Fourth World The Heritage Of The Arctic And Its Destruction:

A History of the Arctic John McCannon, 2013-02-15 Bitter cold and constant snow Polar bears seals and killer whales Victor Frankenstein chasing his monstrous creation across icy terrain in a dogsled The arctic calls to mind a myriad different images Consisting of the Arctic Ocean and parts of Canada the United States Russia Greenland Finland Norway and Sweden the arctic possesses a unique ecosystem temperatures average negative 29 degrees Fahrenheit in winter and rarely rise above freezing in summer and the indigenous peoples and cultures that live in the region have had to adapt to the harsh weather conditions As global temperatures rise the arctic is facing an environmental crisis with melting glaciers causing grave concern around the world But for all the renown of this frozen region the arctic remains far from perfectly understood In *A History of the Arctic* award winning polar historian John McCannon provides an engaging overview of the region that spans from the Stone Age to the present McCannon discusses polar exploration and science nation building diplomacy environmental issues and climate change and the role indigenous populations have played in the arctic s story Chronicling the history of each arctic nation he details the many failed searches for a Northwest Passage and the territorial claims that hamper use of these waterways He also explores the resources found in the arctic oil natural gas minerals fresh water and fish and describes the importance they hold as these resources are depleted elsewhere as well as the challenges we face in extracting them A timely assessment of current diplomatic and environmental realities as well as the dire risks the region now faces *A History of the Arctic* is a thoroughly engrossing book on the past and future of the top of the world

The Fourth World Sam Hall, 1987 Examines the negative impacts humans have had on the native population wildlife and ecology of the arctic Evokes the lifestyle of the arctic peoples describes the erosion of this culture under the impact of colonialism and makes an indisputable case for a common collaboration to save the arctic from further despoilation

and multidisciplinary approaches to address new developments as well as map out exciting trajectories for future work in the Arctic and the Antarctic The handbook provides an easy access to key items of scholarly literature and material otherwise inaccessible or scattered throughout a variety of specialist journals and books A unique one stop research resource for researchers and policymakers with an interest in the Arctic and Antarctic it is also a comprehensive reference work for graduate and advanced undergraduate students

The Earth and I Arthur Firstenberg, 2025-01-07 Almost all environmental books treat the environmental crisis as though humans are in charge of nature rather than part of it The Earth and I is the first book to put all preconceived notions aside and to ask na vely Who are we really What is our relationship to the earth How is it possible that we out of all the millions of species have come to destroy our common home The answers are surprising and have far reaching implications for those searching for solutions Part One tells what is happening to the earth s systems and how they are being destroyed It rewrites the two million year history of humanity s tenure on the earth as if we are part of nature and not separate from it and describes both the earth and the universe as living systems It paints a global coherent picture of the devastation to Earth s air water forests and creatures that is not found elsewhere It reviews assaults on these systems that are not treated adequately if at all elsewhere chemicals radiation plastics detergents biocides noise cars and guns Part Two Digging below the Surface asks why and enters territory not previously explored by environmentalists It describes the various ways to make a living on the earth hunting and gathering shifting agriculture nomadic herding settled agriculture and industrial technology as choices not eras choices coexisting with one another until today It rewrites economics It explores the relationship of warfare slavery religion and human sexuality to the environmental crisis And it is forced to conclude that these aspects of human culture are not only shaped but created by the technologies we use that the use of non human sources of energy interferes with human psychological development and that the unfulfilled urges within us explode in the violent technologies that are destroying our planet The solutions if it is not too late therefore lie in wise choice rather than wise use of our technologies

In this second edition of his classic work Joel Savishinsky expands and updates his highly acclaimed study of mobility and stress in a sub Arctic community of Hare Indians Since the publication of the first edition the Hare have faced new challenges posed by clashes between aboriginal and contemporary values in the spheres of ecology culture and politics from the Hare's rising ethnic and political awareness as a Fourth World community to cultural disagreements over animal rights and environmental preservation The second edition reframes the context of Savishinsky's original conclusions on human animal relations environmentalism and native white encounters to accommodate these new developments as well as current trends in anthropology itself **Alaska History** Marvin W. Falk, 2006-03-30 Marvin W Falk offers a systemic and select

