Catalysts to Complexity Jon Erlandson, Terry L. Jones, Russell Stannard, 2003-07-01 When the Spanish colonized it in AD 1769 the California Coast was inhabited by speakers of no fewer than 16 distinct languages and an untold number of small autonomous Native communities. These societies all survived by foraging and ethnohistoric records show a wide range of adaptations emphasizing a host of different marine and terrestrial foods. Many groups exhibited signs of cultural complexity including sedentism, high population density, permanent social inequality, and sophisticated maritime technologies. The ethnographic era was preceded by an archaeological past that extends back to the terminal Pleistocene. Essays in this volume explore the last three and one half millennia of this long history, focusing on the archaeological signatures of emergent cultural complexity. Organized geographically, they provide an intricate mosaic of archaeological, historic, and ethnographic findings that illuminate cultural changes over time. To explain these Late Holocene cultural developments, the authors address issues ranging from culture history, paleoenvironments, settlement, subsistence, exchange, ritual, power, and division of labor, and employ both ecological and post-modern perspectives. Complex cultural expressions most highly developed in the Santa Barbara Channel and the North Coast are viewed alternatively as fairly recent and abrupt responses to environmental flux or the end product of gradual progressions that began earlier in the Holocene.

California Archaeology Michael J. Moratto, 2014-05-10 California Archaeology provides a compilation of knowledge for archeologists who are not California specialists. This book explains important cultural events and patterns discovered archeologically. Organized into 11 chapters, this book begins with an overview of California's historic and ancient environments as well as the evidence of Pleistocene human activity. This text then examines the glacial and other environmental conditions that would have influenced the origins, adaptations, and spread of the earliest North Americans. Other chapters consider how California's past is relevant to a wider understanding of human behavior. This book discusses as well the perceptions of Central Coast and San Francisco Bay region prehistory that have changed rapidly as a result of intensive fieldwork performed to comply with environmental law. The final chapter deals with the data of historical linguistics which indicate something of the cultural relationships and events that might have occurred in the past. This book is a valuable resource for archeologists.

The Fisherman's Problem Arthur F. McEvoy, 1986 A critical appraisal of California's fishing industry management develops from an interdisciplinary compilation of recent research in law, economics, marine biology, and anthropology.

Despotism and Differential Reproduction Laura L. Betzig, In the first century after the book's publication, virtually no one tested Darwin's theory against the evidence of human history. Now that tide has changed, Laura Betzig challenges the proposition that the evolved end of human life is its reproduction by presenting the literature on conflict resolution from over a hundred societies. The research results presented in *Despotism and Differential Reproduction* convincingly uphold Darwin's prophecy. A basic premise behind research has

always been that understanding the way things are should contribute to our ability to change them to the way we would like them to be This idea forms the basis for Betig s research she sets out to explain how things really are by leading the reader through the historical and natural conditions that have promoted despotism in the hopes that this might eventually eradicate it She begins with the idea that reproduction is the end of human life and that all forms of power and strength are exploited in reaching this end In this way Betig shows with startling clarity how power corrupts and how despotic governments continue to exist in the world today Engaging even at times railing against existing literature on human and social evolution such as that of Rousseau and Marx Betig asserts herself as a formidable and undeniable voice in this debate Since Darwin s monumental work more has been said about why questions regarding how human history has been shaped by natural history should not even be asked than has been said in an effort to answer them This work puts a stop to that by testing the Darwinian hypothesis and finding that he was right light has in fact been shed on human political and reproductive history Controversial and creative this book makes no apologies for its bold messages and interdisciplinary boundary blending and addresses a topic of continuing interest and importance *An Archeological Overview of Redwood National Park* Michael J. Moratto,1973 **Archaeology in America** Linda S. Cordell,Kent Lightfoot,Francis McManamon,George Milner,2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research American Indian Places Frances H. Kennedy,2008 A guide to 366 places that are significant to American Indians and open to the public Organized geographically the guide includes location information maps and suggestions for further reading about the sites *Basket Weavers for the California Curio Trade* Marvin Cohodas,2019-12-03 The peoples of northwestern California s Lower Klamath River area have long been known for their fine basketry Two early twentieth century weavers of that region Elizabeth Hickox and her daughter Louise created especially distinctive baskets that are celebrated today for their elaboration of technique form and surface designs Marvin Cohodas now explores the various forces that influenced Elizabeth Hickox analyzing her relationship with the curio trade and specifically

with dealer Grace Nicholson to show how those associations affected the development and marketing of baskets He explains the techniques and patterns that Hickox created to meet the challenge of weaving design into changig three dimensional forms In addition to explicating the Hickoxes basketry Cohodas interprets its uniqueness as a form of intersocietal art showing how Elizabeth first designed her distinctive trinket basket to convey a particular view of the curio trade and its effect on status within her community Through its close examination of these superb practitioners of basketry Basket Weavers for the California Curio Trade addresses many of today s most pressing questions in Native American art studies concerning individuality patronage and issues of authenticity Graced with historic photographs and full color plates it reveals the challenges faced by early twentieth century Native weavers Published with the assistance of The Southwest Museum Los Angeles

Cry for Luck Richard Keeling, 2024-03-29 The sobbing vocal quality in many traditional songs of northwestern California Indian tribes inspired the title of Richard Keeling s comprehensive study Little has been known about the music of aboriginal Californians and Cry for Luck will be welcomed by those who see the interpretation of music as a key to understanding other aspects of Native American religion and culture Among the Yurok Hupa and Karok peoples medicine songs and spoken formulas were applied to a range of activities from hunting deer to curing an upset stomach or gaining power over an uninterested member of the opposite sex Keeling inventories 216 specific forms of medicine and explains the cosmological beliefs on which they were founded This music is a living tradition and many of the public dances he describes are still performed today Keeling s comparative historical perspective shows how individual elements in the musical tradition can relate to the development of local cultures and the broader sphere of North American prehistory This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992
