, 1994. **The Historic King Arthur** Frank D. Reno, 2007-03-20. Who was King Arthur? How did the story originate? Through careful research of the many primary documents, a picture of the true Arthur can in fact be set down. He reached power shortly after the Romans evacuated Britain at the end of the fifth century and died at the Battle of Camlann. He became king at 15 under the name of Ambrosius Aurelianus and fought against the Saxons on the mainland as Riothamus, thus explaining the regeneration motif so closely tied to the mythical Arthur. This study reveals that the integrity and ideals central to Arthurian myth were very much a part of the real Arthur. The Shell Guide to British Archaeology Jacquetta Hawkes, 1986

International Handbook of Historical Archaeology
Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the *International Handbook of Historical Archaeology* have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today
