Foundations Of Religious Literacy:

Foundations of Religious Literacy John V. Apaczynski, 1982 Originally published by the College Theology Society in 1982 this collection of essays addresses issues of religious literacy The explorations forming the unifying motif here focus on where religious classics can be found today how they are encountered and how their meaning is properly grasped and expressed These concerns are vital to those engaged professionally in the transmission assimilation and creative development of our cultural heritage Co published with the College Theology Society *The Routledge Handbook of Religious Literacy, Pluralism, and Global Engagement* Chris Seiple, Dennis R. Hoover, 2021-12-27 This pioneering handbook proposes an approach to pluralism that is relational principled and non relativistic going beyond banal calls for mere tolerance The growing religious diversity within societies around the world presents both challenges and opportunities A degree of competition between deeply held religious worldview perspectives is natural and inevitable yet at the same time the world urgently needs engagement and partnership across lines of difference None of the world s most pressing problems can be solved by any single actor and as such it is not a question of if but when you partner with an individual or institution that does not think act or believe as you do The authors argue that religious literacy defined as a dynamic combination of competencies and skills continuously refined through real world cross cultural engagement is vital to building societies and states of neighborly solidarity and civic fairness Through examination reflection and case studies across multiple faith traditions and professional fields this handbook equips scholars and students as well as policymakers and practitioners to assess analyze and act collaboratively in a world of deep diversity The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Joining the Revolution in Theology Sandra Yocum Mize, 2007 A Sheed drawing boundaries fighting battles 1985 1994 Theology in local and global perspective 1985 1994 Negotiating the golden years 1995 2004 Nos quedamos 1995 2004

Teachers in schools nowadays are challenged to create inclusive learning environments and safe spaces for encountering diversity in values, cultures, and religions, as well as in disability and talent. Classrooms are microcosmoses in which local and global issues are confronted and addressed. This volume discusses the characteristics of good teachers and the teaching that is needed in today's and tomorrow's schools. The focus is on research-based perspectives with contributions from several internationally renowned scholars on what constitutes good and quality in teaching, studying, learning processes. The chapters focus on good teaching and good teachers from perspectives concerning the fundamental and transversal features of what constitutes a good teacher. More specifically, it is argued that good teachers in tomorrow's schools will need capabilities that reflect the purpose of education, values in education, and talent in education. As an outcome, the book provides insights into how, in attending not only to the cognitive but also to the affective, behavioral, moral, and spiritual domains, teachers are able to support holistic growth and learning among their students in schools of the 21st century. This volume discusses good teaching for schools in the future from the perspectives of school pedagogy, educational psychology, and neuropsychology.

On Making a Shift in the Study of Religion and Other Essays Russell T. McCutcheon, 2021-06-08. Although many would today argue that the onetime dominance of the phenomenology of religion has receded and with it the traditional approach to studying religion as a unique and deeply felt experience that defies explanation, the essays collected here take quite the opposite stand: that this approach has merely been rebranded and continues to characterize much work being done in the field today. Offering a different way forward, one that is based on experiences gained by the members of the Department of Religious Studies at the University of Alabama, a program that has successfully reinvented itself over the past 20 years, the book includes a variety of practical suggestions for how members of Religious Studies departments can revise their approach to studying and teaching about religion. Seeing religion instead as mundane but always exemplary of basic social elements found all across cultures, the volume argues that the way forward for this field lies not in the specialness of its object of study but instead the fact that thinking and acting as if something is special is itself an ordinary aspect of history and culture. Making just this shift helps the scholar of religion to contribute to wide interdisciplinary conversations all across the Humanities and Social Sciences, demonstrating the practical relevance of their work. Exploring Religious Diversity and Covenantal Pluralism in Asia Dennis R. Hoover, 2022-12-26. This book examines the growing diversity of religions and worldviews across South Central Asia and the factors affecting prospects for covenantal pluralism in these regions. Going beyond banal appeals for mere tolerance, the theory of covenantal pluralism calls for a constitutional order of religious freedom and equal treatment combined with a culture of practical religious literacy and everyday virtues of engagement.

