framework and tool not only for the learning and practicing of internal medicine after graduation from professional schools and during training but after residency training as well. The majority of the notes were presented as one to a few sentences rendering the information succinct and easy to digest. The notes also provide simple key information in patient care including but not limited to the workup and management of a wide range of clinical scenarios. The book was divided into three general areas: 1 daily notes taken during the author's residency training in the format of a diary with the original dates but updated knowledge and information; 2 notes for outpatient medicine and clinical subspecialties; and 3 notes as a hospitalist. The daily notes were based on knowledge and experiences the author learned from actual clinical cases, workup, medication regimen, patient education, and sometimes patient and family interactions. The notes for outpatient medicine and clinical subspecialties were based on specific topics, subspecialties, and were heavily clinically oriented with a focus on patient care. The addition of notes as a hospitalist was based on the author's duties as a hospitalist which requires knowledge and understanding of acute neurological and neurosurgical issues, various types of cancers, and some common yet complicated or uncommon clinical scenarios of infectious diseases. A major contribution to the internal medicine education literature.

This book is geared toward cardiologists, trainees, and housestaff anyone who rotates or practices in the CCU who must grasp the subtleties when treating patients in a cardiac care unit. It is organized in a way to help you understand the simplified pathophysiology of the disease, the diagnosis, modalities, the initial critical care management in the CCU, the clinical care in a step down unit, and plan for discharge therapy. Dr. Herzog has developed unified pathways for the management of patients presenting with acute chest pain or its equivalent, acute heart failure, atrial fibrillation and flutter, syncope, cardiac arrest, hypertension, and hyperglycemia. Algorithms and pathways for management are provided in each chapter for easy implementation in any health care system. In addition, because specialized units are frightening to the patients and their families, there is a section in each chapter on what the patient and family need to know that encompasses a capsulated explanation of the condition and treatment management.
