Androids in the Enlightenment Adelheid Voskuhl, 2013-05-31 The eighteenth century saw the creation of a number of remarkable mechanical androids at least ten prominent automata were built between 1735 and 1810 by clockmakers court mechanics and other artisans from France Switzerland Austria and the German lands Designed to perform sophisticated activities such as writing drawing or music making these Enlightenment automata have attracted continuous critical attention from the time they were made to the present often as harbingers of the modern industrial age an era during which human bodies and souls supposedly became mechanized In *Androids in the Enlightenment* Adelheid Voskuhl investigates two such automata both depicting piano playing women These automata not only play music but also move their heads eyes and torsos to mimic a sentimental body technique of the eighteenth century musicians were expected to generate sentiments in themselves while playing then communicate them to the audience through bodily motions Voskuhl argues contrary to much

of the subsequent scholarly conversation that these automata were unique masterpieces that illustrated the sentimental culture of a civil society rather than expressions of anxiety about the mechanization of humans by industrial technology She demonstrates that only in a later age of industrial factory production did mechanical androids instill the fear that modern selves and societies had become indistinguishable from machines

independence eventually becoming a significant European power After tracing these developments the book continues by examining and comparing later nationalist insurgencies in the late twentieth and twenty first centuries It analyses and identifies the factors making for successful insurgencies The key factors of finances and international relations are emphasised This volume is informative and compelling reading for both practitioners and students studying history international relations terrorism and insurgency The Irish Brigade, 1670-1745 D. P. Graham,2019-09-30 Highly Recommended an absorbing account of a military formation that became an elite force within the French Army Firetrench Irish troops had fought for Louis XIV in the 1670s under Irish officers who had little choice but to fight in foreign service with the blessing of Charles II With the accession of James II and the religious politics of who might earn the English crown they became embroiled in the Jacobite succession crisis fighting in Ireland then sent to France under Lord Mountcashel in 1689 With the fall of Limerick in 1691 Patrick Sarsfield led the second flight of Wild Geese to the continent to fight in a war for the French against the Grand Alliance of Europe in the vain hope that their loyalty might warrant French support in a return to Ireland under a Jacobite king From the Nine Years War through the War of the Spanish Succession and beyond their descendants would be present at Fontenoy Culloden and in the Americas forever destined to fight for a cause and land which had changed beyond recognition D P Graham explains the origins of the brigade and its regiments the personalities who led them and formed their reputation and the circumstances of their final dissolution in the aftermath of French Revolution An excellent study of the events that led up to the creation of the Wild Geese and in particular the brutal war in Ireland a conflict that still has an impact in the present day History of War *The Huguenots* Jane McKee,2013-01-23 Examines the situation of French Protestants before and after the Revocation of the Edict of Nantes in France and in the countries to which many of them fled during the great exodus which followed the Edict of Fontainebleau covering a period from the end of the sixteenth to the beginning of the nineteenth century *Democracy and Dictatorship in Europe* Sheri Berman,2019 Democracy and Dictatorship in Europe examines the development of various political regimes in Europe from the ancien r gime up through the present day It analyzes why democracy flourishes at some times and in some places but not others and draws lessons from European history that can help us better understand the political situation the world finds itself in today ‘*A Storme Out of Wales*’ Robert Matthews,2011-11-15 The Second Civil War 1648 began in south Wales The present study is the first detailed contextual narrative and analysis of the revolt in Wales covering the originating mutiny at Pembroke Castle its development into a rebellion that spread through south Wales the Battle of St Fagans the biggest battle ever fought in Wales and Cromwell s successful Welsh campaign involving the sieges of Chepstow Tenby and Pembroke The consequences of the revolt involving the emergence of new local **Consolidating Conquest** Padraig Lenihan,2014-05-22 This groundbreaking and controversial new study tells the story of two nations in Ireland an Irish Catholic nation and a Protestant nation emerging from a blood stained century This survey confronts the violence and enmity inherent in the consolidation of conquest Lenihan

contends that the overriding grand narrative of this period was one of conflict and dispossession as the native elite was progressively displaced by a new colonial ruling class This struggle was not confined to war but also had cultural religious economic and social reverberations At times the darkness was relieved throughout the period by episodes of peaceful cooperation Consolidating Conquest places events in Ireland in the context of three Stuart kingdoms religious rivalry within and between those kingdoms and the shifting balance of power as monarchy and commonwealth Whitehall and Westminster fought for ultimate power
