## **Gulf War Air Power Survey Volume 5 A Statistical Compendium And Chronology:**

**Gulf War Air Power Survey. Volume 5. A Statistical Compendium and Chronology** JOHNS HOPKINS UNIV WASHINGTON DC SCHOOL OF ADVANCED INTERNATIONAL STUDIES.,1993 From 16 January through 28 February 1991 the United States and its allies conducted one of the most operationally successful wars in history a conflict in which air operations played a preeminent role The Gulf War Air Power Survey was commissioned on 22 August 1991 to review all aspects of air warfare in the Persian Gulf for use by the United States Air Force The Survey has produced reports on planning the conduct of operations the effects of the air campaign command and control logistics air base support space weapons and tactics as well as a chronology and a compendium of statistics on the war The Survey was just that an attempt to provide a comprehensive and documented account of the war It is not a definitive history that will await the passage of time and the opening of sources that were not available to Survey researchers Nor is it a summary of lessons learned It concentrates on an analysis of the operational level of war in the belief that this level of warfare is at once one of the most difficult to characterize and one of the most important to understand This volume consists of two reports The first A statistical Compendium concentrates on airpower related aspects of the conflict and is not intended to portray other facets of Operations Desert Shield and Desert Storm except as they concern aerial operations The second report Chronology outlines many of the principal events of clear direct and tangible relevance to the planning of the Gulf War

**Military Affairs Catalog** United States. Superintendent of Documents,2000 **Gulf War Air Power Survey** ,1993 **Air Commanders** John Andreas Olsen,2012 This book combines short military biographies and operational analyses to reveal how the personalities attitudes and life experiences of twelve outstanding U S airmen shaped the central air campaigns in American history These case studies illuminate the character of these airmen the challenges they confronted in widely disparate armed conflicts and the solutions that they crafted and implemented Their achievements proved decisive not only in the campaigns they led but also in shaping the U S Air Force and the dominant role of airpower in modern warfare [Gulf War Air Power Survey a Statistical Compendium \(Volume 5 of 6 Part 1 Of 2\)](#) Office of Air Force History,U S Air Force,2015-02-21 This report draws upon the wealth of information collected about the Gulf War to present a compilation of statistical data that traces the course of the crisis marks the progress of the war and illustrates some of their most salient features It is neither all inclusive nor infallible When one considers that historians are still analyzing the events of World War II and even World War I the scant twenty four months since the end of the Gulf War is far too brief an interval to aim for either of those goals This report offers only those statistics that the Gulf War Air Power Survey considers to be most important in describing and analyzing air power in the Gulf War It is not intended to portray other facets of Operations Desert Shield and Desert Storm except as they concern aerial operations While constrained by time and availability of data the authors selected data based on a few broad criteria First they included data from the various operational reporting mechanisms in the commands such as situation

reports SITREPS or individual mission reports MISREPS because they contained information directly concerned with the conduct of air operations as those commands perceived it at the time Second this report contains data that depict the tempo of mobilization buildup and operations to illustrate the depth and breadth of the underlying support effort as well as the scope of the Desert Storm air campaign Finally this report presents data that concentrate on the operational employment of air power and focus on information needed by those who plan future operations or shape future air force structure As a result space considerations mandated that much useful information could not be included in this report and readers should consult the other reports for more detailed information The authors had to choose at times between competing sources of information In this war as in most even original records produced by participants at the time of the action were often erroneous This should not be surprising given the conditions of uncertainty and time pressure under which most wartime records are produced Nonetheless GWAPS is confident that no more comprehensive or reliable set of statistics on the air war has yet been produced

