Dan Remenyi,Michael Sherwood-Smith,2012-05-16 Frequently not enough attention is given to producing a comprehensive business case or to producing an economic justification for an information systems investment In fact many organizations are not clear as to what constitutes a sound business case and how to go about producing one This Professional level book for the Computer Weekly Professional Series will show how to go about justification for I T spend This book is designed for all those who are involved in the decision to invest in information systems This book is especially relevant to senior business executives senior financial managers and IT executives Business consultants computer and corporate advisors will also find the ideas and material addressed in this text of particular benefit as will anyone involved in corporate and strategic planning In addition senior students such as those working towards their MBAs will find this book of use A business case is a statement or a series of statements that demonstrate the economic value of a particular intervention a course of action or a specific investment A business case is not simply a financial forecast of the hardware and software costs and the expected benefits A business case for an information systems investment involves a comprehensive understanding of both the likely resources as well as the business drivers which will assist business managers improve their performance and thereby obtain a stream of benefits from

the investment In general there are approximately six steps in producing a business case for an information systems investment

- 1 Determine the high level business outcomes that will be clearly and comprehensively expressed as a set of opportunities the organization can take advantage of or problems that need to be rectified
- 2 Identify the corporate critical success factors that will be supported or enhanced by the operation of the completed information systems project or investment
- 3 Create a list of specific and detailed outcomes or benefits their appropriate metrics measuring methods and responsibility points that are represented by the stakeholders
- 4 Quantify the contribution made by the outcomes which requires associating numbers or benefit values with outcomes where this is possible
- 5 Highlight the risks associated with the project

Fundamental to this new approach to developing a business case for information systems investment is the fact that it incorporates much more than the financial numbers which are typically found in the standard approach to a feasibility study This approach looks behind the financial numbers to the improvements in business performance which are facilitated by information systems and which are the real drivers of the benefits Furthermore this approach to developing a business case allows the organization to manage the process so that the required results are achieved

Research Programs National Research Council, Institute of Medicine, Committee for the Review of NIOSH Research Programs, 2009-12-12 Each year approximately 5 000 fatal work related injuries and 4 million non fatal injuries and illnesses occur in the United States This number represents both unnecessary human suffering and high economic costs In order to assist in better evaluating workplace safety and create safer work environments the Institute of Medicine conducted a series of evaluations of the National Institute for Occupational Safety and Health NIOSH research programs assessing the relevance and impact of NIOSH's work on improving worker safety and health

"Proof," Policy, and Practice Paul E. Lingenfelter, 2023-07-03 How can we fix our schools Improve graduation rates in college What works These are questions that make the headlines and vex policy makers practitioners and educational researchers While they strive to improve society there are frequently gulfs of mutual incomprehension among them Academics longing for more influence may wrongly fault irrationality ideology or ignorance for the failure of research to inform policy and practice more powerfully Policy makers and practitioners may doubt that academics can deliver ideas that will reliably yield desirable results This book bridges the divide It argues that unrealistic expectations lead to both unproductive research and impossible standards for evidence based policy and practice and it offers promising ways for evidence to contribute to improvement It analyzes the utility and limitations of the different research methods that have been applied to policy and practice as well as the strengths and weaknesses of educational reform strategies It explains why using evidence for accountability often makes things worse rather than better Paul Lingenfelter offers educational researchers and policy makers a framework for considering such questions as What problems are important and accessible What methods will be fruitful Which help policy makers and practitioners make choices and learn how to improve What information is relevant What knowledge is valid and useful How can policy makers and practitioners establish a more productive division of labor based on their respective capabilities and limitations He cautions against the illusion that straight forward scientific approaches and data can be successfully applied to society's most complex problems While explaining why no single policy or intervention can solve complex problems he concludes that determination measurement analysis and adaptation based on evidence in specific situations can lead to significant improvement This positive even handed introduction to the use of research for problem solving concludes by suggesting

emerging practices and approaches that can help scholars practitioners and policy leaders become more successful in reaching their fundamental goals *The SAGE Handbook of Evaluation* Ian Shaw,Ian Graham Ronald Shaw,Jennifer C Greene,Melvin M Mark,2006-07-27 In this comprehensive handbook an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people related programs policies and practices The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single accessible volume With contributions from world leading figures in their fields overseen by an eminent international editorial board this handbook is an extensive and user friendly resource

Problems Stewart I. Donaldson,Michael Scriven,2003-01-30 This book presents visions of how to solve social problems in the 21st century and how programs SHOULD be evaluated not how they will be evaluated *Evaluation for the Real World* Colin Palfrey,Paul Thomas,Ceri Phillips,2012-06-13 Evaluation research findings should be a key element of the policy making process yet in reality they are often disregarded This valuable book examines the development of evaluation and its impact on public policy by analysing evaluation frameworks and criteria which are available when evaluating public policies and services It further examines the nature of evidence and its use and non use by decision makers and assesses the work of

influential academics in the USA and UK in the context of evaluation and policy making The book emphasises the real world of decision makers in the public sector and recognises how political demands and economic pressures can affect the decisions of those who commission evaluation research while providing recommendations for policymakers on adopting a different approach to evaluation This is essential reading for under graduate and post graduate students of policy analysis and public sector management and those who are involved in the planning and evaluation of public policies and services

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co published by Routledge for the American Educational Research Association AERA Educational policy continues to be of major concern Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook Organized into seven sections the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and questions have oriented current policy research What research strategies and methods have proven most fruitful And what issues questions and methods will drive future policy research Topics such as early childhood education school choice access to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net>

Netherlands Annual Review of Military Studies 2015 Jörg Noll, Daan van den Wollenberg, Frans Osinga, Georg Frerks, Irene van Kemenade, 2015-07-27 This book seeks to bridge the gap between academic political and military thinking concerning the success and failure of peacekeeping operations and their termination Exit strategies have recently gained attention in political military academic and public debates due to the Western engagement in international and intrastate conflicts since the end of the Cold War Yet many of those debates took place separately This volume which is predominantly a joint product of academics and the military of the Faculty of Military Sciences of the Netherlands Defence Academy shows new venues by bridging the putative political military divide Drawing on theory empirics and personal experiences the authors address exits at political strategic operational and tactical levels of current and past military missions and interventions ranging from decolonisation wars to Afghanistan and Iraq Although

some of those conflicts are still ongoing valid inferences can be drawn An important one is that exit forms a problem for those who leave and for those who stay While political and military objectives might not have been reached and many of those involved have the feeling that the job is still not yet done the termination of the entire mission or transitions at operational level necessitate both departures and handovers takeovers and are thereby characterised by discontinuities and continuities at the same time It is these dynamics between unfulfilled end states and end dates that in the end lead to the dilemma of leaving All the editors except van den Wollenberg are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda the Netherlands J rg Noll is Associate Professor of International Conflict Studies First Lieutenant Air Commodore Frans Osinga is Professor of Military Operational Art and Sciences Georg Frerks is Professor International Security Studies and Irene van Kemenade runs the Research Office of the Faculty Daan van den Wollenberg is Commander of a mechanized artillery platoon of the Netherlands armed forces
