## **Fragments Of Development Nation Gender And The Space Of:**

**Fragments of Development** Suzanne Bergeron, 2009-01-22 A bold and challenging consideration of questions of development economic globalization communities and subjectivity from a unique feminist perspective A must read book for those who wish to understand restructuring and resistance in this era of intensified globalization Isabella C Bakker York University Bergeron s pathbreaking analysis challenges orthodox development theories questions current feminist economic thinking and highlights crucial new gendered challenges to globalization Jane Parpart Dalhousie University Cutting edge scholarship Bergeron deftly engages the complexity of current debates while retaining clarity improving analyses and illuminating alternatives V S Peterson University of Arizona By tracing out the intersection between the imagined space of the national economy and the gendered construction of expert knowledge in development thought Suzanne Bergeron provides a provocative analysis of development discourse and practice By elaborating a framework of including excluding economic subjects and activities in development economics she provides a rich account of the role that economists have played in framing the contested political and cultural space of development Bergeron s account of the construction of the national economy as an object of development policy follows its shifting meanings through modernization and growth models dependency theory structural adjustment and contemporary debates about globalization and highlights how intersections of nation and economy are based on gendered and colonial scripts The author s analysis of development debates effectively demonstrates that critics of development who ignore economists nation stories may actually bolster the formation they are attempting to subvert *Fragments of Development* is essential reading for those interested in development studies feminist economics international political economy and globalization studies [Development and Globalization](#) David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory chapter situating the author s work in a larger intellectual and political context The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism *Strange Reciprocity* Sidney S. Perutz, 2008-01-01 Women of Tepoztl n were among the first New Spain labor forces to have their continuum of paid and unpaid work processes globally feminized Focusing on the transformational 1990 to 2000 period this book moves across time space and organizational changes to make explicit multitasking women s experiences of turning to their advantage development policies and practices systematically loaded against them from the outside in and the inside out

**Africa Yesterday, Today and Tomorrow** Nathan Andrews, 2013-02-14 From a multi dimensional and interdisciplinary standpoint this book challenges the teleological and unidirectional notions of development embodied in the idea of modernisation or progress and offers a critique of the tendency to consider Africa as a basket case which often gives the Western self an undeserving privilege and superiority over the African other Mostly authored by emerging African scholars this 16 chapter volume addresses the historical application of development projects in Africa and their modern impact in economic political cultural social and infrastructural contexts among others The book therefore unearths development dynamics in specific African countries examines the continent s external relations rethinks predominant ideas on development and engages in critical examination of concepts and practices that have maintained hegemonic positions in the discussions on Africa s development Its uniqueness lies in the ability to bring these several voices and themes together into a concise conception of both the challenges and possibilities of Africa s sustainable development The book targets both the academic and policy worlds in Africa and around the world as well as ordinary members of the public who seek to broaden their theoretical and empirical understanding on the changing dynamics on the African continent What's Wrong with the United Nations and How to Fix it Thomas G. Weiss, 2009 Six decades after its establishment the United Nations and its system of related agencies and programs is perpetually in crisis While World War I and World War II gave rise to ground breaking efforts at international organization in 1919 and 1945 the UN today seems ill equipped to deal with modern challenges to world order Neither the end of the Cold War nor the aftermath of 9 11 has led to the creation of a next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In this succinct and illuminating analysis Thomas G Weiss takes a diagnosis and cure approach to the world organization s inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN s many overlapping jurisdictions agencies and bodies and the ever demanding challenges of bureaucracy and leadership The second half examines how to mitigate these maladies and points the way to a more ideal world in which the UN s institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible This indispensable book will spark debate amongst students scholars and policy makers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and international cooperation *Transforming Brazil* Rafael R. Ioris, 2014-05-09 In this book Rafael R Ioris critically revisits the postwar context in Brazil to reexamine traditional questions and notions pertaining to the nature of Latin America s political culture and institutions It was in this period that the region lived some of its most intense and successful

experiences of fast economic growth which was paradoxically marred by heightened ideological divisions political disruptions and the emergence of widespread authoritarian rule Combining original sources of political diplomatic intellectual cultural and labor histories Ioris provides a comprehensive history of the fruitful debates concerning national development in postwar Brazil a time when the so called country of the future faced one of its best moments for consolidating political democracy and economic prosperity He argues that traditional views on political instability have been excessively grounded on an institutional focus which should be replaced by in depth analysis of events on the ground In so doing he reveals that as national development meant very different things to multiple different social segments of the Brazilian society no unified support could have been provided to the democratically elected political regime when things rapidly became socially and politically divisive early in the 1960s Innovating in its multidimensional analytical scope and interdisciplinary focus Transforming Brazil provides a rich political cultural and intellectual examination of a historical period characterized by rapid socio economic changes amidst significant political instability and the heightened ideological polarization shaping the political scenario of Brazil and much of Latin America in the Cold War era

