Fragments From Forests And Libraries A Collection Of Essays:

Fragments from Forests and Libraries Valerio Valeri, 2001 Edited by Janet Hoskins Fragments from Forests and Libraries is a compilation of important articles by Valerio Valeri a scholar whose research ranged from the rainforests of the island of Seram to European archives and libraries Along with nine essays previously published in English the book contains a number of studies translated for the first time and one unpublished work This book is part of the Ritual Studies Monograph Series edited by Pamela J Stewart and Andrew Strathern Department of Anthropology University of Pittsburgh Throughout the writing is scholarly steeped in an unusually extensive knowledge of European history and philosophy which Valeri often brings to bear in unexpected and illuminating ways on the complexities of Huauilu life This will be a most useful text in undergraduate and postgraduate courses in anthropology not least because in its independence of thought broad range of interests and its refusal to specialize narrowly it sets an example we all should try to emulate Simon Harrison The Journal of The Royal Anthropological Institute September 2003

Classic Concepts in Anthropology Valerio Valeri, 2017-12-15 The late anthropologist Valerio Valeri 1944-98 was best known for his substantial writings on societies of Polynesia and eastern Indonesia This volume however presents a lesser known side of Valeri s genius through a dazzlingly erudite set of comparative essays on core topics in the history of anthropological theory Offering masterly discussions of anthropological thought about ritual fetishism cosmogonic myth belief caste kingship mourning play feasting ceremony and cultural relativism Classic Concepts in Anthropology will be an eye opening essential resource for students and researchers not only in anthropology but throughout the humanities

Chaos, Cosmos and Creation in Early Greek Theogonies Olaf Almquist, 2022-01-13 Cosmological narratives like the creation story in the book of Genesis or the modern Big Bang are popularly understood to be descriptions of how the universe was created However cosmologies also say a great deal more Indeed the majority of cosmologies ancient and modern explore not simply how the world was made but how humans relate to their surrounding environment and the often thin line which separates humans from gods and animals Combining approaches from classical studies anthropology and philosophy this book studies three competing cosmologies of the early Greek world Hesiod s Theogony the Orphic Derveni Theogony and Protagoras creation myth in Plato s eponymous dialogue Although all three cosmologies are part of a single mythic tradition and feature a number of similar events and characters Olaf Almquist argues they offer very different answers to an ongoing debate on what it is to be human Engaging closely with the ontological turn in anthropology and in particular with the work of Philippe Descola this book outlines three key sets of ontological assumptions analogism pantheism and naturalism found in early Greek literature and explores how these competing ontological assumptions result in contrasting attitudes to rituals such as prayer and sacrifice

The Hidden Language of Graphic Signs John Bodel, Stephen Houston, 2021-08-19 A common belief is that systems of writing are committed to transparency and precise records of sound The target is the language behind such marks Readers not viewers

matter most and the most effective graphs largely record sound not meaning But what if embellishments mattered deeply if hidden writing slow to produce slow to read played as enduring a role as more accessible graphs What if meaningful marks did service alongside records of spoken language This book a compilation of essays by global authorities on these subjects zeroes in on hidden writing and alternative systems of graphic notation Essays by leading scholars explore forms of writing that by their formal intricacy deflect attention from language The volume also examines graphs that target meaning directly without passing through the filter of words and the medium of sound The many examples here testify to human ingenuity and future possibilities for exploring enriched graphic communication **Bulletin** Östasiatiska museet,2001 *Possibilities*

David Graeber,2007 An anthropologist investigates the revolution of everyday life Hierarchy Knut M. Rio,Olaf H. Smedal,2008-12-01 Louis Dumont s concept of hierarchy continues to inspire social scientists Using it as their starting point the contributors to this volume introduce both fresh empirical material and new theoretical considerations On the basis of diverse ethnographic contexts in Oceania Asia and the Middle East they challenge some current conceptions of hierarchical formations and reassess former debates of post colonial and neo colonial agendas ideas of democratization and globalization and expanding market economies both with regard to new theoretical issues and the new world situation **Stories from an Ancient Land** Magnus Fiskesjö,2021-08-13 The Wa people have a rich civilization of their own and a deep history in the mountains of Southeast Asia Their mythology suggests their land is the first place inhabited by humans which they care for on behalf of the world This book introduces aspects of Wa culture including their approach to the world s troubles and the lessons others might learn from it It also presents a new interpretation of Wa headhunting questioning explanations that see it as a primitive custom and instead placing it within the fraught history of the last few centuries **Catalogue of the Public Library of the City of Detroit** Henry M.
