Snider,2009 This essay offers a proposal for the missing constructs and language with which we can more precisely think about and examine the Army s Professional Military Ethic starting with its macro context which is the profession s culture We examine three major long term influences on that culture and its core ethos thus describing how they evolve over time We contend that in the present era of persistent conflict we are witnessing dynamic changes within these three influences In order to analyze these changes we introduce a more detailed framework which divides the Ethic into its legal and moral components then divide each of these into their institutional and individual manifestations Turning from description to analysis we also examine to what extent if any recent doctrinal adaptations by the Army FM 3 0 3 24 and 6 22 etc indicate true evolution in the essential nature of the profession s Ethic Then we present what we believe to be the most significant ethical challenge facing the Army profession the moral development of Army leaders moving them from values to virtues in order that they as Army professionals can consistently achieve the high quality of moral character necessary to apply effectively and in a trustworthy manner their renowned military technical competencies P x **Routledge Handbook of**
