Minh-ha, 2012-10-12 Framer Framed brings together for the first time the scripts and detailed visuals of three of Trinh Minh ha s provocative films Reassemblage Naked Spaces Living isRound and Surname Viet Given Name Nam      Desire and Consent in Representations of Adolescent Sexuality with Adults Maureen Turim, Diane Waldman, 2023-10-02 This book presents an innovative comparative view of how the issue of adolescent sexuality and consent is differently treated in various media Analyzing teenage sexual encounters with adults across a variety of media including films television novels and podcasts the volume takes a positive stance on the expression of teenage sexuality while remaining sensitive to the power of adults to abuse and manipulate The anthology treats these representations as negotiations between conflicting forces desire sexual self knowledge unequal power and the law the latter both actual legal statutes and internalized law in the philosophical and psychoanalytic sense Questions of unequal power inherent in such relations are theorized The authors examine variations of this configuration of sexual relations between teenagers and adults from different perspectives to consider how various forms of expression rework it formally These essays are attuned to both nuances of presentation and contexts of reception and they consider how aesthetics play a role Contributing to the general debate about the ways that societies construct and regulate adolescent sexuality this book will be of great interest to scholars and students of media studies cultural studies film studies television studies sociology and gender studies      **Sites de résistance - Stratégies textuelles ,      Video as Method** Anne M. Harris, 2016 Perhaps the greatest strength of choosing video as a method for social research is its flexible and almost limitless potential for gathering analyzing writing up and disseminating the research findings Understanding the rich potential of video as both method and methodology is a process inextricably linked to epistemological study design analysis and dissemination choices As technology and media have evolved video has become a primary tool of presenting information and ideas and a means of culture making Video as Method provides researchers with a guide to understanding designing conducting and disseminating video based research and the rapid proliferation of approaches uses and designs now available In the face of large data sets and the great range of types and uses of video as an effective research tool many researchers struggle to know how best to represent both video based methodologies and research findings Anne Harris provides in depth examples in each chapter and guides readers step by step through the chapter topics in a methodical fashion that mirrors the research journey      Critical Methods for the Study of World Politics Shine Choi, Anna Selmeczi, Erzsébet Strausz, 2019-12-05 This book develops an approach to both method and the socio political implications of knowledge production that embraces our embeddedness in the world that we study It seeks to enact the transformative potentials inherent in this relationship in how it engages readers It presents a creative survey of some of the newest developments in critical research methods and

critical pedagogy that together go beyond the aims of knowledge transfer that often structure our practices Each contribution takes on a different shape tone and orientation and discusses a critical method or approach teasing out the ways in which it can also work as a transformative practice While the presentation of different methods is both rigorously practice based and specific contributors also offer reflections on the stakes of critical engagement and how it may play an important role in expanding and subverting existing regimes of intelligibility Contributions variously address the following key questions What makes your research method important How can others work with it How has research through this method and or the way you ended up deploying it transformed you and or your practice How did it matter for thinking about community academic collaboration and sharing knowledge This volume makes the case for re politicizing the importance of research and the transformative potentials of research methods not only in accessing the world as an object of study but as ways of acting and being in the world It will be of interest to students and scholars of international relations critical theory research methods and politics in general

*Desire After Affect* Marie-Luise Angerer, 2014-11-24 Desire is a term often used in conjunction with the subject This desire is directed towards the real which is defined as the generic core of the linguistic order As a result of the focus on affect the three terms desire the subject the real have been fundamentally shaken up and called into question Affect in various forms is now a matter of concern across a wide range of disciplines including neuroscience psychology the humanities and social sciences All of these fields have a declared interest in affect in emotions and sensations in pathos passions and the senses *Desire After Affect* argues that this affective euphoria cannot be explained solely in terms of a repression of language logos and reason It argues that the affective turn is symptomatic of a fundamental shift in modes of thinking about the human condition It explores what this means for the human and the posthuman animal and machine and calls for a new theory of subjectivation a philosophy of media affect

*Verbal-Visual Configurations in Postcolonial Literature*

Birgit Neumann, Gabriele Rippl, 2020-04-23 Examining a range of contemporary Anglophone texts this book opens up postcolonial and transcultural studies for discussions of visibility and vision It argues that the preoccupation with visual practices in Anglophone literatures addresses the power of images vision and visual aesthetics to regulate cultural visibility and modes of identification in an unevenly structured world The representation of visual practices in the imaginative realm of fiction opens up a zone in which established orders of the sayable and visible may be revised and transformed In 12 chapters the book examines narrative fiction by writers such as Michael Ondaatje Derek Walcott Salman Rushdie David Dabydeen and NoViolet Bulawayo who employ word image relations to explore the historically fraught links between visual practices and the experience of modernity in a transcultural context Against this conceptual background the examination of verbal visual relations will illustrate how Anglophone fiction models alternative modes of representation that reflect critically on hegemonic visual regimes and reach out for new more pluralized forms of exchange

