Calder, 1985 **Einstein's Universe** Nigel Calder, 1982 Nigel Calder's landmark book has been acclaimed for making Albert Einstein's theories of relativity accessible to the public The universe that Einstein built is an astonishing skyscape of bent starlight high speed astronauts black holes stormy galaxies and exploding spacetime Today it seems more certain than ever that we live in the cosmos he described yet often we still fail to understand it Einstein's Universe unlocks the secrets of an astounding vision of the world How can a black hole keep you young Why does a falling person feel no force of gravity Answering these and many other questions Einstein's Universe makes plain the debt that humanity owes to the man who completely reshaped our ideas of energy time and motion *Einstein's Universe*, 1982 **The EINSTEIN-STEFAN**

A Fundamental Mistake Graham Cliff, 2012-06-01 Does it puzzle you that despite ever increasing rules controls and counter measures antisocial behaviour is seemingly spiralling out of control Why have there been riots in Britain Why is law enforcement failing to make our society a better place in which to live Have our politicians lost the plot Are our values wrong A Fundamental Mistake explains why a change of direction is needed in society's thinking about how to get people to behave themselves it also offers a carefully argued strategy by which to achieve this The emphasis needs to shift away from coercion and punishment and towards inducement and reward The remarkable thing is that although we already have the necessary knowledge it's not put to good use Taking a fresh approach Graham Cliff draws on mainstream behavioural psychology and applied ethics to make his case for challenging some of our time honoured cultural assumptions and practices Be prepared to re think your position Despite the weightiness of the subject this is a book for everyone because it works up from first principles in a readily readable way No expertise is needed to follow the flow from the basics of human nature to the way our minds work then through the web of customs and rules that make up society on to government laws and punishment and finally to how and why things might be done differently Nobody will agree with everything that A Fundamental Mistake has to say because that's what debate is all about However it's as well to remember this when it comes to tackling antisocial behaviour it's not enough just to get tough we must get clever too

Modern Science and the Paranormal Marie D. Jones,2009-01-15 This book uses scientific theory to explain some of the extrascientific phenomena such as UFOs and poltergeists **German Literature Between Faiths** Peter Meister,2004 Religion is a central concern of German literature in all centuries and the canon looks different when this perspective is acknowledged For example Goethe s fascination with evil is difficult to disentangle from the Holocaust Moses Mendelssohn is as profound as the playwright who portrayed him and Princess Sabbath deserves to be numbered among Heine s more enchanting lyrics This essay collection posits and tests the hypothesis that German literature at its best is often an expression or investigation of Judaism or Christianity at their best but that the best German literature is not always the best known and vice versa Asking whether the New Testament is anti Jewish and answering in the negative essayists range through the German centuries from The Heliand to Kafka and Thomas Mann *The Complete Idiot's Guide to Understanding Einstein* Gary Moring,1999-11-01 You re no idiot of course You know that Albert Einstein came up with the famous E mc equation and that his hair looked like it had survived a nuclear test blast But when it comes to understanding his theories and how they changed the world well youre no Einstein Dont go nuclear yet The Complete Idiots Guide to Understanding Einstein shows how relatively easy and fun it can be to learn and appreciate the world of physics and Einsteins brilliant accomplishments
