David Hornsby, 2017-07-05 The coming together of linguistics and sociology in the 1960s most notably via the work of William Labov marked a revolution in the study of language and provided a paradigm for the understanding of variation and change Labovian quantitative methods have been employed successfully in North America the UK Scandinavia and New Zealand but have had surprisingly little resonance in France a country which poses many challenges to orthodox sociolinguistic thinking Why for example does a nation with unexceptional scores on income distribution and social mobility show an exceptionally high degree of linguistic levelling that is the elimination of marked regional or local speech forms And why does French appear to abound in hyperstyle variables which show greater variation on the stylistic than on the social dimension in defiance of a well established theory that such variables should not occur This volume brings together leading variationist sociolinguists and sociologists from both sides of the Channel to ask what makes France exceptional In addressing this question variationists have been forced to reassess the accepted interdisciplinary consensus and to ask as sociolinguistics has come of age whether concepts and definitions have been transposed in a way which meaningfully preserves their original sense and crucially takes account of recent developments in sociology Sociologists for their part have focused on the largely neglected area of language variation and its implications for social theory Their findings therefore transcend the case study of a particularly enigmatic country to raise important theoretical questions for both disciplines

History of Linguistics 2002 Eduardo Guimarães, Diana Luz Pessoa de Barros, 2007-07-13 This volume brings together a selection of revised papers originally presented at ICHoLS IX São Paulo Campinas The papers in the first section deal with studies ranging from the Latin model in post Renaissance grammars to new scientific propositions at the turn of the 19th century the second part carries articles devoted to a variety of topics in 19th and 20th century linguistics and in the third section are united papers based on plenary presentations ranging from ancient Greek reflections upon language to developments in Brazilian linguistics beginning with the implantation of structuralist work by Joaquim Mattoso Câmara 1904 1970 In the concluding contribution a survey of advances in the history of the language sciences is offered

Sentential Negation in French Paul Rowlett, 1998 This is the first full length study of sentential negation phenomena in French Paul Rowlett assesses from a generative perspective the respective contribution made to the expression of clausal polarity by *ne pas* and elements such as *jamais* and *personne* His conclusions have far reaching implications leading to the controversial hypothesis that despite widespread belief French is not a negative concord language

Variation and Change in Mainland and Insular Norman Mari Jones, 2015-01-27 King John of England's defeat by the French in 1204 led to the territorial fragmentation of the Duchy of Normandy Henceforth the Norman mainland allied to France and the Channel Islands allied to England would find themselves on different sides of an ever widening linguistic gulf In *Variation and Change in Mainland and Insular Norman* Mari C Jones examines the way in which contact between the Norman dialect and its two typologically different superstrates French and English provides optimal conditions to study the linguistic mechanisms of dialect contact and language contact Through the analysis of extensive and original phonological morphosyntactic and lexical data set in their historical and sociolinguistic contexts this fascinating study explores how advergence with its superstrates has led Norman to diverge linguistically within these territories

Historical Romance Linguistics Randall Scott Gess, Deborah Arteaga, 2006-01-01 This volume contains 17 studies on historical Romance linguistics within a variety of current theoretical frameworks it includes studies on phonology morphology and syntax focusing solely or comparatively on all five major Romance languages French Italian Portuguese Romanian and Spanish An introduction by the eminent Romance Linguist Jürgen Klausenburger addresses the fit of these studies in the

overall development of the field of historical Romance linguistics since the 19th century The studies in this volume demonstrate an organic link between Malkiel's 1961 classic definition of Romance linguistics and the field of Romance linguistics today because just as scholars of the field in the 19th century successfully applied the dominant paradigm of historical linguistics of their time Neogrammarian theory so do the authors contained in the present volume avail themselves of current linguistic advances to achieve equally significant results

Non-prototypical Clefts in French Lena Karssen, 2018-09-24 This monograph is the first large scale corpus analysis of French clefts While most research on clefts focusses on the English prototypical it cleft and its equivalents across languages this study examines the lesser known clefts of both presentational eventive and specificational type and provides an in depth analysis of their syntactic semantic and discourse functional properties In addition to an extensive literature review and a comparison with Italian clefts and with French clefts the strength of the study lies in the critical approach it develops to the common definition of clefts Several commonly used criteria for clefts are applied to the corpus data revealing that these criteria often lead to ambiguous results The reasons for this ambiguity are explored thus leading to a better understanding of what constitutes a cleft In this sense the analysis will be of interest to specialists of Romance and non Romance clefts alike

for scholars and students wanting to delve into the social and cognitive dimensions of both the production and perception of sociolinguistic variation The book enables the reader to understand on the one hand how variation is acquired in childhood or at a later stage and on the other how perception and production feed into one another thus building up our understanding of the social meanings underpinning language variation *Nouvelle méthode pour apprendre l'anglais ou nouveau cours de langue anglaise* Mme.
