Handbook of Research

on Decision-Making Capabilities Improvement With Serious Games Correia, Anacleto, Simões-Marques, Mário, 2023-07-10

How can a group be empowered to improve their ability to make decisions while also reinforcing the group's intended values, beliefs, and behaviors? Like positive reinforcement, which introduces a desirable or pleasant stimulus after a behavior has been completed and has been found to be effective for reinforcing such behavior, serious games introduce the behavior as a pleasant experience through engagement and entertainment. Where positive reinforcement relies heavily on the willpower of the subject to complete the behavior on their own, serious games introduce a motivational factor from the beginning of the behavior. Serious games are designed for purposes other than entertainment, such as training, learning, creating awareness, or behavior transformation through the introduction of content, topics, narratives, rules, and goals. They are immersive, engaging, and enjoyable, which enhances motivation and learning. The development of serious games is grounded in theoretical backgrounds such as motivation, constructivism, flow, experience, problem-based learning, and learning by doing. This method has been used in a variety of industries, including education, healthcare, military, policy analysis, and business functions such as marketing or financial purposes. They facilitate problem solving through challenges and rewards and use entertainment and engagement components. Serious games can address specific skills for many domains, foster collaboration, provide risk-free environments, and be used as analytical tools for educational research. They reinforce intended values, beliefs, and behaviors of players while conveying knowledge, skills, and attitudes, providing an integrated and effective approach to the transformation of an individual, group, or organization. *The Handbook of Research on Decision Making Capabilities Improvement With Serious Games* discusses the use of advanced technologies, including extended and immersive reality, digital twins, augmented reality, AR, virtual reality, VR, mixed reality, MR, and IoT sensors, to improve decision-making skills and learning through serious games. This book discusses user engagement, game adaptation, content adaptation, and sensor technology. It showcases how to increase decision-making skills in individuals and organizations and incorporates the latest developments in artificial intelligence and machine learning. Led by experts with over 20 years of experience and covering topics such as serious game design, intelligent content adaptation, and machine learning algorithms, this book is designed for professionals in education, instructional designers, curriculum developers, program developers, administrators, educational software developers, policymakers, researchers, training professionals, privacy practitioners, government officials, consultants, IT researchers, academicians, and students.

Gendered Frames, Embodied Cameras Cybelle H. McFadden, 2014-05-29 *Gendered Frames* Embodied Cameras Varda Akerman, Cabrera Calle, and Ma Wenn is the first book to link these five filmmakers together through an analysis of the relationship between filming one's own body and the creative body. Through engaged artistic practices, these female filmmakers turn the camera to their bodies as a way to show the process of artistic creation and to produce themselves as filmmakers and artists in their work from 1987-2009. By making visible their bodies, they offer a wider range of representation of women in French film. Through avant-garde form, in which tangible corporeal elements are made

image they transform representational content and produce new cinematic bodies with the power to influence signifying practices in contemporary French culture By rendering visible their artistic practice and praxis and their camera in their work reflexive practices that also unite these filmmakers these women also visually claim the role of filmmaker and creative subject Thus they establish their authority in a film industry in which women's participation and recognition of their achievements have historically been lower than that of their male counterparts **The Frame Game** Lynn Graves,1994
