sciences as well as in other related fields The Impact of 9/11 on Psychology and Education M. Morgan, 2009-11-23 The Impact of 9 11 on Psychology and Education is the fifth volume of the six volume series The Day that Changed Everything edited by Matthew J Morgan It features forewords by Robert Sternberg and Philip Zimbardo *University in Chains* Henry A. Giroux, 2015-10-23 President Eisenhower originally included academic in the draft of his landmark oft quoted speech on the military industrial complex Giroux tells why Eisenhower saw the academy as part of the famous complex and how his warning was vitally prescient for 21st century America Giroux details the sweeping post 9 11 assault being waged on the academy by militarization corporatization and right wing fundamentalists who increasingly view critical thought itself as a threat to the dominant political order Giroux argues that the university has become a handmaiden of the Pentagon and corporate interests it has lost its claim to independence and critical learning and has compromised its role as a democratic public sphere And yet in spite of its present embattled status and the inroads made by corporate power the defense industries and the right wing extremists Giroux defends the university as one of the few public spaces left capable of raising important questions and educating students to be critical and engaged agents He concludes by making a strong case for The New Henry Giroux Reader Henry A. Giroux, 2018-11-30 The New reclaiming it as a democratic public sphere Henry Giroux Reader presents Henry Giroux s evolving body of work The book articulates a crucial shift in his analyses after the September 11th 2001 terrorist attack when his writing took on more expansive articulations of power politics and pedagogy that addressed education and culture in forms that could no longer be contained via isolated reviews of media schooling or pedagogical practice Instead Giroux locates these discourses as a constellation of neoliberal influences on cultural practices with education as the engine of their reproduction and their cessation The New Henry Giroux Reader also takes up Giroux s proclivity for using metaphors articulating death as the inevitable effect of neoliberalism and its invasion of cultural policy Zombies entropy and violence permeate his work coalescing around the central notion that market ideologies are anothema to human life His early pieces signal an unnatural state of affairs seeping through the fabric of social life and his work in cultural studies and public pedagogy signals the escalation of this unease across educative spaces The next sections take up the fallout of 9 11 as an eruption of these horrific practices into all facets of human life within traditional understandings of education and culture s broader pedagogical imperatives The book concludes with Giroux s writings on education s vitalist capacity demonstrating an unerring capacity for hope in the face of abject horror Perfect for courses such as History and Philosophy of Education Political and Social Foundations of Education Policy Issues in American Education African American Education Social Justice Research in Education Marginality and the Politics of Resistance Equity and Anti Oppression Cultural Studies and Public Pedagogy Handbook of Security Science Anthony J.
