Foundations Of Soft Case Based Reasoning:

    Foundations of Soft Case-Based Reasoning Sankar K. Pal,Simon C. K. Shiu,2004-06-17 Provides a self contained description of this important aspect of information processing and decision support technology Presents basic definitions principles applications and a detailed bibliography Covers a range of real world examples including control data mining and pattern recognition   Soft Computing in Case Based Reasoning Sankar Kumar Pal,Tharam S. Dillon,Daniel S. Yeung,2012-12-06 Soft Computing in Case Based Reasoning demonstrates how various soft computing tools can be applied to design and develop methodologies and systems with case based reasoning for real life decision making or recognition problems Comprising contributions from experts from all over the world it Provides an introduction to CBR and soft computing and the relevance of their integration Evaluates the strengths and weaknesses of CBR in its current form Presents recent developments and significant applications in domains such as data mining medical diagnosis knowledge based expert systems banking and forensic investigation Addresses new information on developing intelligent systems This book will be of particular interest to graduate students and researchers in computer science electrical engineering and information technology but it will also be of interest to researchers and practitioners in the fields of systems design pattern recognition and data mining   Science Bertrand Zavidovique,2012 The concept is fundamental in statistics and tailors to the emergence of collective behaviours Communication then asks for uncertainty considerations noise indeterminacy or approximation and its wider impact on the couple perception action Clustering being all about uncertainty handling data set representation appears not to be the only solution Introducing hierarchies with adapted metrics a priori pre improving the data resolution are other methods in need of evaluation The technology together with increasing semantics enables to involve synthetic data as simulation results for the multiplication of sources Part B plays with another couple important for complex systems state vs transition State first descriptions would characterize physics while transition first would fit biology That could stem from life producing dynamical systems in essence   **Recommender Systems for Technology Enhanced Learning** Nikos Manouselis,Hendrik Drachsler,Katrien Verbert,Olga C. Santos,2014-04-12 As an area Technology Enhanced Learning TEL aims to design develop and test socio technical innovations that will support and enhance learning practices of individuals and organizations Information retrieval is a pivotal activity in TEL and the deployment of recommender systems has attracted increased interest during the past years Recommendation methods techniques and systems open an interesting new approach to facilitate and support learning and teaching The goal is to develop deploy and evaluate systems that provide learners and teachers with meaningful guidance in order to help identify suitable learning resources from a potentially overwhelming variety of choices Contributions address the following topics i user and item data that can be used to support learning recommendation systems and scenarios ii innovative methods and techniques for recommendation purposes in educational settings and iii examples of educational platforms and tools where recommendations are incorporated

Evaluation of Novel Approaches to Software Engineering Leszek Maciaszek,César González-Pérez,Stefan Jablonski,2010-11-18 Software engineering is understood as a broad term linking science traditional en neering art and management and is additionally conditioned by social and external factors conditioned to the point that brilliant engineering solutions based on strong science showing artistic creativity and skillfully managed can still fail for reasons beyond the control of the development team Modern software engineering needs a paradigm shift commensurate with a change of the computing paradigm from 1 Algorithms to interactions and from procedural to object oriented programming 2 Systems development to systems integration 3 Products to services Traditional software engineering struggles to address this paradigm shift to inter tions integration and services It offers only incomplete and disconnected methods for building information systems with fragmentary ability to dynamically accom date change and to grow gracefully The principal objective of contemporary software engineering should therefore be to try to redefine the entire discipline and offer a complete set of methods tools and techniques to address challenges ahead that will shape the information systems of the future **Computers in Fisheries Research** Bernard A. Megrey,Erlend Moksness,2008-11-26 The first edition of this book was published by Chapman and Hall Ltd in 1996 The first edition contained nine chapters and for all except one chapter the original chapter authors agreed to update their chapter Comparing these chapters gives the reader an idea of the development over a time span of more than 10 years between the two editions In the preparation of the second edition we decided to add more chapters reflecting some important fields with significant contributions to present day fishery research These are the use of internet for searching of information Chapter 2 and the present state and use of remote sensing Chapter 5 ecosystem modeling Chapter 8 and visualization of data Chapter 10 This second edition provides a valuable sampling of contemporary applications Scientists have an opportunity to evaluate the suitability of different computer technology applications to their particular research situation thereby taking advantage of the experience of others The chapters that follow are the fruition of this idea The history behind this book started in 1989 when we were asked by Dr Vidar Wespestad previously Alaska Fisheries Science Center Seattle USA to prepare and convene a session at the 1992 World Fishery Congress in Athens Greece on computer applications in fisheries We agreed that the idea was a good one and the computer session in 1992 turned out to be very successful Fuzzy Logic and Applications Vito Di Gesù,Francesco Masulli,Alfredo Petrosino,2006-01-25 This volume constitutes the thoroughly refereed post workshop proceedings of the 5th International Workshop on Fuzzy Logic and Applications held in Naples Italy in October 2003 The 40 revised full papers presented have gone through two rounds of reviewing and revision All current issues of theoretical experimental and applied fuzzy logic and related techniques are addressed with special attention to rough set theory neural networks genetic algorithms and soft computing The papers are organized in topical section on fuzzy sets and systems fuzzy control neuro fuzzy systems fuzzy decision theory and application and soft computing in image processing **Information Systems Design and Intelligent**

