama administration will appoint 10 thousand New Federal Appointees outside of the Civil Service Most of these new appointees regardless of qualifications will have had very little or no experience in the Federal environment with its peculiarities A Federal veteran has produced a breezy humorous but serious primer of much of what these appointees will face and how they can avoid the many pitfalls into which so many new appointees fall For the citizen this is an inside story of how the bureaucracy really operates President Obama and his cabinet will depend on these appointees to implement their policies and programs and this book explains how they do or do not succeed

The State of the Cities, 1998 **The State of the Cities, 1998**, 1998 **Handbook of Public Administration Reform** Shaun F. Goldfinch, 2023-11-03 Reform is a politicized ideological sometimes drifting and chaotic process As such what public administration reform means why it occurs whose interests it serves and whether it makes the world a better place remain contested Addressing these questions this major comparative study sheds new light on existing and emerging issues in the field of public administration reform

Building the Virtual State Jane E. Fountain, 2004-05-28 The benefits of using technology to remake government seem almost infinite The promise of such programs as user friendly virtual agencies and portals where citizens can access all sections of government from a single website has excited international attention The potential of a digital state cannot be realized however unless the rigid structures of the contemporary bureaucratic state change along with the times Building the Virtual State explains how the American public sector must evolve and adapt to exploit the possibilities of digital governance fully and fairly The book finds that many issues involved in integrating technology and government have not been adequately debated or even recognized Drawing from a rich collection of case studies the book argues that the real challenges lie not in achieving the technical capability of creating a government on the web but rather in overcoming the entrenched organizational and political divisions within the state Questions such as who pays for new government websites which agencies will maintain the sites and who will ensure that the privacy of citizens is respected reveal the extraordinary obstacles that confront efforts to create a virtual state These political and structural battles will influence not only how the American state will be remade in the Information Age but also who will be the winners and losers in a digital society
