Organized around a series of interviews with computer programmers librarians and salespeople the book discusses developments from the late 1970s to the mid 1990s focusing on the 1980s when both ILS and the mini computer were dominant It documents the time when a small group of computing vendors joined with large libraries around the world to perfect systems that automated functions such as circulation acquisitions cataloging and online public access catalogs A concluding chapter contributed by Louise O'Neill brings the story up to date with a discussion of current developments in library automation including the adoption of open source systems open access principles and the Semantic Web

Contemporary Introduction to Sociology Jeffrey C. Alexander, Kenneth Thompson, Laura Desfor Edles, 2016-01-08 The first edition of A Contemporary Introduction to Sociology was the first truly new introductory sociology textbook in decades Written by two leading sociologists at the cutting edge of theory and research the text reflected the idioms and interests of contemporary American life and global social issues The second edition continues to invite students to reflect upon their lives within the context of the combustible leap from modern to postmodern life The authors show how culture is central to understanding many world problems as they challenge readers to confront the risks and potentialities of a postmodern era in which the futures of both the physical and social environment seem uncertain As culture rapidly changes in the 21st century the authors have broadened their analysis to cover developments in social media and new data on gender and transgender issues
