Frameworks for Thinking David Moseley, Vivienne Baumfield, Julian Elliott, Steven Higgins, Jen Miller, Douglas P. Newton, Maggie Gregson, 2005-12-01
This handbook focuses on the thinking processes necessary for learning by providing descriptions and evaluations of 42 major frameworks including Bloom's taxonomy de Bono's lateral and parallel thinking tools Gardner's theory of multiple intelligences and Paul's model of critical thinking Unique in its comprehensive coverage and interdisciplinary approach it offers easy to grasp summary tables for each major theorist for speedy reference A valuable tool for students needing to understand different ways of thinking it will also be an essential resource for teachers curriculum developers researchers and policy makers

Enhancing Professional Practice Charlotte Danielson, Jim S. Furman, Lee Kappes, 2024-10-31
Presenting the latest iteration of the Framework for Teaching the most comprehensive tool yet for teacher self assessment and reflection observation and feedback and collaborative inquiry Since 1996 hundreds of teacher preparation programs and thousands of schools school districts and government agencies have turned to the Framework for Teaching for a better understanding of excellent instruction The Framework's four domains 22 components and 78 key elements provide an expansive holistic definition of what teachers across the K-12 spectrum should know and be able to do in the exercise of their profession Critically it gives practitioners a common language for visualizing talking about and reflecting on their work as they chart their ongoing progress toward instructional excellence This streamlined third edition of *Enhancing Professional Practice* presents the latest evolution of the Framework for Teaching one that is true to its constructivist roots shaped by ongoing research and informed by the experiences of educators in the field Here you'll find An updated exploration of a teacher's essential responsibilities organized into the Framework's four domains Planning and Preparation Learning Environments Learning Experiences and Principled Teaching Detailed discussions of the 22 teaching competencies or components shown to improve student learning with rubrics clarifying the critical attributes of each and how they manifest at various levels of professional proficiency Unsatisfactory Basic Proficient and Distinguished A more explicit emphasis on the Framework's philosophical foundation along with additional attention to what teachers can do to achieve equity honor students' identities foster social emotional development and promote both joyful inquiry and intellectual rigor A more expansive view of family and community engagement and a look at the importance of high quality instructional materials Increased emphasis on the Framework as a tool for ongoing professional learning a way to transform what for teachers is too often a meaningless ritual of supervisory evaluation into a powerful process for thinking about and pursuing instructional

excellence A summary of the research base and a full set of reproducible domain and component rubrics If you or your school are not already using the Framework for Teaching to enhance professional practice there s never been a better time to join the movement

A Framework for K-12 Science Education National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Committee on a Conceptual Framework for New K-12 Science Education Standards,2012-03-28 Science engineering and technology permeate nearly every facet of modern life and hold the key to solving many of humanity s most pressing current and future challenges The United States position in the global economy is declining in part because U S workers lack fundamental knowledge in these fields To address the critical issues of U S competitiveness and to better prepare the workforce A Framework for K 12 Science Education proposes a new approach to K 12 science education that will capture students interest and provide them with the necessary foundational knowledge in the field A Framework for K 12 Science Education outlines a broad set of expectations for students in science and engineering in grades K 12 These expectations will inform the development of new standards for K 12 science education and subsequently revisions to curriculum instruction assessment and professional development for educators This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built These three dimensions are crosscutting concepts that unify the study of science through their common application across science and engineering scientific and engineering practices and disciplinary core ideas in the physical sciences life sciences and earth and space sciences and for engineering technology and the applications of science The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science related issues be careful consumers of scientific and technical information and enter the careers of their choice A Framework for K 12 Science Education is the first step in a process that can inform state level decisions and achieve a research grounded basis for improving science instruction and learning across the country The book will guide standards developers teachers curriculum designers assessment developers state and district science administrators and educators who teach science in informal environments
