Fractions Math Matters For Adults:

Math Matters for Adults Karen Lassiter, Steck-Vaughn Company, 1993 Mathematics Matters in Education Yeping Li, W. James Lewis, James J. Madden, 2017-10-03 This book is inspired by Roger E Howe's contributions to the international communities of mathematics and mathematics education. Renowned for his research contributions in the fields of representation theory, automorphic forms, harmonic analysis, and invariant theory, Dr. Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways. This volume will help summarize and highlight Howe's contributions to several topic areas in mathematics education, demonstrating the possibility and importance of engaging mathematicians in high impact research in mathematics education and showcasing the importance of cross disciplinary collaboration and exchange. Math Matters Clement B. G. London, Chuka P. B. Ejiofor, 2005-11-01 **Math Matters** Suzanne H. Chapin, Art Johnson, 2006 Shows teachers the why behind the procedures they teach in elementary math. Shaughnessy, 2010 This resource combines current research and practical strategies to support teachers in understanding and addressing the most common misconceptions that students have about fractions and presents opportunities to help students investigate, discuss, revise, expand, and refine their understanding of fractions. Includes reproducible bibliography and index. Teaching in the Standards-based Classroom, 2001 Virtually every national standards document, every state framework, and every local set of standards calls for fundamental changes in what and how teachers teach. The challenge for teachers is to implement the vision for mathematics and science classrooms called for in the standards. This issue describes that vision and suggests ways to use the standards mandated in your school to improve your practice to help you teach in your standards-based classroom. Making Mathematics Meaningful ? For Students in the Primary Grades Werner W. Liedtke,2010-02-04 **What Matters? Research Trends in International Comparative Studies in Mathematics Education** Ji-Won Son,Tad Watanabe,Jane-Jane Lo,2017-03-03

This book provides a unique international comparative perspective on diverse issues and practices in mathematics education between and among the US and five high performing TIMSS education systems Japan China Singapore South Korea and Taiwan The book offers multiple perspectives on the important factors that contribute to mathematics teaching and learning in different educational systems and cultural contexts Using large scale data generated by numerous international comparative studies the book analyzes and provides context for various methodological perspectives The book raises compelling questions and issues for mathematics education researchers leading to a critical examination of what can be learned from other education systems Authors address four major research perspectives by critically examining cross national similarities and differences such as research on the influence of curriculum on student learning research on institutional systems of mathematics teacher education research on improving teacher knowledge and pedagogical approaches and research using large scale data This collection of perspectives serves as a foundation for reviewing and analyzing the international comparative studies introduced in the book

Good Questions for Math Teaching Lainie Schuster,Nancy Canavan Anderson,2005 Good Questions or open ended questions promote students mathematical thinking understanding and proficiency By asking careful purposeful questions teachers create dynamic learning environments help students make sense of math and unravel misconceptions This valuable book includes a wide variety of good questions for classroom use and offers teachers tips on how to create open ended questions of their own

Researching Pedagogy and Practice with Canadian Mathematics Teachers David A Reid,Christine Suurtamm,Annie Savard,Elaine Simmt,Dominic Manuel,Lisa Lunney Borden,Richard Barwell,2020-06-01 The past two decades have seen an increased interest in education especially in core areas such as mathematics language and science This is in part a consequence of the increase in the number of international comparisons of educational outcomes such as PISA and TIMSS Much research has focused on the contributions that curricula financial resources parental support and so on might have on educational outcomes A factor that seems likely to have a very significant effect on student achievement teachers practices and beliefs has received little attention This book reports results from a research program that sought to develop and employ research methods to compare teachers practices and beliefs across Canada It provides insight into the challenge of such research and describes teachers contexts beliefs and practices and how they differ in four regions and across two languages Using a multivocal ethnography approach Tobin 1999 teachers were involved in the preparation and discussion of videos of their own teaching and that of

others This approach resulted in not only insights into the teachers pedagogies and practices but also opportunities for the teachers to reflect on their own teaching in new ways and for researchers to reflect on research practices and orientations The work is innovative in several ways In a field crowded with research on teachers practices beliefs and knowledge this research helps to unearth the implicit values that underlie the way teachers see teaching itself Through the process of observation of each other s practice the teachers became aware of their own pedagogies giving them new insights into their values and practices Researchers also engaged in a parallel process of reflection on their own practices as observers of teachers with similar insights into the values guiding their work This book will be of interest to government policy makers teachers and teacher educators as well as researchers in Mathematics Education Members of the AERA SIG in Research in Mathematics Education the Canadian Mathematics Education Study Group the NCTM and provincial Mathematics teacher associations are potential readers Praise for Researching Pedagogy and Practice with Canadian Mathematics Teachers What a treasure This book is an important resource for anyone interested in high quality mathematics teaching It fills a gap in our understanding of how mathematics is taught across Canada where students are among the highest performing on international mathematics assessments The studies reported are conceptually grounded methodologically rigorous and filled with nuanced observations of the similarity and variation in classroom teaching across many of the Canadian provinces Edward A Silver Senior Associate Dean for Research Graduate Studies William A Brownell Collegiate Professor of Education Professor of Mathematics University of Michigan
