Miller, Jack Rabin**

Foundations Of Natural Resources Policy Management:

Foundations of Natural Resources Policy and Management Susan G. Clark, Tim W. Clark, Andrew R. Willard, Christina Maria Cromley, 2000-01-01 Natural resources issues are complex often emotional and almost always political Efforts to improve natural resources management practices must take into account the scientific aspects of an issue plus these other dimensions This book explains how to address and resolve the human issues underlying natural resources problems It shows how the policy sciences a systematic method for analyzing and proposing solutions can be applied to any natural resources policy and management problem The policy sciences approach proves flexible widely applicable and useful in developing realistic alternatives in diverse situations The book begins with a discussion of what natural resources are how people make decisions about using them and how the policy sciences can be used toward improving policy and management practices Ten case studies inside and outside the United States follow Policy science methods are applied to such problems as endangered species conservation urban parks the development of energy projects the relations between national parks and people who live near them ecotourism and biodiversity and the relation between human rights and environmental conservation in refugee situations Handbook of Public Administration W. Bartley Hildreth, Gerald J. Miller, Jack Rabin, 2018-01-19 Since the publication of the previous edition the best selling Handbook of Public Administration enters its third edition with substantially revised updated and expanded coverage of public administration history theory and practice Edited by preeminent authorities in the field this work is unparalleled in its thorough coverage and comprehensive references This handbook examines the major areas in public administration including public budgeting and financial management human resource management decision making public law and regulation and political economy Providing a strong platform for further research and advancement in the field this book is a necessity for anyone involved in public administration policy and management This edition includes entirely new chapters on information technology and conduct of inquiry In each area of public administration there are two bibliographic treatises written from different perspectives The first examines the developments in the field The second analyzes theories concepts or ideas in the field s literature

Ensuring Greater Yellowstone's Future Susan Gail Clark, 2008-10-01 Drawing on extensive conservation experience in the greater Yellowstone region Susan G Clark outlines the leadership and policy issues associated with managing greater Yellowstone s natural resources and assesses the successes and failures of those who have worked there toward sustainability over the past 40 years

Large-Scale Conservation in the Common Interest Susan G. Clark, Aaron M. Hohl, Catherine H. Picard, Elizabeth Thomas, 2014-09-03 Many people working toward sustainability recognize the important role of conservation but are inadequately prepared to deal with the large spatial temporal and complexity scales that are involved in large scale conservation efforts Problems in large scale conservation require navigating an intermixture of geophysical biological and political dimensions Coming to grips with these many natural and human forces and factors at large scales

much less the myriad details in any single case is challenging in the extreme and becomes more critical with each day that passes Large scale conservation poses many complex challenges that single disciplines approaches or methods cannot fully address alone Interdisciplinarity can significantly strengthen large scale conservation efforts Throughout Large Scale Conservation in the Common Interest the editors and authors argue that a more holistic and genuinely interdisciplinary approach is required to solve the complex and growing challenges associated with large scale conservation The chapters within offer such an approach and define key terms bring challenges to light and employ case studies to offer concrete practical and strategic recommendations to help those who are engaged in the interactive tasks of promoting sustainability and human dignity This book is intended for a broad audience including students and professors new to the field of large scale conservation experienced field based practitioners in science and management and decision and policy makers who set specific and strategic direction for large landscapes Professors can use this book to introduce students to the challenges of successful large scale conservation design and implementation and to teach interdisciplinarity as a framework concept and tool Professionals will find this book offers a new way of using science management and policy to make decisions Finally this volume can be used as a guide to set up workshops seminars or projects involving diverse people and perspectives

Committee on Government Operations. Subcommittee on Executive Reorganization,1968 **Managing the Environmental Crisis** William Russell Mangun,Daniel H. Henning,1999 Second edition With a new foreword by Lynton Keith Caldwell In *Managing the Environmental Crisis* William R Mangun and Daniel H Henning provide a balanced and comprehensive guide to the management of complex environmental and natural resource policy issues Taking into account new developments trends and issues that have arisen in recent years the authors begin with the recognition often overlooked that it is not the environment that needs to be managed but human action relating to the environment The authors review issues associated with a range of environmental policy concerns including energy considerations renewable and non renewable resource management pollution control wilderness management and urban and regional policy The history of these issues recent actions pertaining to their management difficulties associated with their continued presence and the consequences of a failure to address these concerns are explored Though focused on specific political issues Mangun and Henning direct their attention to two large scale trends globalization and the political polarization of the environmental movement At the level of the decision making process the incorporation of values specifically addressed from multicultural and cross disciplinary perspectives is also discussed International in scope the book

provides descriptions of the roles of both governmental and nongovernmental organizations in the formulations and implementation of national and global environmental policy This thoroughly revised second edition discusses various successes in the arenas of environmental cooperation and management strategy while pointing to the new challenges that have emerged in the last decade

Natural Resource Economics S. V. Ciriacy-Wantrup,2019-04-09 This volume was assembled by two of Dr Wantrup s students as a complement to his textbook Resource Conservation Economics and Policies Wantrup s ideas on conservation economics continued to evolve in ways that were never fully reflected in that text and although for the student of natural resource economics it is still essential reading to st

Bureaucratic Landscapes Craig W. Thomas,2002-12-20 Political scientists have long been concerned about the tension between institutional fragmentation and policy coordination in the U S bureaucracy The literature is rife with examples of agencies competing with each other or asserting their independence while cooperation is relatively rare This is of particular importance in policy areas such as biodiversity where species habitats and ecosystems cross various agency jurisdictions Bureaucratic Landscapes explores the reasons for the success and failure of interagency cooperation focusing on several case studies of efforts to preserve biodiversity in California The book examines why public officials tried to cooperate and the obstacles they faced providing indirect evidence of policy impacts as well Among other topics it examines the role of courts in prompting agency action the role of scientific knowledge in organizational learning and the emergence of new institutions to resolve collective action problems Notable findings include the crucial role of environmental lawsuits in prompting agency action and the surprisingly active role of the Bureau of Land Management in resource preservation

Game Theory and Policy Making in Natural Resources and the Environment Ariel Dinar,José Albiac,Joaquín Sánchez-Soriano,2008-01-31 Game Theory has become one of the main analytical tools for addressing strategic issues in the field of economics and is increasing its influence in other fields of social sciences With the increased

level of extraction of natural resources and pollution of environments game theory gains its place in the literature and it is more and more seen as a tool for policy makers and not only for theoreticians The book is structured into four parts dealing with the management of natural resources the negotiation aspects of water management water allocation through pricing and markets and how conflicts and regulation shape the management of the environment The first part explores game theory concepts applied to fisheries and grazing lands which are two important natural resources In the next two parts several game theory methodologies are considered in the negotiation approach to water management and approaches to water pricing and markets The last section looks at environmental protection as the end process of the interplay between conflict and regulation This book includes chapters by experts from developing and developed countries that apply game theory to actual issues in natural resources and the environment As such the book is extremely useful for graduate students and technical experts interested in the sustainable management of natural resource and the environment It is also relevant to all Game Theory and Environmental Economics students
