Meaning in Mid-Life Transitions Edmund A. Sherman, Professor Edmund Sherman, 1987-01-01 This book contributes to an understanding of the nature of mid life transitions and crises by focusing on the unique personal meaning of the transitional experience for the individual There is an implicit structure to the way in which such a transition is experienced by the individual and this can be made explicit by the techniques and methods of the approach outlined and illustrated in the book The value of making this structure explicit is that it enables us to understand and assess the nature and dimensions of the transition whether or not it will reach crisis proportions and to assess possible intervention strategies

Meaning in Mid Life Transitions should be of interest to human service practitioners as well as teachers and students of human development and behavior It evidences an integrative approach and structural framework including a series of in depth clinical and research studies

Child Influences on Marital and Family Interaction Richard M Lerner, Graham B. Spanier, 2013-10-22 *Child Influences on Marital and Family Interaction* A Life Span Perspective book grew out of a conference sponsored by the Division of Individual and Family Studies in the College of Human Development at the Pennsylvania State University in April 1977 The chapters for this volume are revised versions of the papers originally presented at the conference The book explores the conceptual methodological and empirical issues in the study of the child and his or her family It details how the age normative and atypical development of the child contributes to the parents marital quality and to the entire family s interaction patterns across the life span of both the child and parents Consequently the child is seen as capable of contributing to marriage and family relationships not only when he or she is in utero a neonate or an infant but also when the child reaches middle and late childhood adolescence and the adulthood and aged years as well
