including the new technique of acupuncture An extensive appendix furthermore offers a detailed introduction to the complicated climatological theories of Wu yun liu qi five periods and six qi which were added to the Su wen by Wang Bing in the Tang era In an epilogue Unschuld writes about the break with tradition and innovative style of thought represented by the Su wen For the first time health care took the form of medicine in that it focused on environmental conditions climatic agents and behavior as causal in the emergence of disease and on the importance of natural laws in explaining illness Unschuld points out that much of what we surmise about the human organism is simply a projection reflecting dominant values and social goals and he constructs a hypothesis to explain the formation and acceptance of basic notions of health and disease in a given society Reading the Su wen he says not only offers a better understanding of the roots of Chinese medicine as an integrated aspect of Chinese civilization it also provides a much needed starting point for discussions of the differences and parallels between European and Chinese ways of dealing with illness and the risk of early death