listing of just over 3 000 publications on the history of Alaska published from the 18th century to early 2004 Early explorations were conducted by nationals from several nations and the results were published in Russian German French Spanish and English Many of these foreign language accounts have been published in translation and are included in the bibliography This bibliography covers a wide span of Alaskan history including historical literature from Discovery in 1741 The Russian period ending in 1867 The U S territorial period ending with statehood in 1959 The oil boom *Adventuring with Boldness* Bruce C. Paton, 2006 This book is split into two sections the first telling the stories of the expeditions of Alexander Mackenzie Zebulon Pike Lewis and Clark John Wesley Powell and more The second part tells how they dealt with travel issues **The Cinematic Footprint** Nadia Bozak, 2011-10-28 Film is often used to represent the natural landscape

and increasingly to communicate environmentalist messages Yet behind even today's green movies are ecologically unsustainable production distribution and consumption processes Noting how seemingly immaterial moving images are supported by highly durable resource dependent infrastructures The Cinematic Footprint traces the history of how the hydrocarbon imagination has been central to the development of film as a medium Nadia Bozak's innovative fusion of film studies and environmental studies makes provocative connections between the disappearance of material resources and the emergence of digital media with examples ranging from early cinema to Dziga Vertov's prescient eye from Chris Marker's analog experiments to the digital work of Agnès Varda James Benning and Zacharias Kunuk Combining an analysis of cinema technology with a sensitive consideration of film aesthetics The Cinematic Footprint offers a new perspective on moving images and the natural resources that sustain them *The Modern North* Ken S. Coates, Judith Powell, 1989-01-01 Published in 1989 The Modern North examines the experience of the peoples of the Yukon and Northwest Territories from the Berger inquiry of 1975 and onwards Untangling the varied strands that make up the Northern tapestry its resourceful peoples its awesome physical landscape its political and economic agenda in the late 1980s they portray in vivid colours a society struggling to cast off the chains of colonialism and define its own future The Modern North offers a sensitive assessment of

the people and forces shaping the Yukon and Northwest Territories in the 1980s A Yupiaq Worldview Angayuqaq Oscar Kawagley, 2006-02-17 Oscar Kawagley is a man of two worlds walking the sometimes bewildering line between traditional Yupiaq culture and the Westernized Yupiaq life of today In this study Kawagley follows both memories of his Yupiaq grandmother who raised him with the stories of the Bear Woman and respectful knowledge of the reciprocity of nature and his own education in science as it is taught in Western schools Kawagley is a man who hears the elders voices in Alaska and knows how to look for the weather and to use the land and its creatures with the most delicate care In a call to unite the two parts of his own and modern Yupiaq history Kawagley proposes a way of teaching that incorporates all ways of knowing available in Yupiaq and Western science He has traveled a long journey but it ends where it began in a fishing camp in southwestern Alaska a home for his heart and spirit The second edition examines changes that have impacted the Yupiaq and other Alaska Native communities over the last ten years including implementation of cultural standards in indigenous education and the emergence of a holistic approach in the sciences *Ethnic Diversity and Public Policy C.* Young, 2016-07-27 In recent years the saliency of conflicts pitting different ethnic racial and religious groups against one another has increased dramatically The world of nation states is much more diverse than previously realized only a small number of the 185 independent countries are truly homogeneous With the end of the cold war the relative importance of ethnic conflicts as a threat to international peace and stability is far greater An international set of scholars collaborate in this volume to explore policy alternatives which can contribute towards the accommodation of cultural diversity **Animal Rights, Human Rights** George W. Wenzel, 1991-01-01 This study of the controversy surrounding the hunting of seals in the Canadian Arctic concentrates on the Inuit of Clyde River Baffin Island and traces the evolution of the traditional subsistence economy and social structure to the present cash economy and the effects of animal rights movements on the Inuit culture Extensive bibliography maps and glossary of Inuit sealing terms **Bare Poles** Harold Strub, 1996-04-15 Designing successfully for people in the world s coldest climates demands a broad understanding of site conditions and their unique social context Until now such knowledge often lay unarticulated in the minds of a few experienced practitioners or in the disappearing traditions of aboriginal peoples **State** , 1988