**Women and Work in Indonesia** Michele Ford, Lyn Parker, 2008-02-19 This book examines the meaning of work for women in contemporary Indonesia It takes a broad definition of work in order to interrogate assumptions about work and economic activity focusing on what women themselves see as their work which includes not only paid employment home life and child care but also activities surrounding ritual healing and religious life It analyses the key issues including the contrasts between new and old forms of work the relationship between experiences of migration and work and the ways in which religion especially Islam shapes perceptions and practice of work It discusses women s work in a range of different settings both rural and urban and in different locations covering Sumatra Bali Lombok Java Sulawesi and Kalimantan A wide range of types of employment are considered agricultural labour industrial work and new forms of work in the tertiary sector such as media and tourism demonstrating how capitalism globalization and local culture together produce gendered patterns of work with particular statuses and identities It address the question of the meaning and valuing of women s traditional work be it agricultural labour domestic work or other kinds of reproductive labour challenging assumptions of women as only mothers and housewives and demonstrating how women can negotiate new definitions of housewife by mobilizing kinship and village relations to transcend conventional categories such as wage labour and the domestic sphere Overall this book is an important study of the meaning of work for women in Indonesia

**Strategic Culture(s) in Latin America** Félix E. Martín, Nicolás Terradas, Diego Zambrano, 2023-11-17 Strategic Culture s in Latin America elucidates why many state actors in the Global South exhibit a remarkable degree of policy continuity in their external behavior despite structural incentives for change This book contends that the theoretical notion of strategic culture is instructive to explain such a puzzle It extends the application of strategic culture beyond the policy of nuclear deterrence among great powers into other equally strategic areas of policy

such as diplomacy political economy regional international institutions legal norms politico military institutions and different security agendas beyond war and peace for example the illicit drug trade and peacekeeping missions The overall contribution of this book is three fold first it rescues updates and expands the original conceptual and theoretical dimensions of strategic culture Second it extrapolates further theoretical implications of the concept through its application to five policy domains in Latin America beyond the original application of the strategic culture perspective to nuclear weapons strategy among great powers in the 1970s Third it draws together the theoretical and policy implications of the strategic cultures in Latin America and identifies possible applications for other peripheral non great power policy areas and issues in the Global South This book will be of interest to academics graduate and undergraduate students policy analysts and practitioners of Latin American Studies International Relations Theory and Security Studies

*Familiar Futures* Sara Pursley, 2019-01-15 Iraq was the first postcolonial state recognized as legally sovereign by the League of Nations amid the twentieth century wave of decolonization movements It also emerged as an early laboratory of development projects designed by Iraqi intellectuals British colonial officials American modernization theorists and postwar international agencies *Familiar Futures* considers how such projects from the country's creation under British mandate rule in 1920 through the 1958 revolution to the first Ba th coup in 1963 reshaped Iraqi everyday habits desires and familial relations in the name of a developed future Sara Pursley investigates how Western and Iraqi policymakers promoted changes in schooling land ownership and family law to better differentiate Iraq's citizens by class sex and age Peasants were resettled on isolated family farms rural boys received education limited to training in agricultural skills girls were required to take home economics courses and adolescents were educated on the formation of proper families Future oriented discourses about the importance of sexual difference to Iraq's modernization worked paradoxically deferring demands for political change in the present and reproducing existing capitalist relations Ultimately the book shows how certain goods most obviously democratic ideals were repeatedly sacrificed in the name of the nation's economic development in an ever receding future

International Women's Year Jocelyn Olcott, 2017 A rich narrative of the 1975 International Women's Year Conference in Mexico City where the idiom sisterhood is powerful was fractured by global feminism

**The 'Woman Question' and Higher Education** Ann Mari May, 2009-01-01 The interdisciplinary mix of sharp commentary and scholarship has the potential to invigorate and reawaken debate on why women aren't advancing faster in academia and the role of theoretical social and institutional bias in perpetuating this inequity Undergraduate and graduate students of educational and workplace inequality women's studies and neoclassical theory will benefit from engaging in the dialogues raised in this book Lois Joy Feminist Economics this book offers a contribution to debates and is a timely reminder that the woman question remains a compelling issue The critical insights offered by scholars from across the disciplines of history philosophy psychology sociology and economics is a unique aspect of this text This is a thoughtful and scholarly contribution to the knowledge base Tanya Fitzgerald Journal of Educational

Administration and History Detractors will find all the supporting data that they might fear to see as the authors have done their homework housework and it is spotless The opening statement of the acknowledgements can stand for the remainder of us that in encouraging our academic interests as a stimulus to creative energy in making us laugh and in reminding us to hold on to that which we value most for women and men in higher education there cannot be much improvement on this book