Mandal,Suresh Chandra Satapathy,Manas Kumar Sanyal,Partha Pratim Sarkar,Anirban Mukhopadhyay,2015-01-20 The second international conference on INformation Systems Design and Intelligent Applications INDIA 2015 held in Kalyani India during January 8 9 2015 The book covers all aspects of information system design computer science and technology general sciences and educational research Upon a double blind review process a number of high quality papers are selected and collected in the book which is composed of two different volumes and covers a variety of topics including natural language processing artificial intelligence security and privacy communications wireless and sensor networks microelectronics circuit and systems machine learning soft computing mobile computing and applications cloud computing software engineering graphics and image processing rural engineering e commerce e governance business computing molecular computing nano computing chemical computing intelligent computing for GIS and remote sensing bio informatics and bio computing These fields are not only limited to computer researchers but also include mathematics chemistry biology bio chemistry engineering statistics and all others in which computer techniques may assist

Case-Based Reasoning Research and Development Kerstin Bach,Cindy Marling,2019-09-02 This book constitutes the refereed proceedings of the 27th International Conference on Case Based Reasoning Research and Development ICCBR 2019 held in Otzenhausen Germany in September 2019 The 26 full papers presented in this book were carefully reviewed and selected from 43 submissions 15 were selected for oral presentation and 11 for poster presentation The theme of ICCBR 2019 Explainable AI XAI was highlighted by several activities These papers which are included in the proceedings address many themes related to the theory and application of case based reasoning and its future direction   **Innovative Issues in Intelligent Systems** Vassil Sgurev,Ronald R. Yager,Janusz Kacprzyk,Vladimir Jotsov,2016-02-05 This book presents a broad variety of different contemporary IT methods and applications in Intelligent Systems is displayed Every book chapter represents a detailed specific far reaching and original re search in a respective scientific and practical field However all of the chapters share the common point of strong similarity in a sense of being innovative applicable and mutually compatible with each other In other words the methods from the different chapters can be viewed as bricks for building the next generation thinking machines as well as for other futuristic logical applications that are rapidly changing our world nowadays   Computational Intelligence Applications In Smart Grids: Enabling Methodologies For Proactive And Self-organizing Power Systems Ahmed F Zobaa,Alfredo Vaccaro,2014-12-23 This book considers the emerging technologies and methodologies of the application of computational intelligence to smart grids From a conceptual point of view the smart grid is the convergence of information and operational technologies applied to the electric grid allowing sustainable options to customers and improved levels of security Smart grid technologies include advanced sensing systems two way high speed communications monitoring and enterprise analysis software and related services used to obtain location specific and real time actionable data for the provision of enhanced services for both system operators i e distribution automation asset

management advanced metering infrastructure and end users i e demand side management demand response In this context a crucial issue is how to support the evolution of existing electrical grids from static hierarchal systems to self organizing highly scalable and pervasive networks Modern trends are oriented toward the employment of computational intelligence techniques for deploying advanced control protection and monitoring architectures that move away from the older centralized paradigm to systems distributed across the field with an increasing pervasion of intelligence devices The large scale deployment of computational intelligence technologies in smart grids could lead to a more efficient tasks distribution amongst energy resources and consequently to a sensible improvement of the electrical grid flexibility *Novel Applications of Intelligent Systems* Mincho Hadjiski,Nikola Kasabov,Dimitar Filev,Vladimir Jotsov,2016-01-27 In this carefully edited book some selected results of theoretical and applied research in the field of broadly perceived intelligent systems are presented The problems vary from industrial to web and problem independent applications All this is united under the slogan Intelligent systems conquer the world The book brings together innovation projects with analytical research invention retrieval and processing of knowledge and logical applications in technology This book is aiming to a wide circle of readers and particularly to the young generation of IT ICT experts who will build the next generations of intelligent systems
