Fourth International Conference on the Software Process ,1996 **Proceedings of the Fourth International Conference on the Software Process** International Software Process Association,1996 Software Process: Principles, Methodology, and Technology Jean-Claude Derniame,Badara A. Kaba,David Wastell,2006-08-18 1 Jean Claude Derniame

Software process technology is an emerging and strategic area that has already reached a reasonable degree of maturity delivering products and significant industrial experiences This technology aims at supporting the software production process by providing the means to model analyse improve measure and whenever it is reasonable and convenient to automate software production activities In recent years this technology has proved to be effective in the support of many business activities not directly related to software production but relying heavily on the concept of process i e all the applications traditionally associated with workflow management This book concentrates on the core technology of software processes its principles and concepts as well as the technical aspect of software process support The contributions to this book are the collective work of the Promoter 2 European Working Group This grouping of 13 academic and 3 industrial partners is the successor of Promoter a working group responsible for creating a European software process community Promoter 2 aims at exploiting this emerging community to collectively develop remaining open issues to coordinate activities and to assist in the dissemination of results The title Software Process Modelling and Technology Fink94 was produced during Promoter 1 Being project based it presented the main findings and proposals of the different projects then being undertaken by the partners **Software Evolution and Feedback** Nazim H. Madhavji,Juan Fernandez-Ramil,Dewayne Perry,2006-08-30 Evolution of software has long been recognized as one of the most problematic and challenging areas in the field of software engineering as evidenced by the high often up to 60 80% life cycle costs attributed to this activity over the life of a software system Studies of software evolution are central to the understanding and practice of software development Yet it has received relatively little attention in the field of software engineering This book focuses on topics aimed at giving a scientific insight into the aspect of software evolution and feedback In summary the book covers conceptual phenomenological empirical technological and theoretical aspects of the field of software evolution with contributions from the leading experts This book delivers an up to date scientific understanding of what software evolution is to show why it is inevitable for real world applications and it demonstrates the role of feedback in software development and maintenance The book also addresses some of the phenomenological and technological underpinnings and includes rules and guidelines for increased software evolvability and in general sustainability of the evolution process Software Evolution and Feedback provides a long overdue scientific focus on software evolution and the role of feedback in the software process making this the indispensable guide for all software practitioners researchers and managers in the software industry American Book Publishing Record ,1997-09 *Advances in Computers* Marvin Zelkowitz,2003-08-19 Since 1960 Advances in Computers has

chronicled the constantly shifting theories and methods of Information Technology which greatly shapes our lives today This volume the 59th in the series presents two general themes The first 4 papers discuss tool use in developing software how groups work together to produce a product and why the very industries that need them often do NOT adopt such tools The fifth paper addresses a current hardware issue cache coherence As we build faster machines a way to increase performance is to have multiple CPUs working on solving the same problem This requires two or more CPUs to address the same memory at the same time The cache coherence problem is how to allow both machines to access the same memory without stepping on each others toes so that memory gets lost or corrupted In depth surveys and tutorials on new computer technology Well known authors and researchers in the field Broad overview of many important developments Extensive bibliographies with most chapters Four out of 5 chapters focus on software development technology and should appeal to a software development organization or a university course on software development practices

27th EUROMICRO Conference, 2001 Annotation This proceedings volume contains the papers given by international researchers at the 27th Euromicro conference held in Warsaw in 2001 The conference featured workshops on multimedia and telecommunications software process and product improvement and component based software engineering A sampling of topics includes components for real time systems software reliability network protocols and audio video processing management The volume is not indexed c