**Targeting Civilians in War** Alexander B. Downes, 2011-05-15 Accidental harm to civilians in warfare often becomes an occasion for public outrage from citizens of both the victimized and the victimizing nation In this vitally important book on a topic of acute concern for anyone interested in military strategy international security or human rights Alexander B Downes reminds readers that democratic and authoritarian governments alike will sometimes deliberately kill large numbers of civilians as a matter of military strategy What leads governments to make such a choice Downes examines several historical cases British counterinsurgency tactics during the Boer War the starvation blockade used by the Allies against Germany in World War I Axis and Allied bombing campaigns in World War II and ethnic cleansing in the Palestine War He concludes that governments decide to target civilian populations for two main reasons desperation to reduce their own military casualties or avert defeat or a desire to seize and annex enemy territory When a state's military fortunes take a turn for the worse he finds civilians are more likely to be declared legitimate targets to coerce the enemy state to give up When territorial conquest and annexation are the aims of warfare the population of the disputed land is viewed as a threat and the aggressor state may target those civilians to remove them Democracies historically have proven especially likely to target civilians in desperate circumstances In *Targeting Civilians in War* Downes explores several major recent conflicts including the 1991 Persian Gulf War and the American led invasion of Iraq in 2003 Civilian casualties occurred in each campaign but they were not the aim of military action In these cases Downes maintains the achievement of quick and decisive victories against overmatched foes allowed democracies to win without abandoning their normative beliefs by intentionally targeting civilians Whether such restraint can be guaranteed in future conflicts against more powerful adversaries is however uncertain During times of war democratic societies suffer tension between norms of humane conduct and pressures to win at the lowest possible costs The painful lesson of *Targeting Civilians in War* is that when these two concerns clash the latter usually prevails

**John Warden and the Renaissance of American Air Power** John Andreas

Olsen,2007-06-30 Included on the Chief of Staff of the United States Air Force s reading list for 2008 and the Royal Air Force s Centre for Air Power Studies 2008 Reading List Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm s air campaign Warden s radical ideas about air power s purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey s Inc in 1989 Presenting both the positives and negatives of Warden s personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments

**Flying Camelot** Michael W. Hankins,2021-12-15 Winner of the Gardner Lasser Aerospace History Literature Award *Flying Camelot* brings us back to the post Vietnam era when the US Air Force launched two new state of the art fighter aircraft the F 15 Eagle and the F 16 Fighting Falcon It was an era when debates about aircraft superiority went public and these were not uncontested discussions Michael W Hankins delves deep into the fighter pilot culture that gave rise to both designs showing how a small but vocal group of pilots engineers and analysts in the Department of Defense weaponized their own culture to affect technological development and larger political change The design and advancement of the F 15 and F 16 reflected this group s nostalgic desire to recapture the best of World War I air combat Known as the Fighter Mafia and later growing into the media savvy political powerhouse Reform Movement it believed that American weapons systems were too complicated and expensive and thus vulnerable The group s leader was Colonel John Boyd a contentious former fighter pilot heralded as a messianic figure by many in its ranks He and his group advocated for a shift in focus from the multi role interceptors the Air Force had designed in the early Cold War towards specialized air to air combat dogfighters Their influence stretched beyond design and into larger politicized debates about US national security debates that still resonate today A biography of fighter pilot culture and the nostalgia that drove decision making *Flying Camelot* deftly engages both popular culture and archives to animate the movement that shook the foundations of the Pentagon and Congress *Air & Space Power Journal* sum 03 , **Global Air Power** John Andreas Olsen,2011-02 Presents a regional national and global overview of air power Written by a cadre of military specialists who offer global perspectives Assesses its cultural as well as military influences [U. S. Marines in the Gulf War, 1990-1991](#)

