

Dialectic Method of Philosophizing

- The aim of dialectics, as a process of the dialogue, is the clarification of controversial notions and arguments with other people. In this process, personal and shared conceptions should be considered and corrected.
- Many philosophers, such as Hegel, Aristotle, and Socrates, had their own beliefs and explanations about this approach; however, the basic concept remains to be the same.

Scientific Controversies Dominique Raynaud, 2017-07-05 In *Scientific Controversies* Dominique Raynaud shows how organized debates in the sciences help us establish or verify our knowledge of the world If debates focus on form scientific controversies are akin to public debates that can be understood within the framework of theories of conflict If they focus on content then such controversies have to do with a specific activity and address the nature of science itself Understanding the major focus of a scientific controversy is a first step toward understanding these debates and assessing their merits Controversies of unique socio historic context disciplines and characteristics are examined Pasteur's germ theory and Pouchet's theory of spontaneous generation vitalism advocated at Montpellier versus experimental medicine in Paris the science of optics about the propagation of visual rays the origins of relativism the Duhem Quine problem Touching on the work of Boudon Popper and others Raynaud puts forward an incrementalist theory about the advancement of science through scientific controversies The debates Raynaud has selected share in common their pivotal importance to the history of the sciences By understanding the role of controversy we better understand the functioning of science and the stakes of the contemporary scientific debates

Dialectical Practice in Tibetan Philosophical Culture Kenneth Liberman, 2007-09-26 Tibetan Buddhist scholar monks have long engaged in face to face public philosophical debates This original study challenges Orientalist text based scholarship which has overlooked these lived practices of Tibetan dialectics Kenneth Liberman brings these dynamic disputations to life for the modern reader through a richly detailed turn by turn analysis of the monks formal philosophical reasoning He argues that Tibetan Buddhists deliberately organize their debates into formal structures that both empower and constrain thinking skillfully using logic as an interactional tool to organize their reflections During his three years in residence at Tibetan monastic universities Liberman observed and videotaped the monks debates He then transcribed translated and analyzed them using multimedia software and ethnomethodological techniques which enabled him to scrutinize the local methods that Tibetan debaters use to keep their philosophical inquiries alive His study shows the monks rely on such indigenous dialectical methods as extending an opponent's position to its absurd consequences pulling the rug out from under an opponent and other lively strategies This careful investigation of the formal philosophical work of Tibetan scholars is a pathbreaking analysis of an important classical tradition
