**Frame of Mind** Kshitiz Gautam, 2013-12-01 *The Christian Frame of Mind* Thomas F. Torrance, 2015-08-25 The Christian Frame of Mind Reason Order and Openness in Theology and Natural Science is an exhilarating exploration by one of this century's premier theologians of the relationship between science and theology This collection of essays which focuses on themes central to Thomas F Torrance's lifelong work of integrating Judea Christian theology and natural science illuminates the distinctive contribution of the Christian frame of mind to human life and thought particularly in the rise of modern science Arguing to close the gap between theological and natural science erroneously opened by the narrow minded rationalism of the Enlightenment Dr Torrance builds upon the work of scientists such as James Clerk Maxwell Albert Einstein and Michael Polanyi in promoting dialogue between the two disciplines The resultant conversation is a brilliant and stirring analysis of common ground in scientific and theological inquiry Torrance discards a dualist separation for a unitary understanding of reality in which the invisible guides the interpretation of the visible as scientist and theologian alike adopt self critical openness and the auditive mode of inquiry in response to the pressing questions of their task Dr Torrance urges this unitary understanding of the intelligibility of the universe as a shared goal of science and theology His vision of a foundational convergence between them where the boundary points of contingent reality find their reference in the transcendent uncreated reality of the Word of God is breathtaking in beauty and scope The introduction by Dr W Jim Neidhardt physics professor at the New Jersey Institute of Technology provides a lucid summary of key themes in Torrance's lifelong integrative work

*The Victorian Frame of Mind, 1830-1870* Walter E. Houghton, 2014-10-29 It is now forty years since Lytton Strachey decided that we knew too much about the Victorian era to view its culture as a whole Recently the tide has turned and the Victorians have been the subject of sympathetic period pieces critical and biographical works and extensive studies of their age but the Victorian mind itself remains blurred for us a bundle of various and often paradoxical ideas and attitudes Mr Houghton explores these ideas and attitudes studies their interrelationships and traces their simultaneous existence to the general character of the age His inquiry is the more important because it demonstrates that to look into the Victorian mind is to see some of the primary sources of the modern mind

### **Essays on Nature and the Philosophy of**

**Environmental Education** Michael Bonnett,Justin Dillon,Alan Reid,2025-09-26 This volume identifies and debates important elements of what would be involved in an education that is truly adequate for the environmental situation that currently confronts us The chapters in the book present a wide variety of perspectives and raise questions about much mainstream environmental education particularly the heavy emphasis given to science in understanding environmental problems and to technology for solving them Contributions argue that there are other equally if not more important aspects to be considered notably our underlying attitudes towards nature and the quality of our underlying relationship with it They raise questions about what we mean by nature and how we come to know it most authentically in its many facets The overweening anthropocentrism and desire for mastery that informs much of current Western engagement with nature is revealed as stymying our ability properly to recognise nature s intrinsic value and moral standing Consideration is given to the need for a curriculum in which morality poetry and myth art and the humanities have key roles to play and where our understandings of the qualities of time and space that frame the curriculum are refreshed The majority of the chapters in this book were originally published in the journal Environmental Education Research
