A History of the World in 100 Animals Simon Barnes, 2022-05-03 Fully illustrated in color a fascinating exploration of the one hundred animals that have had the most profound influence on humanity throughout the ages We are not alone We are not alone on the planet We are not alone in the countryside We are not alone in cities We are not alone in our homes We are humans and we love the idea of our uniqueness But the fact is that we humans are as much members of the animal kingdom as the cats and dogs we surround ourselves with the cows and the fish we eat and the bees who pollinate so many of our food plants In *The History of the World in 100 Animals* award winning author Simon Barnes selects the one hundred animals who have had the greatest impact on humanity and on whom humanity has had the greatest effect He shows how we have domesticated animals for food and for transport and how animals powered agriculture making civilisation possible A species of flea came close to destroying human civilisation in Europe while the slaughter of a species of bovines was used to create one civilisation and destroy another He explains how pigeons made possible the biggest single breakthrough in the history of human thought In short he charts the close relationship between humans and animals finding examples from around the planet that bring the story of life on earth vividly to life with great insight and understanding The heresy of human uniqueness has led us across the millennia along the path of destruction This book beautifully illustrated throughout helps us to understand our place in the world better so that we might do a better job of looking after it That might save the polar bears the modern emblem of impending loss and destruction It might even save ourselves