Paul C. Westermeyer,2014-09-22 *Liberating Kuwait* is the official history of U S Marine Corps operations during the 1990 1991 Gulf War with Iraq It covers such topics as Marines in the embassies in Kuwait and Iraq Operations Desert Shield and Desert Storm the Battle of al Khafji the liberation of Kuwait and the amphibious feint Contains 24 color maps and numerous black and white and color photographs [GPS Declassified](#) Richard D. Easton,Project Muse,2013 *GPS Declassified* examines the development of GPS from its secret Cold War military roots to its emergence as a worldwide consumer industry Drawing on previously unexplored documents the authors examine how military rivalries influenced the creation of GPS and

shaped public perceptions about its origin Since the United States first program to launch a satellite in the late 1950s the nation has pursued dual paths into space one military and secret the other scientific and public Among the many commercial spinoffs this approach has produced GPS arguably boasts the greatest impact on our **So Many, So Much, So Far, So Fast** James K. Matthews,1996 **A History of Air Warfare** John Andreas Olsen,2010 This one volume anthology provides a comprehensive analysis of the role that air power has played in military conflicts over the past century Comprising sixteen essays penned by a global cadre of leading military experts A History of Air Warfare chronologically examines the utility of air power from the First World War to the second Lebanon war campaign by campaign Each essay lays out the objectives events and key players of the conflict in question reviews the role of air power in the strategic and operational contexts and explores the interplay between the political framework and mil **Reconstructing Conflict** Scott Kirsch,Colin Flint,2016-04-08 Reconstruction the rebuilding of state economy culture and society in the wake of war is a powerful idea and a profoundly transformative one From the refashioning of new landscapes in bombed out cities and towns to the reframing of national identities to accommodate changed historical narratives the term has become synonymous with notions of post conflict society it draws much of its rhetorical power from the neat demarcation both spatially and temporally between war and peace The reality is far more complex In this volume reconstruction is identified as a process of conflict and of militarized power not something that clearly demarcates a post war period of peace Kirsch and Flint bring together an internationally diverse range of studies by leading scholars to examine how periods of war and other forms of political violence have been justified as processes of necessary and valid reconstruction as well as the role of war in catalyzing the construction of new political institutions and destroying old regimes Challenging the false dichotomy between war and peace this book explores instead the ways that war and peace are mutually constituted in the creation of historically specific geographies and geographical knowledges **Airpower against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard** William F. Andrews, Colonel Andrews concentrates on tactical innovation during war He examines the extent to which USAF doctrine prepared the US Central Command Air Forces CENTAF for its mission against the Republican Guard Forces Command RGFC He describes how CENTAF adjusted air operations against Iraq s RGFC in the 1990 91 invasion of Kuwait CENTAF instituted six significant tactical innovations in one week that required its aviators to create new tactics in the midst of combat operations Colonel Andrews evaluates those innovations because they enabled CENTAF to satisfy theater objectives He recommends that the Air Force identify means to measure air operations against land forces during peacetime because the press of war does not provide time for reflection and analysis **Infrared Systems for Tactical Aviation** George B. Hept,2002 Evolutionary development is based on using continuous experimentation and adaptation in changing circumstances to reward success while allowing but eventually eliminating failure Since this approach is agile flexible quick reacting and thrives on change it contrasts with strategic planning in which

systems are developed in a planned and orderly fashion to meet future requirements A planned system is rigid slow to react and resists or ignores change which contrasts with how the military traditionally develops weapon systems One word that distinguishes between evolutionary and planned development is chaos Chaos like risk is unavoidable and hence should be managed rather than avoided Indeed a certain degree of chaos is desirable because it generates the necessary set of adaptations and ideas that can eventually be selected for evolutionary improvement The Darwinian concept of survival of the fittest can be applied to ideas systems and organizations that seek to maintain a competitive advantage Strategic Air Power in Desert Storm John Andreas Olsen, 2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime Gulf War Air Power Survey: Logistics and support , 1993 *Gulf War Air Power Survey, V. 3: Logistics and Support* Richard L. Olson, Cohen, Eliot, This volume consists of two reports and concentrates on direct as well as indirect support required to conduct air operations The first report Logistics discusses logistics in the Persian Gulf War as it applies to all military operations and in particular to air operations Includes functions for maintaining an air base and support services The second report Support concerns itself with the air base and airbase operations e g civil engineering services and personnel This is the dual theme of the volume
