Hojas selectas, 1916 Cosmopolitanism in Mexican Visual Culture María Fernández, 2013-12-15 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation state Accordingly Fernández presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fernández organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity

Memoria sobre diversos proyectos de creación de nuevos caminos, paseos en Madrid y en sus inmediaciones J. Giraud Dagouillon, 1862 *Cultura y proyecto en los inicios de la modernidad europea. Los despliegues del Clasicismo en los siglos XV y XVI* Luis Del Valle, 2023-03-16 La cultura del Humanismo y su

recuperación e invención del Clasicismo se ubican en el centro de lo que sería uno de los tantos inicios de la Modernidad en Occidente. Una recuperación e invención que habrá de postularse como una gigantesca operación ideológica cultural pero que a la vez presenta las componentes de una complejidad y una densidad plenas las cuales contrastan con aquellas visiones canónicas de un orden cronológico y estilístico. La recuperación e invención clasicista pondrá de relieve las características de una superestructura ideológica y cultural que excede e interpela aquellas meras formulaciones estilísticas. Los mestizajes los entrecruzamientos los sincretismos las ambigüedades y ambivalencias junto con los anacronismos implican otra interpelación aquella ejercida contra la idea de un origen y contra la idea de la historia como una determinación de categorías claramente establecidas y diferenciadas. Las problemáticas de la forma y de la organización del lenguaje las articulaciones entre norma y variación el lugar del experimentalismo la relación con la Naturaleza el lugar de la ciudad o las relaciones entre forma y significado se despliegan en su relación profunda con un modo de producción cultural que actúa entre la legitimación y la interpelación entre la vocación de construcción de un código y su desestabilización. Visto como una producción proveniente desde el propio conocimiento disciplinar y de sus articulaciones con lo cultural el trabajo no solo implica una mirada sobre y desde la historia sino también la posibilidad de volver a pensar las problemáticas del proyecto y de la arquitectura.
