provides the foundational knowledge you need to avoid the most common pitfalls and build a portfolio in today's roller coaster world of investing. Retired neurologist and master investor William J. Bernstein has seen it all throughout his career. Buying investments with borrowed money. Chasing past performance. Overestimating one's own risk tolerance. Listening to cable news. These are just a few of the many mistakes he has witnessed smart serious investors make to the peril of their portfolios. Add to these behavioral errors such economic factors as deflation, sudden stock declines, soaring inflation, and the like, and investing can seem like something to be avoided at all costs. But with the right discipline and knowledge, you can build and manage an impressive portfolio. It all comes down to understanding four key pillars: Theory, Risk, and Return go hand in hand; you can't make money without risk. History: Understand past markets to understand today's markets. Psychology: Avoid the most common behavioral mistakes that tank portfolios. Business: The cost of investment services can be high, unreasonably high. After taking you on a deep dive into each of these topics, Bernstein walks you through the process of designing and maintaining a powerful portfolio. Times have changed. Economies have changed. And markets are ever changing. But sound investing principles haven't changed. Use *The Four Pillars of Investing* to stay a step ahead of your investing peers and build a portfolio to be proud of.