across lines of religious difference According to the Pew Religious Diversity Index half of the world's most religiously diverse countries are in Asia The presence of deep religious worldview difference is often seen as a potential threat to socio political cohesion or even as a source of violent conflict Yet in Asia as elsewhere the degree of this diversity is not consistently associated with socio political problems Indeed while religious difference is implicated in some social challenges there are also many instances of respectful multi faith engagement practical collaboration and peaceful debate Volume II offers a pioneering exploration of the prospects for this robust and non relativistic type of pluralism in South Central Asia Volume I examined East Southeast Asia The chapters in these volumes originally appeared as research articles in a series on covenantal pluralism published by The Review of Faith International Affairs

International Handbook of Inter-religious Education Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893 This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity

Sacred Religious Wars Amelia Khatri, 2025-02-14 Sacred Religious Wars explores the intricate relationship between faith and violence throughout history examining how religious beliefs have fueled conflicts across diverse cultures It moves beyond simplistic explanations to uncover the complex interplay of religious conviction political ambition and socio economic factors that drive religiously motivated warfare The book highlights how religion can

be a source of social unity and ethical guidance yet also be manipulated to justify violence and oppression One intriguing area explored is the Crusades revealing how these military expeditions were driven by religious fervor political maneuvering and economic aspirations The book progresses by first establishing a theoretical framework for analyzing religiously motivated conflicts defining key terms and exploring the historical roots of religious violence Subsequent chapters delve into specific case studies such as the Crusades and differing manifestations of Jihad to illustrate various facets of the phenomenon The book also broadens its scope to encompass other examples of religiously sanctioned violence across various cultures and time periods The final chapters analyze the lasting legacies of these conflicts exploring their impact on political boundaries cultural identities and interreligious relations

Decolonizing Religion and Peacebuilding Atalia Omer, 2023 An investigation of what consolidating religion as a technology of peacebuilding and development does to people's accounts of their religious and cultural traditions and why interreligious peacebuilding entrenches colonial legacies in the present Throughout the global south local and international organizations are frequent participants in peacebuilding projects that focus on interreligious dialogue Yet as Atalia Omer argues in *Decolonizing Religion and Peacebuilding* the effects of their efforts are often perverse reinforcing neocolonial practices and disempowering local religious actors Based on empirical research of inter and intra religious peacebuilding practices in Kenya and the Philippines Omer identifies two paradoxical findings first religious peacebuilding practices are both empowering and depoliticizing and second more doing of religion does not necessarily denote deeper or more critical religious literacy Further she shows that these religious actors generate decolonial openings regardless of how closed or open their religious communities are Hence religion's occasional usefulness in peacebuilding does not necessarily mean justice oriented outcomes The book not only uses decolonial and intersectional prisms to expose the entrenched and ongoing colonial dynamics operative in religion and the practices of peacebuilding and development in the global South but it also speaks to decolonial theory through stories of transformation and survival

Religion and Education Malini Sivasubramaniam, Ruth Hayhoe, 2018-01-01 Despite the increased trend towards secularisation in state schooling issues of religion and spirituality have remained important Increased pluralism within societies through expanding migration patterns is changing the

religious and cultural contours of many countries in Europe and North America and is creating a need for a deeper understanding of religious diversity. However, the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism. More recently, religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions in particular. These are profound concerns and there is an urgency to examine how religion, religious education and interfaith initiatives can address such misconceptions. This book is thus timely, focusing on an area that is often neglected, particularly on the role of religion in education for sustainable development. While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries, their role in reaching development goals has not always been explicitly recognised, as is evident even in the United Nations most recently conceptualised 2030 Agenda for Sustainable Development. Undeniably, the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries. This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and comparative understanding of the role of religious education and institutions in advancing the post 2015 development agenda. The contributors to this volume each demonstrate that while religion in education can contribute to understanding and respect, it is also a space that can be contested and co-opted. Without addressing the salience of religion, however, it will not be possible to foster peace and combat discrimination and prejudice. This book will be of interest to researchers, scholars and students in the field of comparative education and development, religious studies, theology and teacher development and training. This book may also be of interest to national and international policy makers. There are also numerous faith-based organisations as well as other non-governmental organisations (NGOs) working on religion and education issues that may find these case studies a useful resource.
