## Foundations Of Natural Philosophy:

**The Foundations of Natural Philosophy** John Godolphin Bennett, 1956      *Foundations of Natural Philosophy* John G. Bennett, 1987      **Foundations of Natural Philosophy** John G. Bennett, 1987      *Kant's Metaphysical Foundations of Natural Science* Michael Bennett McNulty, 2022-08-11 In his *Metaphysical Foundations of Natural Science* 1786 Kant accounts for the possibility of an acting at a distance gravitational force demonstrates the infinite divisibility of matter and derives analogues to Newtonian laws of motion The work is his major statement in philosophy of science and was especially influential in German speaking countries in the nineteenth century However this complex text has not received the scholarly attention it deserves The chapters of this Critical Guide clarify the accounts of matter motion the mathematization of nature space and natural laws exhibited in the *Metaphysical Foundations* elucidate the relationship between its metaphysics of nature and Kant's critical philosophy and describe the historical context for Kant's account of natural science The volume will be an invaluable resource for understanding one of Kant's most difficult works and will set the agenda for future scholarship on Kant's philosophy of science      **The Dramatic Universe** John G. Bennett, 1976      **Contemporary Natural Philosophy and Philosophies - Part 1** Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind      *The Oxford Handbook of Hobbes* A.P.
