

20th Century Perspectives Religious Language Essay plan

- whether or not any version of the verification principle successfully renders religious language as meaningless
- whether or not any participant in the falsification symposium presented a convincing approach to the understanding of religious language
- a comparison of the ideas of Aquinas and Wittgenstein, including:
 - whether a cognitive approach (such as Aquinas's thinking on analogy) or a non-cognitive approach (such as the language games concept of Wittgenstein) present better ways of making sense of religious language
 - the influence of non-cognitive approaches on the interpretation of religious texts o how far Aquinas' analogical view of theological language remains valuable in philosophy of religion

Introduction:

- Cognitive= statements about God that can be known to be either true or false
- Non-Cognitive= statements about God are not subject to truth or falsity

P1: The Verification Principle (COGNITIVE)

- Logical positivism (1920's -30's)- study and analyse the use of language
 - o Taken up by Vienna Circle- only synthetic (empirical) and analytic (tautological) statement= meaningful THUS verifiable! **Cognitive**
 - o Religious statements are meaningless as they cannot be verified (neither analytic not synthetic)
 - o GOOD- opened new branch where philosophers scrutinise arguments more thoroughly as empirically verified thus useful for self-examination of statements
- NEVERTHELESS misguided: principle= too strong- cannot satisfy everyone as common sense statements are seemingly unverifiable
 - o Ayer: **"all ravens are black"**- impossible to empirically check