Julia Swindells Times Higher Education a particularly readable and interesting set of complementary essays Education Economics These outstanding essays by eminent scholars provide sophisticated and highly readable analyses of the causes of women s exclusion from full participation in knowledge production today From multiple disciplinary perspectives the authors examine the roles of biology institutional impediments discrimination and women s choices A must read for all concerned with the role of women in contemporary higher education Myra H Strober Stanford University US These fascinating essays by scholars from a wide range of disciplines examine women s struggle since the nineteenth century for inclusion and voice in American higher education and the long often grimly comic history of the arguments that men with authority to speak have used and continue to use to rationalize limiting women s role Everyone interested in the history of women in American universities should read this book Robert W Dimand Brock University Canada These essays offer fresh insights on the question of the paucity of women in higher education and together form a thoughtful and contemporary response to Lawrence Summers and the Woman Question in the twenty first century This uniquely interdisciplinary study offers a provocative contemporary look at the Woman Question in relation to higher education at the dawn of the twenty first century Leading feminist scholars from a wide variety of perspectives and disciplines including history philosophy education psychology sociology and economics evaluate the role of biology discrimination and choice in rationalizing women s exclusion from fully participating in the process of knowledge production as well as examining institutional impediments

Contextualizing arguments against women s inclusion and including contemporary perspectives on gender this book offers a rich multi layered examination and critical insights into understanding the near universal difficulties that women encounter as they seek to participate fully in the process of knowledge production This book addresses one of the most compelling topics of our time and speaks to our need to understand the long struggle of women to gain an authoritative voice in higher education and the factors that underlie that struggle Scholars and researchers of women s studies higher education and a range of humanities and social sciences will find this book a welcome addition to the literature Sciences from Below Sandra Harding,2008-06-25 A preeminent science studies scholar shows how feminist and postcolonial science studies challenge the problematic modernity versus tradition binary Ontology and Economics Edward Fullbrook,2008-10-27 Tony Lawson has become a major figure of intellectual controversy on the back of juxtaposing two relatively simple and seemingly innocuous ideas He has argued firstly that success in science depends on finding and using methods including modes of reasoning appropriate to the nature of the phenomena being studied and also that there are important differences between

the nature of the objects of study of natural sciences and those of social science This original book brings together some of the world's leading critics of economics orthodoxy to debate Lawson's contribution to the economics literature The debate centres on ontology which means enquiry into the nature of what exists and in this collection scholars such as Bruce Caldwell John B Davis and Geoffrey M Hodgson present their thoughtful criticisms of Lawson's work Lawson himself presents his reactions to these criticisms with full chapter replies to each of the scholars included This book is particularly useful for students and researchers concerned primarily with methodology and future development of economics It is also relevant to the concerns of philosophers of science and to all social scientists interested in methodological issues

**Figuring the Population Bomb** Carole R. McCann, 2016-12-01 Figuring the Population Bomb traces the genealogy of twentieth century demographic facts that created a mathematical panic about a looming population explosion This narrative was popularized in the 1970s in Paul Ehrlich's best selling book The Population Bomb which pathologized population growth in the Global South by presenting a doomsday scenario of widespread starvation resulting from that growth Carole McCann uses an archive of foundational texts disciplinary histories participant reminiscences and organizational records to reveal the gendered geopolitical grounds of the specialized mathematical culture bureaucratic organization and intertextual hierarchy that gave authority to the concept of population explosion These demographic theories and measurement practices ignited the population crisis and moved nations to interfere in women's reproductive lives Figuring the Population Bomb concludes that mid twentieth century demographic figures remain authoritative to this day in framing the context of transnational feminist activism for reproductive justice

**Writing Neoliberal Values** Rachel C. Riedner, 2015-10-05 This book examines human interest stories unpacking from them violence inherent to neoliberalism and considers if it is possible to find in these stories hints of people and labour that suggest other narratives

**Stitching the 24-Hour City** Seo Young Park, 2021-06-15 Stitching the 24 Hour City reveals the intense speed of garment production and everyday life in Dongdaemun a lively market in Seoul South Korea Once the site of uprisings against oppressive working conditions in the 1970s and 1980s Dongdaemun has now become iconic for its creative economy nightlife fast fashion factories and shopping plazas Seo Young Park follows the work of people who witnessed and experienced the rapidly changing marketplace from the inside Through this approach Park examines the meanings and politics of work in one of the world's most vibrant and dynamic global urban marketplaces Park brings readers into close contact with the garment designers workers and traders who sustain the extraordinary speed of fast fashion production and circulation as well as the labor activists who challenge it Attending to their narratives and practices of work Park argues that speed rather than being a singular drive of acceleration is an entanglement of uneven paces of life labor the market and the city itself Stitching the 24 Hour City exposes the under studied experiences with Dongdaemun fast fashion peeling back layers of temporal politics of labor and urban space to record the human source of the speed that characterizes the never ending movement of the 24 hour city
