The Fragile Earth David Remnick, Henry Finder, 2020-10-06 A New York Times New read now McKibben's work is heroically prescient. It features some of the best writing on global warming from the last three decades including Bill McKibben's seminal essay The End of Nature the first piece to popularize both the science and politics of climate change for a general audience and the Pulitzer Prize winning work of Elizabeth Kolbert as well as Kathryn Schulz Dexter Filkins Jonathan Franzen Ian Frazier Eric Klinenberg and others. On the Destiny of Species Matthew Watkinson, 2009 Have you really accepted natural selection? For those who believe in conservation On the Destiny of Species will not make comfortable reading. In fact it will challenge you throughout because life just isn't as fragile as we have been led to believe. Yes giant pandas are fragile and yes polar bears are fragile relatively and yes even humans may be fragile but life isn't about species it's about life. It's about pragmatic survival in a dynamic world. Conservation is a hot topic these days Greenpeace Friends of the Earth and the WWF have 10 million members between them but after 30 years of research the author has no doubt that Nature's culling policy is ruthless for a reason and that human emotion is at best misplaced and often specifically detrimental as the domestic species clearly demonstrate. Published on the 150th anniversary of On the Origin of Species Environment and Sustainability in a Globalizing World Andrea J. Commentary Victoria S. Balabanski,2020-01-23 Vicky Balabanski analyses Colossians as a co authored letter written during Paul's Roman imprisonment by Timothy with the input of Epaphras and sent with Paul's introductory and concluding greetings Balabanski sees remarkable resonances between the cosmology of this letter and that of Stoic thought the most widely held philosophy in first century Asia Minor Drawing upon the way Stoic thinkers saw the divine Spirit permeating reality and sought to attune their lives to the Logos divine reason she argues that the Logos of Christ the Gospel was welcomed by small groups of people shaped by Stoic thought and they experienced Christ as the visible expression of the One God who permeates reality The Letter to the Colossians has the highest view of Christ of any of the New Testament writings and its theology of divine permeation invites us to notice the ecological potential of this letter This Eco Stoic reading brings contemporary ecological questions into dialogue with the distinctive Christology and cosmology of the letter
