Burrison,2007 Roots of a Region reveals the importance of folk traditions in shaping and expressing the American South This overview covers the entire region and all forms of expression oral musical customary and material The author establishes how folklore pervades and reflects the region s economics history especially the Civil War race relations religion and politics He follows with a catalog of those folk cultural traits from food and crafts to music and story that are distinctly southern The book then explores the Native American and Old World sources of southern folk culture Two case studies serve

as examples to students and as evidence of the author's larger points. The first traces the origins and development of an artifact type, the clay jug; the second examines a place, Georgia, and the relationship of its folklore to the region as a whole. The author concludes by looking to the future of folklife in a region that has lost much of its agrarian base as it modernizes, a future dependent on recent immigration and appreciation of older southern traditions by a largely urban audience. Supporting these explorations are 115 illustrations, sixteen in color, and an extensive bibliography of books on southern folk culture. John A. Burrison is Regents Professor of English and director of the folklore curriculum at Georgia State University. He also serves as curator of the Goizueta Folklife Gallery at the Atlanta History Museum and of the Folk Pottery Museum of Northeast Georgia at Sautee Nacoochee Center. His previous books are *Brothers in Clay: The Story of Georgia Folk Pottery*, *Storytellers: Folktales and Legends from the South*, and *Shaping Traditions: Folk Arts in a Changing South*. **Doing**

Cross-Cultural Research Pranee Liamputtong, 2008-07-31 Conducting cross-cultural research is rife with methodological, ethical, and moral challenges. Researchers are challenged with many issues in carrying out their research with people in cross-cultural arenas. In this book, I attempt to bring together salient issues for the conduct of culturally appropriate research. The task of undertaking cross-cultural research can present researchers with unique opportunities and yet dilemmas. The book will provide some thought-provoking points so that our research may proceed relatively well and yet ethically in our approach. The subject of the book is on the ethical, methodological, political understanding and practical procedures in undertaking cross-cultural research. The book will bring readers through a series of questions: Who am I working with? What ethical and moral considerations do I need to observe? How should I conduct the research which is culturally appropriate to the needs of people I am researching? How do I deal with language issues? How will I negotiate access? And what research methods should I apply to ensure a successful research process? The book is intended for postgraduate students who are undertaking research as part of their degrees. It is also intended for researchers who are working in cross-cultural studies and in poor nations.

Education and Society in Comparative Context Eija Kimonen, 2015-12-17 What was the interrelationship between education and society during the twentieth century in the United States and India? What is the essence of the historical development of educational policies and social systems in these two countries? What philosophical views and developmental courses underlie their outdoor-oriented education? What are their aims of outdoor-oriented education? What procedures are connected with their outdoor-oriented education? These questions are examined in this unique volume. This book is divided into three parts. The first part creates a context for the comparison of the issues concerning education and society. The central point of departure used here regards education as being closely related to the totality of culture and human activity. The dialectic process between education and society is realized differently in accordance with the value objectives that provide the background for different societies. This comparative educational study uses a historico-hermeneutical approach. The second part analyzes the social systems and educational policies of the United States and India following their

developmental trends and patterns The nature of the relationship between education and society for each country is further brought into focus when it is interpreted from the perspective of the philosophical views pedagogical aims and procedures of twentieth century outdoor oriented education The case studies provide an interesting insight into how changes in educational policy have been reflected in the every day pedagogical procedures used in schools in the United States and India The third part is an analysis and comparison of the phenomena previously presented that are related to education and society through the lenses suggested by sociological theories It compares the dimensions of the interrelationship between education and society from the standpoint of outdoor oriented education in the two countries during the twentieth century This thought provoking volume is intended for anybody interested in the interplay between education and society in all its complexity It offers a fascinating journey into the past and present of the issues that have defined the development of education and society in the United States and India
