## Framework II Manual:

**Framework II Manual** Ashton-Tate, Inc. Staff, Donald H. Beil, Beil, 1991 The book provides support for an introductory computer applications course by discussing the most popular personal computer tools often called applications software. These tools include word processing, spreadsheets, databases, outlining, business graphics, spell checking, and integrated software. By studying the information contained in this book, the reader will learn applications software with material specifically developed for an academic environment. Complete hands-on tutorials work on a realistic case study that parallels the presentation of content. Have ready access to integrated software and learn a real product. The book is divided into three parts. Part One, Getting Started, provides a broad overview of the contents of the material presented in the book, describes how to set up and install the software to run on the specific hardware the reader will use, describes how to start and end a computer session with the Student Edition of Framework II, and explains how to obtain on-line help from the product. Part Two, Tutorials, is the central portion of the book. It includes ten tutorials developed to continue in TofC. **Framework II** Addison-Wesley Press, 1989. **Manual for Radiosonde Code (WBAN)** United States. Weather Bureau, 1956.
