Electronic Monuments Gregory L. Ulmer, 2005 While corporations governmental groups and public relations firms debated the best way to memorialize the event of 9 11 sites of commemoration could be seen across the country and especially on the Internet Greg Ulmer suggests that this reality points us to a new sense of monumentality one that is collaborative in nature rather than iconic From a do it yourself Mount Rushmore to an automated tribute to the devastating annual toll of traffic deaths in the United States *Electronic Monuments* describes commemoration as a fundamental experience joining individual and collective identity and adapting both to the emerging apparatus of electracy or digital literacy Concerns about the destruction of civic life caused by the society of the spectacle are refocused on the question of how a collectivity remembers who or what it is Ulmer proposes that the Internet makes it possible for monumentality to become a primary site of self knowledge one that supports a new politics ethics and dimension of education The Internet thus holds the promise of bringing citizens back into the political equation as witnesses and monitors Gregory L Ulmer is professor of English and media studies at the University of Florida Gainesville **Rick Steves' Paris** ,1999 *The Publishers Weekly* ,1885 Clear and Simple as the Truth Francis-Noël Thomas, Mark Turner, 2017-03-14 Everyone talks about style but no one explains it The authors of this book do and in doing so they provoke the reader to consider style not as an elegant accessory of effective prose but as its very heart At a time when writing skills have virtually disappeared what can be done If only people learned the principles of verbal correctness the essential rules wouldn't good prose simply fall into place Thomas and Turner say no Attending to rules of grammar sense and sentence structure will no more lead to effective prose than knowing the mechanics of a golf swing will lead to a hole in one Furthermore ten step programs to better writing exacerbate the problem by failing to recognize as Thomas and Turner point out that there are many styles with different standards In the first half of *Clear and Simple* the authors introduce a range of styles reflexive practical plain contemplative romantic prophetic and others contrasting them to classic style Its principles are simple The writer adopts the pose that the

motive is truth the purpose is presentation the reader is an intellectual equal and the occasion is informal Classic style is at home in everything from business memos to personal letters from magazine articles to university writing The second half of the book is a tour of examples the exquisite and the execrable showing what has worked and what hasn't Classic prose is found everywhere from Thomas Jefferson to Junichir Tanizaki from Mark Twain to the observations of an undergraduate Here are many fine performances in classic style each clear and simple as the truth Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Non-standard Collection Management M. Pearce, 2018-11-09 First published in 1992 this volume recognises that it is not unusual when practising librarianship to come across small to medium collections within the library which because they are different from the main collection are outside the librarian's experience or are a new type of material not properly managed or exploited Therefore this volume contains chapters on a range of materials which are united by a certain rarity in the experience of most librarians It is aimed at those who need to know how to progress from scratch with a collection but not necessarily to take it into complete specialization There is information about characteristics of each type of material as well as guidance for their management Lists of further reading are provided and a note of some important collections