*The Grounds of Gaming* Nicholas Taylor, 2024-12-02 How do we make space for video games in the places where we live work and play and who is allowed to feel welcome there Despite attempts to expand games beyond their conventional audience of young men the physical contexts of gameplay and production remain off limits and unsafe for so many The Grounds of Gaming explores the physical places where games are played and how they contribute to the persistence of gaming's problematic politics Drawing on fieldwork in an array of sites author Nicholas Taylor explores the real world settings where games are played watched discussed and designed Sometimes these places are sticky dark and stinky other times they are pristine and well appointed Situating its chapters in such scenes as domestic gaming setups campus computer labs LAN parties esports arenas and convention centers Taylor maps the infrastructural connections between games place masculinity and whiteness By inviting us to reconsider gaming's cultural politics from the ground up The Grounds of Gaming offers new theoretical insights and practical resources regarding how to make game cultures and industries more inclusive

**Interdiscipline** Petar Ramadanovic, 2021-11-29 This book brings together two different discussions on the value of the humanities and a broader debate on interdisciplinary scholarship in order to propose a new way beyond current threats to the humanities Petar Ramadanovic offers nothing short of a drastic rehaul of our approaches to literary scholarship the humanities and university systems Beginning with an analysis of what is often referred to as the crises in the humanities the author looks at the specifics of literary studies but also issues around working conditions for academics From precarity and pay conditions to peer review the book has practical as well as theoretical implications that will resonate throughout the humanities While most books defending the humanities emphasize the uniqueness of the subject or area Ramadanovic does the opposite emphasizing the need for interdisciplinarity and combined knowledge This proposal is then fully explored through literary studies and its potential throughout the humanities and beyond into the sciences Interdiscipline is not just a defense of literature and the humanities it offers a clear and inspiring pathway forwards drawing on all disciplines to show their cultural

and social significance The book is important reading for all scholars of literary studies and also throughout the humanities

*Foucault and the Government of Disability* Shelley Lynn Tremain, 2015-06-02 Foucault and the Government of Disability considers the continued relevance of Foucault to disability studies as well as the growing significance of disability studies to understandings of Foucault A decade ago this international collection provocatively responded to Foucault's call to question what is regarded as natural inevitable ethical and liberating The book's contributors draw on Foucault to scrutinize a range of widely endorsed practices and ideas surrounding disability including rehabilitation community care impairment normality and abnormality inclusion prevention accommodation and special education In this revised and expanded edition four new essays extend and elaborate the lines of inquiry by problematizing to use Foucault's term the epistemological political and ethical character of the supercrip the racialized war on autism the performativity of intellectual disability and the potent mixture of neoliberalism and biopolitics in the context of physician assisted suicide A n important prescient and necessary contribution a kind of litmus test for the efficacy of Foucault's concepts in the study of disability concepts that lead to a refusal of the biological essentialism implied in the disability impairment binary Foucault Studies Tremain has done an exceptional job at organizing and procuring important rigorously argued and entertaining essays This book should be a mandatory read for anyone interested in contemporary philosophical debates surrounding the experience of disability Essays in Philosophy A beautiful exploration of how Foucault's analytics of power and genealogies of discursive knowledges can open up new avenues for thinking critically about phenomena that many of us take to be inevitable and thus new ways of resisting and possibly at times redirecting the forces that shape our lives Every scholar every person with an interest in Foucault or in political theory generally needs to read this book Ladelles McWhorter University of Richmond **Open World**

**Empire** Christopher B. Patterson, 2020-04-14 Finalist 2021 John Hope Franklin Prize given by the American Studies Association Seeking ways to understand video games beyond their imperial logics Patterson turns to erotics to re invigorate the potential passions and pleasures of play Video games vastly outpace all other mediums of entertainment in revenue and in global reach On the surface games do not appear ideological nor are they categorized as national products Instead they seem to reflect the open and uncontaminated reputation of information technology Video games are undeniably imperial products Their very existence has been conditioned upon the spread of militarized technology the exploitation of already existing labor and racial hierarchies in their manufacture and the utopian promises of digital technology Like literature and film before it video games have become the main artistic expression of empire today the open world empire formed through the routes of information technology and the violences of drone combat unending war and overseas massacres that occur with little scandal or protest Though often presented as purely technological feats video games are also artistic projects and as such they allow us an understanding of how war and imperial violence proceed under signs of openness transparency and digital utopia But the video game as Christopher B Patterson argues is also an inherently Asian commodity its hardware is

assembled in Asia its most talented e sports players are of Asian origin Nintendo Sony and Sega have defined and dominated the genre Games draw on established discourses of Asia to provide an Asiatic space a playful sphere of racial otherness that straddles notions of the queer the exotic the bizarre and the erotic Thinking through games like Overwatch Call of Duty 4 Modern Warfare Shenmue II and Alien Isolation Patterson reads against empire by playing games erotically as players do seeing games as Asiatic playthings that afford new passions pleasures desires and attachments **Action Research** Ernest T. Stringer, Alfredo Ortiz Aragón, 2020-08-26 Action Research is an invaluable guide to novice researchers from a diversity of disciplines backgrounds and levels of study for understanding how action research works in real life contexts It helps students see the value of their research in a broader context beyond academia to effect change on a larger scale
