Longhurst,1998 This book presents an in depth discussion of the biological and ecological geography of the oceans It synthesizes locally restricted studies of the ocean to generate a global geography for the vast marine world It attempts to divide the ocean into distinguishable regions that permit detailed comparisons Based on patterns of algal ecology the book divides the ocean into four primary compartments which are then subdivided into secondary compartments The secondary compartments are identified and characterized by biogeochemical features including nutrient dynamics continental shelf topography and algal blooms Because ocean wide regional classification has broad impact on the way oceanographers and ecologists study ocean patterns this book should have wide and long term appeal **The Standard Periodical Directory** ,1993 Selected Water Resources Abstracts ,1979 Fishery Bulletin ,1997 Monthly Catalog of United States Government Publications United States. closures will help fill some short term data gaps but long term monitoring will be required to understand why sea lions are at a fraction of their former abundance *Monthly Catalogue, United States Public Documents* ,1987 North American Journal of Fisheries Management ,1998 **Oceanic Abstracts with Indexes** ,1980 *Long-term Ecological Change in the Northern Gulf of Alaska* R.B.
